Fr. Hogan Answers
New Library Questions

The Rev. Ernest A. Hogan, O.P., librarian of Providence College, is the former Superior of the Dominican Community at F.C. He is a native of Cambria, Pa., and received his early education.

Father Hogan was graduated from Providence College in 1933 and did his graduate work in library science at Catholic University in Washington, D.C. He was ordained in the Dominican Order in 1938 and was assigned to Providence College in 1940. He is a member of the Catholic Library Association, the American Library Association, and the Rhode Island Library Association.

Father Hogan was inter­viewed this week by Cowl Reporter Bill Buckley.

Cow: Have you ever been at Providence College?
Fr. Hogan: I have been at Providence College since August 1940.

Cow: How long have you been librarian?
Fr. Hogan: I was Reference Librarian at Providence College until May of 1944, when my predecessor, the late Fr. James Jordan Fanning, O.P., became Librarian. Upon the arrival of Father Fanning in 1946, I became Assistant Librarian. Mr. Robert J. Slavin, O.P., the President of Providence College, in 1948, the Albertus Magnus building was dedicated, and the library doubled in size by moving into the back

River Road.

COWL: Have library rules and facilities changed much during the time that you have been here?
Fr. Hogan: As the college expanded, library rules were changed and detailed. The library rules, as they are found in the present “Student Handbook,” were established under the direct guidance and in cooperation with the late Father Robert J. Slavin, O.P., the President of Providence College. In 1948, when the Albertus Magnus building was dedicated, the library doubled in size by moving into the back (Continued on Page 4)

Old Elmhurst Academy
Purchased by College

Providence College has pur­chased the former Elmhurst Academy (bordering the Newport Creative Center on Smith St.) for “slightly in excess” of $600,000. It was announced by Fr. Haas during the Christmas vaca­tion that 21½ acre site is linked upon as “a landmark” by Fr. Haas. It is intended to replace some of the “open space” lost through building expansion on the existing campus. The “inner campus” being used for classrooms, library, student resident halls and Dominicans’ quarters.

The land was purchased from Nicholas J. Caldronde. The college had passed up buying Elm­hurst five years ago at a price roughly half of what was paid two weeks ago. Mr. Caldronde bought the land in 1964 for $500,000.

This purchase, according to Fr. Haas, means no change in the college’s attitude toward Chapin. “We’re interested in Chapin as long as it’s there,” Father said. The hospital, which borders the college’s campus, is viewed by college authorities as a logical extension of the campus, if the land is ever made available. The future of Chapin rests with the recommendations of a commi­

tee presently studying the feasibility of operations at the site. Findings are scheduled to be an­ounced in the spring.

The rapid expansion of Prov­idence College in recent years has compelled the college to look for “growing space.” The college in the past 12 years has grown from 1,505 to more than 2,600 fulltime students and 90 to 188 faculty mem­bers.

This growth has posed a threat to the “natural beauty” (Continued on Page 7)

Fr. Hickey Stricken Christmas: College Loses Dynamic Talent

“I don’t think I’ll ever find anyone like him—really,” said Mrs. Edward Pion, Father Hickey’s personal sec­retary for the past 21 years. “He was really wonderful to work with—efficient.”

The Big Brothers did not contribute. Plans for the money are being made available. The final plans and an agenda of Big Brother activities for the second semester will be avail­able in the middle of next month.

The Big Brothers did not have a Christmas party because of the number of other Christ­mas parties for the children given by welfare organizations of the state.

Colin by Fred Lima
This Extraordinary Man

We are assembled here as Christians and friends to thank God. Lift up your hearts, give thanks to the Lord. Our God is the inquisition of this Eucharistic meal. But how can we express our sense of gratitude when the sense of loss is so overwhelming and when he does not know where to turn to fill up the emptiness? We can at least thank God for the opportunity to share each other's memory in his death as in his life, Father Hickey brings us together. We know more of each other and therefore love each other more generously than we once knew and understood. With Father Hickey we have discovered that we have loved and honored this extraordinary man. What we really thank God for is the gift of His love through the life of Frederick Cornelius Hickey.

We are not here to say goodbye to the mortal remains of this wonderful man. In the instant of his death the unthinkable distance from time to the timeless was traversed. It's all over. God has seen through him as he through us. What our fond farewell mean in the face of God's welcome, if we truly believe in a timeless existence with the source of all knowledge and love. Father Hickey shared with all men the knowledge and love. Father Hickey that he brought to every task. He was not much for pomp and circumstance, but he recognized and insisted upon good form. This sense of propriety characterized even the most casual conversation. It never diminished his warmth. He was not much for honors, though he earned many. He was not obsequious, but had deep loyalties to the Church, the Dominican Order, to Christian education and to Providence College. It was in fact this loyalty which compelled his serious criticism at times.

Though he respected tradition, he was not afraid of change. He possessed immense tranquillity and common sense and when it was clear that something had to be done he had only one answer, ... DO IT! He was not afraid of work, he was not afraid of the truth, he was not afraid of other men, whether they threatened with their power or with their pusillanimity. If there was any hint of impatience in him it was with lazininess and indifference. That was because he saw so clearly how much had to be done. I invite you to ask yourselves, were there ever any work that he had undertaken which he had not placed in other hands to carry on and prosper to the advantage of others?

We have much to thank God for in the 62 years of Father Hickey's life ... and much to learn from it too. The most significant lesson for those of us who follow in his footsteps is that it is possible to be a fully competent professional, an effective educator and administrator, a disciplined scientist, a monk and a priest, a sensitive and sophisticated human being and a devout Christian. At times it might have seemed that his life was caught up in the irrelevant details of a purely secular existence, pursuing the myth of scientific excellence. Now that his life is complete we can see that everything he did was turned to the service of others. If the Christian imperative to love God and one's neighbor means to give one's whole mind and heart and soul, then Father Hickey fulfilled that injunction well, especially in the sharing of that most precious gift, his mind. There are institutions and more importantly individuals here who remember him, not only for what he taught them, but for the warmth with which he gave his full self to every worthwhile task. For this reason he was as effective a priest as he was a scientist and professor. His parish was at times the smaller world of colleagues and students among whom he taught the lesson that there is no secret about God's world that excludes him and that there is no truth about nature that cannot be turned to the service of mankind. The mystery of drawing all things to the God he celebrated on the altar as a priest he reaffirmed daily in his probings into the hidden microcosm. In the tradition of St. Albert the Great, with whom the intellectual life of the Dominican Order began, his whole life and work is not the end of love and understanding. Even in tragedy God's love works effectively among us and confirms our hope that we may share the intimacy of God with each other in Christ. Let us join our Bishops, Monsignor Edward Hitchcock, our brother-in-law, nieces and nephews, Dominican confreres, colleagues and friends in thanking God for this wise, industrious, generous and truly Christian priest.

VERV REV. WILLIAM PAUL HAAS, O.P.
Stagnation...

Several times during the past semester, The Cowl has raised its head and shouted a need for change in the present regulatory set-up on campus. But as always, few listen, many criticize; and campus life generally plods along seemingly no better or no worse for this change or lack of it.

Promises of action and hints of change are plentiful; but real action and genuine changes are few and far between. Ideas are entombed to a plethora of channels most of which too easily become clogged with proverbial and ever-present red tape. Suggesting items to the disciplinary code mite the fate of most administratively unpopular proposals — considered with care and even the perennial issues like the theology curriculum, so vital to the center of PC life, are cloistered in small committees blocked from acting by the “complexities of the situation.”

"Obstructionists"

Progress here at Providence College is remarkably slow and painful. Antagonism between administrators and students, a natural enough phenomenon, is often the attributed cause; but is seems obvious that there is an element connected with the administration, the faculty, nor the student body which is responsible to no small degree for the stifling of many efforts.

Members of the faculty and the administration, not to mention whole groups of students, have taken strong issue with many proposals for change on numerous occasions. But most of the men involved in these proposals from the President’s Office, to Student Affairs, to the Office of the Dean of Men, have all been reasonable, if at times, irritating men. They speak with students, and though this dialogue is often difficult, it nevertheless proceeds because we all have a common goal — the future welfare of this institution. There is at least the willingness to face the problems, whatever they may be.

There are genuine disagreements, conflicting views and legitimate gripes on both sides; but there is always the hope of agreement. With these men we have no complaint. It is with those members of the faculty who have not yet recognized that Providence College is a college, and not an institution into which they can flee when their intellectual or religious convictions are challenged, that we have complaint.

Air Way Cleaners, Inc.
535 Admiral Street
(Diagonally Across from Bradley’s Cafe)
Slacks and Jacket
Any combination of the two for $1.25
Shirts — 4 or more 22¢ EACH
ROTC Uniforms $1.10 — Hats FREE

Apply at:
523 Eaton Street
524 Academy Avenue

"Any Wednesday" is great
for skiing
So is any Monday, Tuesday, Thursday, or Friday. Lift tickets cost less ($5.50); lift lines are non-existent. You feel like you have the whole new major ski area at Waterville Valley to yourself — 2 mountains, 7 major lifts, 24 slopes, 8 lifts. After skiing, you’ll enjoy the small swinging bar, music, and good food at Waterville Inn. Get the books every once in a while (play it smart when you arrange your schedule). It’s an easy 2½ hour drive from Boston via Interstate 93 to W. Campton; then follow signs.

P. C. Progress?

They say that exams are coming, but we wonder when.

If we are to consider the record, the past looks better than the present, for the exam schedule has appeared on the scene a bit earlier in other years, . . . to say the least.

Two years ago the president of the Student Congress directly petitioned, on behalf of the student body, to the Dean of Studies for earlier issuance of an exam schedule, and it subsequently appeared in early January.

Last year an early petition was again made by the president of the Congress, and the schedule appeared before the start of the Christmas vacation. All of which brings us, in a rather disgruntled fashion, to this year.

Laboring under a totally misguided (apparently), if quite logical, assumption that progress is a matter of due process here at P.C. in most areas, the Student Congress committed the unforgivable sin of neglect, and did not see the necessity of petitioning the Dean once again for so simple a matter.

Neither do we.

On the whole, the general trend at P.C. seems to be toward the simpler and more efficient method, with concern for a minimum of complexity, here synony-

ous with chaos. The area with which we are now concerned, however, seems to be a glaring exception. The office of the Dean of Studies has assistants to assist the assistants, yet the best we can glean from there at this time of year seems to be an occasional misleading survey or two.

mous with chaos. The area with which we are now concerned, however, seems to be a glaring exception. The office of the Dean of Studies has assistants to assist the assistants, yet the best we can glean from there at this time of year seems to be an occasional misleading survey or two.

There now exists on the campus an entire office "dedicated," so to speak, to the scheduling of students and courses vs. computers, but at the time of this writing, a mere seven days before the exam period is to begin (or so it is reported), no schedule has been published at yet.

It is generally believed among the student body that this is in danger of mere courtesy, and, we think, rightfully so.

Either this, or the president of next year’s Congress had better begin petitioning in earnest.
Fr. Hogan... (Continued from Page 1)

**‘Spiritual Agora’**

By George Pan Piperopoulos

Editor's Note: The author of this article, George Pan Piperopoulos, is a member of the Providence College faculty and an expert on Ancient Greece, and has been an editor of the "Ancient Greek Daily" in the past.

He wrote a series of guest editorials concerning the difference between American and European students for the "Collegian".

"SPIRITUAL AGORA"

Smith Apollo’s disc hangs in the sky as the stars twinkle. The eyes, the spirit, are absorbed within one focus. The Master, Plato is speaking slowly; his words, ideas, concepts, fall softly in the fertile ground of our souls. Plato: The mystique of learning, at a university.

But that’s past, gone, never to return. Modern Greek Universities, according to the writer, have lost this mystifying quality of intimacy in the act of learning.

To a regretful extent educations has lost its institute of being something beautiful, an intellectual pursuit.

Aristotle speaks now, forever concealed behind the shadows of the eclipse; the eclipse that European produced, dividedly drilled and vigorous impoverished. It is the spirit of the Regimental Staff and U.S. Military judges. The drilling will be held in the morning, the trick drill and Final Review to be held in the afternoon. The annual 12th Regimental Drill Ball, slated for the evening of the 21st, will be held in the Providence College faculty, who have requested that University be made available to the public at a reasonable cost in excess of three million dollars.

In the U.S., and especially at P.C. dear students, you are fortunate. Your college is a best college libraries in the country. It will not be a university library, the kind with fifty thousand books, but a modern well-equipped college library to which students can come. Eventually, there will be more.

What news innovations will there be in the new library?

Fr. Hogan: The new library will be completely air-conditioned. It will have fifty faculty study carrels (private desks) for study.

There will be large study areas, but several small ones. It will have several seminar rooms, typing rooms, smoking rooms, etc. Staff areas will be large and equipped. Provision will be made possible for future use of computer equipment.

Fr. Hogan: What is the estimated cost of the new library?

Fr. Hogan: The library will cost approximately one million dollars. What will happen to the old library?

Fr. Hogan: This library will be made available to all faculty and teachers.

Do you have any reflections on your own from this library?

Fr. Hogan: Let me say that I think our library has had a slow but steady growth during my years at the college. This was made possible by the complete and generous cooperation of the various administrative offices, the library, and the Providence College faculty.

The American Professor is a unique being. And this character is formed in part from being a common denominator for many American students and retailers in this ‘spiritual agora’.

This is simple, friendly, most of the times understanding and concerned with his students as much as with the development of his intellectual endeavors.

A student might sometimes have to fill out an application form in order to have a conference with his professor.

This kind of quality, that is a European student, find invaluable in the addition to a professor in the U.S. seems to be disappearing lately.

But that’s past, gone, never to return. Modern Greek Universities, according to the writer, have lost this mystifying quality of intimacy in the act of learning.

The mystique of learning, at a university. But that’s past, gone, never to return. Modern Greek Universities, according to the writer, have lost this mystifying quality of intimacy in the act of learning.

The mystique of learning, at a university.

**Peace Corps Volunteer**

John F. Walsh, ’66, left the United States recently to become a member of the Peace Corps delegation working in Kenya.

He was named a Peace Corps Volunteer after completing 13 weeks of training at Teacher’s College of Virginia University in New York City and is one of 85 Volunteers trained this fall to expand the Corps’ work in Kenya secondary education.

Walsh, of 25 Spriet Street, Providence, received a B.A. degree in English from Providence College last June. A member of the Arts Honors program, he received the English Award for 1966.

His group left for their assignments on January 3. They will teach in the fields of English, history, geography, math, science and business in high schools throughout the country.
Fr. Hickey...

(Continued from Page 1)

than if I had gone to college," she said. "He'd spread his education to others, not just say, 'This is it; I know it.'"

Mrs. Pion described Father Hickey as a "planner," always with several projects going on at the same time. "Although he was a business man," she said, "he was really progressive." Under his direction more than 300 pieces of laboratory equipment and furniture was designed and built. Valued at about $30,000, these items cost only $300 to build. Many of his designs have been adopted by leading laboratories throughout the world.

"He was a wise man of extraordinary talent. He was a priest, a chemist, a scientist, a glassblower, a cabinet maker --- he'd tackle anything," Mrs. Pion recalled.

The Rev. Francis C. Duffy, O.P., Assistant Dean of Men and friend of Father Hickey, praised the deceased for, "displaying every one of his talents in his position as vice president of development. He had a great deal of foresight and was certainly very zealous."

Father Hickey was largely responsible for gaining a $1,000,000 government grant in December for the proposed new library under the Higher Education Act.

"The first long set of forms he filled out were later updated by the government, and Father Hickey had to do them all over again," Mrs. Pion said. "But he was a patient man and that didn't upset him."

Father Duffy told how Father Hickey received news of the acquisition of the grant just before he left to see his brother in Detroit.

"He left here a very happy man," Father Duffy said.

Father Hickey is also responsible for a fine arts center to be opened on the first floor of Joseph Hall next semester. The center will include a painting-and-sculpture room opposite a music practice room with two classrooms on each end of the complex.

A projection room in the center of the four rooms will be capable of projecting movies or slides into any of the four rooms. Father Hickey acquired a government grant for the center last August.

The vice-president also proposed a closed-circuit television for Harkins Hall, which will allow lab work to be seen and heard in more than one classroom simultaneously.

Father Hickey, a member of the PC faculty since 1937, was appointed vice-president of community affairs in November, 1965.

A scientist-humanist, he was a professor of chemistry and chairman of the college's academic planning committee which is charged with the responsibility of developing a long-range master plan for the college.

He was the first director of the school's Honors Science Program — sponsored by the National Institutes of Health — and was the former director of the Medical Research Laboratory here.

Born in Detroit, Michigan, on Feb. 3, 1904, Father Hickey was a graduate of the University of Detroit High School. He received a B.A. and a Bachelor of Science degree from Georgetown University in 1933 and a Ph.D. in chemistry from Yale University in 1937. He also studied at Catholic University, Washington, D.C.

He entered the Dominican Order in 1926 at the College of St. Thomas Aquinas, River Forest, Illinois, and was ordained to the priesthood in St. Dominic's Church, Washington, in 1933.

Long active in Rhode Island community affairs, he was a member of the State Atomic Energy Commission and of the Governor's Advisory Council to the Rhode Island Medical Center. During World War II he was the gas consultant to the state department of defense, developing safe methods of identifying poisonous gases.

He directed the development of the College's Edward J. Hickey Health Science Research Laboratory, named in honor of his father.

Father Hickey was a frequent contributor to professional and academic journals and was a member of the American Chemical Society, the American Association for the Advancement of Science and the New England Association of Chemistry Teachers.

The funeral was celebrated in St. Pius Church following a solemn requiem Mass in Aquinas Chapel. Burial was in the Providence College community cemetery.

Columbia Record Reflects on PC

Last November Providence College lost its match versus Columbia University on the general Electric College Bowl. Previous to that defeat, the Friars had downed Suffolk University of Boston.

After the loss to Columbia, understandably, interest in the College Bowl here on campus waned. But the record compiled by Columbia after their hard-fought victory over Providence sheds favorably on the efforts of Coach Edward Brennan and the four team members.

Columbia went on to retire undefeated after five straight victories. Columbia's final record was this: Col. 333—Providence 39; Col. 320—Michigan State 150; Col. 230—University of Indiana 145; Col. 320—College of William and Mary 60; Col. 245—Smith 120.

Note that the Providence-College tie became more points against Columbia than any other of the teams and also that the Friars lost by the narrowest margin of any game. In that way we all know that it is a fine performance by the PC. team has been enhanced by the superb subsequent record of Columbia.

It's trade-in time for tired old myths.

Like the one about business. Especially big business. That it is beyond the rugged individualist's wildest daydream to enter this holy of holies because he'll lose something that's very sacred — like his independence.

Sure, it can happen. If a guy or gal won't to hide, or just get by, or not accept responsibility, or challenges.

We're not omniscient enough or stupid enough to speak for all business, but at a company like Western Electric, bright ideas are not only welcome, they are encouraged. And no door is shut. Create a little stir, go ahead, upset an old applecart (we replace shibboleths at a terrific pace — we have to as manufacturing and supply unit of the Bell System — in order to provide your Bell telephone company with equipment it needs to serve you.)

There's an excitement in business. True, we're in it to make a profit, but working to find new and better ways to make things that help people communicate is very rewarding and satisfying. Did you ever hear these wry words of Oliver Wendell Holmes? "Never trust a generality — even this one."

That's how we feel about the generality that claims you'll just become a little cog in a company like Western Electric. You might, of course, but if you consider yourself an individual now, odds are 10 to 1 that you'll keep your individuality. And cherish it. And watch it grow. Even at big, big Western Electric.

You know, that's the only way we want you to feel. If you feel like coming in with us.

Western Electric MANUFACTURING & SUPPLY UNIT OF THE BELL SYSTEM
Thursday, February 10, 1967 — 8:30 P.M.

As you contemplate one of the most important decisions of your life, we suggest you consider career opportunities at Pratt & Whitney Aircraft. Like most everyone else, we offer all of the usual "fringe" benefits, including our Corporation-financed Graduate Education Program. But, far more important to you and your future, is the wide-open opportunity for professional growth with a company that enjoys an enviable record of stability in the dynamic atmosphere of aerospace technology.

And make no mistake about it... you'll get a solid feeling of satisfaction from your contribution to our nation's economic growth and to its national defense as well.

Your degree can be a B.S., M.S. or Ph.D. in: MECHANICAL, AERONAUTICAL, CHEMICAL, CIVIL (structures oriented), ELECTRICAL, MARINE, and METALLURGICAL ENGINEERING • ENGINEERING MECHANICS, APPLIED MATHEMATICS, CERAMICS, PHYSICS and ENGINEERING PHYSICS.

For further information concerning a career with Pratt & Whitney Aircraft, consult your college placement officer—or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

For further information concerning a career with Pratt & Whitney Aircraft, consult your college placement officer—or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

For further information concerning a career with Pratt & Whitney Aircraft, consult your college placement officer—or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

As you contemplate one of the most important decisions of your life, we suggest you consider career opportunities at Pratt & Whitney Aircraft. Like most everyone else, we offer all of the usual "fringe" benefits, including our Corporation-financed Graduate Education Program. But, far more important to you and your future, is the wide-open opportunity for professional growth with a company that enjoys an enviable record of stability in the dynamic atmosphere of aerospace technology.

And make no mistake about it... you'll get a solid feeling of satisfaction from your contribution to our nation's economic growth and to its national defense as well.

Your degree can be a B.S., M.S. or Ph.D. in: MECHANICAL, AERONAUTICAL, CHEMICAL, CIVIL (structures oriented), ELECTRICAL, MARINE, and METALLURGICAL ENGINEERING • ENGINEERING MECHANICS, APPLIED MATHEMATICS, CERAMICS, PHYSICS and ENGINEERING PHYSICS.

For further information concerning a career with Pratt & Whitney Aircraft, consult your college placement officer—or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

Sets for Nationals

In addition to its regular weekly page, the debate team of Providence College has increased its efforts in preparation for the upcoming Tournament to be held at the end of this month at Tulane University, New Orleans.

This year's debaters have won roughly half of their tournaments and have recorded victories over the "big name" debating schools, such as Massa­chusetts Institute of Technology and Boston College.

The team has debated schools from all parts of the country, including Eastern Illinois University, John Hopkins, Harvard, Dartmouth and New York Uni­versity.

And this year's topic, chosen by the vote of the nation's debate coaches last summer, is "Re­stricting the right of a parent to hold a switch-and-basis in which a team of two debaters argue the affirmative and negative alternately rounds throughout their objections and arguments about six or seven rounds.

In the past, the main weak­ness of the team has been "lack of evidence"; but this spring, the debaters expect a very strong showing for their second half of the season as a re­sult of their intensive training over the Christmas vacation.

Members of this year's team include: Francis X. Middlebro, D.L.H.; Roderick Campbell, vice­ president; Mark Michael, secre­tary; and George Linko, librar­ian.

Other members are William Hoffman, T. H. E. A. Lopatko and Ronald Steiner. Father John Tibbetts is moderator of the team.

New members from the fresh­men and sophomore classes are encouraged to join at the begin­ning of the second semester.

Winter Weekend Plans Stated

The Junior Class of Prov­idence College has announced the final plans for the first annual "Winter Weekend." William Walsh, weekend co­chairman, said that the entire student body would support the weekend, since it is the first of its kind to be held at Providence College.

On Friday, Feb. 3, 1967, a dance will be held at the Coachman in Tiverton, R. I., from 8 p.m. to 1 p.m.

From 12 to 2 p.m. on Sat­urday afternoon there will be a dance at Roger Williams Casino. Free refreshments, plenty of food and entertaining music will warm the country setting. Depending on the weather, skat­ing and sledding will be enjoyed at Pole Lake, within walking distance of the Casino. At 3:30 the couples will attend the P.A.C. hockey game of the week between Providence and North­eastern at R. I. Auditorium.

Saturday night from 8 p.m. to 10 p.m. will feature the "Brothers Four," whose folk-singing ability has that rare universal flavor which has made them the favorites of a college genera­tion. In addition, the John Platt Trio have hoped that they have escaped since they burst upon the scene with their first record, "Greenfields," the Brothers Four have piled one successful venture upon another with mo­numental regularity. Whether they are laughing it up in their own special version of "New Frankie and Johnny," or lament­ing, with intense severity, Twenty-five minutes to Go," the Brothers Four can strike a common chord with music lovers of all tastes and all ages. A Couples Dance will follow in the Raymond Hall Totem.

Weekend bids will go on sale tomorrow, January 12, in the Alumni Hall Annex from 9:30 a.m. to 1:30 p.m. and at dinner time in Raymond Hall. It is planned that the weekend is open to the entire Student Body with the donation of a very reasonable $13.00.

Streaking Red's Close-in on Aces

In the fourth round of action, the all-conquering Red's picked up two wins to make it three in a row after dropping their first contest. The latest look like the strongest threat to the undefeated Aces in the interconference schedule-

The Reds handed the Maple Leafs their first loss by a score of 5-2. Hugh Devine picked up his second “hat-trick” of the campaign, with Steve Tuchapsky providing the two apiece. Jack Otis was the big man for the Maple Leafs with a clean sweep.

The Reds also outlasted the Canadians for their third win. 7 to 5. Steve Tuchapsky was the big gun for the Reds with three goals. Capt. Vin Tracy continued his outstanding effort for the i

THE COWL, JANUARY 11, 1967
LEN WILKENS

did you have to make in order to

get over the big men. I had to

keep moving at all times and

try to be quicker than the

man guarding me. I also had to

learn to drive to the basket

and get over such big men as

Bill Russell and still come up

with, the majority of the time,

a basket, an assist, or a foul shot.

Bob Cousy once compared

basketball to vaudeville. Do you

think something can be done

about the league's traveling

problems — for example, the

much discussed shortening of

the schedule?

A. I think the league is

slightly different now than

when Cousy was a player. But

it's true that the league is still

faced with the problem of a

barricade traveling schedule

and blocking several UMass

shots. I think I should talk

about that.
Jim Walker Named ‘Player of the Week’

In keeping up with a policy of featuring articles, the Cowl is in augmenting a Player of the Week series, where it may seem more appropriate to speak of Jim Walker as player of the year, his individual contribution to the Friars being significant enough to select him as the first recipient of this honor.

Last Thursday Jim was officially proclaimed P.C.’s greatest basketball star of the year in the Holiday Festival. Jim Walker missed on a 1 and 1, who seemed to lose his touch in the closing minutes. Skip Hayes came off the bench and countered greatly to the Friar defense by coming up with five key steals. The Friars won 62-50.

Saturday night PC invaded the land of the offensive foul — a Canisius club, which had gotten off to its best start in four years. In the opening game, the Griffs, tripped the Friars, 79-73 in overtime.

The Friars had it in the bag — but they let it get away. With 46 seconds left in regular play, a jumper by Bart Carr cut P.C.’s lead to four. After Jim Walker missed on a 1 and 1, John Morrison canned a “junk shot” high off the backboard.

The Walk . . .

Jim Walker has gone to work. It is true that he missed three foul shots in the last 48 seconds, on of which would have meant six.

But to be realistic, contrary to popular belief, he is not only human.

Monday night John Morrison scored 2 points in a winning effort against Oglethorpe. He shot 50% from the floor and showed improvement from the foul line.

Bill Barrett first varsity start.

PC Holds for Two Periods But Bows to Brown 7-1

Last week the Friar hockey forces, shocked severe losses at the hands of aggressive Colgate and West Point units. During the two game stretch the Friars managed to score a total of two goals while allowing fifteen to the opposition. The P.C. offense never really got going, and the defense proved ineffective. Time and again the Friars had to play catch-up netting. Colgate scored twice before the Friars had to play catch-up. In the first 18 minutes, the Friars had a man and scored almost at will. The Friar fans came in the second period when Colgate scored two goals in a minute with a man in the charity stripe, and halved their shots, compared to Oglethorpe. 5.22 which made P.C.’s go in the game the Friars took in garnering his 29 points. Lissack moved well without the ball. He hit repeatedly behind a screen sent up by UMass forwards. But with five minutes to go in the game, the Friars had a lead. Once again it was Jimmy Walker who led the P.C. surge — both offensively and defensively. He scored 29 points to bring his season earning to 1,522 which made P.C.’s all time scoring leader, surpassing Thompson. More impressive was the way he fought through UMass defense and seemed to lose his touch in the closing minutes. Skip Hayes came off the bench and countered greatly to the Friar defense by coming up with five key steals. The Friars won 62-50.
