Disciplinary Board Bill Resisted

At a meeting of the Student Administration Committee held Thursday, James Montague, President of the Class of 1968, presented a proposal which would allow student participation in the Disciplinary Board. The proposal met resistance by Rev. James M. Murphy, O.P., Vice-President for Student Relations and hence discussion will continue at the next committee meeting to be held this Thursday.

As stated in the introduction, the main goal of this proposal concerns student representation on this board. However, taken in a much wider view, the aim is a college community in which the students participate in the matter of concern.

Noted in the proposal also is a statement from the handbook of the National Student Association: "Students should be encouraged to establish and participate in a judicial system which will create an awareness of the student's responsibilities to his community."

The actual proposal follows:
1. that the Disciplinary Board include two student members.
2. that these students be appointed by the Student Congress executive board with the approval of the Student Congress.
3. that one member be selected from the Junior class and one from the Senior class.
4. that these two students exhibit the responsibilities outlined above.
5. that any student appearing before this board be given the alternative of review by faculty members only.

Part four of the proposal was the cause of most of the delay on the part of Rev. Murphy. He felt that the responsibilities of maintaining secrecy would be too much of a burden to place on any student member of the board. He also felt that students would be too severe in judging their peers.

Other observations on the proposal quickly evolved into arguments against the measure. As the meeting progressed (Continued on Page 10)

Minor Library Construction Fire Causes Damage to Wood, Wiring

A minor fire in the basement of the library construction site caused a great deal of commotion Sunday afternoon. Several boards stacked in a fiberglass concrete form were afame, causing some damage to wiring. Bill Danforth, the College's Resident Engineer on the library job, stated that the lumber had been put in the forms after construction was halted the day before. Because of this, he stated, the fire had to have been started by a short circuit. However, Danforth said this was not possible because the wiring was not yet connected.

Several Questions Arise Concerning Ring Policy

By William M. Buckley

On October 31, the Student Congress passed a bill which gives control of the financial procedure concerning the class ring to the administration of Providence College. At that meeting, and in the two weeks hence, several questions have arisen as to the true meaning and implications of the bill. In order to understand the varying opinions on these questions, however, some background information is necessary.

What prompted the introduction of the bill was the question of who could get the best price on the ring — the administration or the students. Another consideration was a ruling by the administration that a representative of the school will no longer be allowed to sign the contract with the ring manufacturer. In the past, it had been traditional for the moderator to sign, for the signature of someone over 21 is necessary for the contract to be legal and binding. The drawback to this, however, is that the school, although not actually handling the arrangements, would still be morally and financially liable. Because of this the administration asked for a decision from the Student Congress: Either the administration would handle the negotiations and be fully responsible, or the students would handle the negotiations and be fully responsible.

Edward Dunphy, President of the Student Congress, was approached with this, and, in turn, Joseph Morrissey, President of the Class of 1970, was asked to draw up the bill asking for the decision and to submit it to the Congress.

THE P. COWL
Vol. XXX, No. 7
PROVIDENCE COLLEGE, PROVIDENCE, R.I., NOVEMBER 16, 1967
Fourteen Pages

A proposal for the establishment of a faculty senate at Providence College has been approved by the College Corporation, it was announced Monday, November 13.

The Corporation's unanimous acceptance of the proposed constitution of the senate means that for the first time, the facul-
Borges' Bill is Defeated
Montague's is Approved by P. C. Student Congress

Last Monday night, the Student Congress met in the Atrium for the first time, due to the administration asking that two student representatives be appointed to the Board of Directors by the Student Congress. The bill was passed by a vote of twenty-three to one, as stated by Mr. James Montague.

Two important bills that were presented to the Congress by Mr. James Montague was defeated. The first bill stated:

"A letter be sent to Mr. Raymond Thibault requesting that the invitation to the Dow Chemical Company to conduct interviews and to recruit at Providence College be withdrawn and that Dow Chemical Company be barred from further recruiting at Providence College during the academic year 1967-68."

The second bill stated:

"A letter be sent to Mr. Raymond Thibault requesting that the invitation to the Dow Chemical Company to conduct interviews and to recruit at Providence College be withdrawn and that Dow Chemical Company be barred from further recruiting at Providence College during the academic year 1967-68."

The reasons being

- that Dow Chemical Company is the sole manufacturer of napalm, used by United States forces in South Vietnam.
- that Dow Chemical Company is perceived as an immoral and unjust weapon and the Dow Chemical Company as that weapon's sole manufacturer.
- that Dow Chemical Company is the sole manufacturer of napalm, used by United States forces in South Vietnam.

Second Monthly Mass
For College Community

The second in a series of monthly Masses for the entire college community will be held Sunday at 11:15 a.m. in Harkins auditorium. The Mass will be followed by breakfast and donuts in Alumni Hall.

The first of these Masses was held Oct. 29. About 400 students and faculty attended. Many students brought dates and many faculty members brought their families.

The Masses are being held at the suggestion of Reverend William Paul Haas, O.P., President of the College. Fr. Haas hopes that they will serve to bring together all elements of the College to complement the trend toward mutual understanding.

Fr. Paul J. Walsh, O.P., Chaplain, is organizing the Masses. He hopes that as many faculty and students as possible will take advantage of these opportunities to better know one another.

The Chaplain's office is also sponsoring a movie and discussion to be held Monday, Nov. 20 at 7:30 p.m. in Albertus 100. The movie, "Woman in the Dunes," was made in Japan in 1964. It will have English subtitles.

The Paulists is a modern man, free from stifling formalism, a pioneer in using contemporary mediums and techniques to be of service to God and man.

If you are interested in making a greater contribution with your life as a priest write to the Paulists today for a special application test designed to help determine if you are of priestly caliber.

Association of Professors Protest Draft Directive

WASHINGTON (CPS) - The American Association of University Professors has strongly protested the Senate's action in asking the Selective Service Director Lewis B. Hershey that persons involved in anti-war protests should be drafted first.

AAUP president Clark Byse, a professor at the Harvard University Law School, and Dr. Bertram H. Davis, AAUP's general secretary, sent a telegram to Hershey protesting the directive as it may affect colleges and university teachers and students.

Hershey's statement regarding the Senate action was read to a letter sent to all members of the Selective Service System. The letter was signed by the association, who protest the war and the draft by disrupting army introduction. It was signed by the Selective Service System, which protested the directive from Hershey.

The AAUP said Hershey has set forth a standard which would permit local boards to induct persons for exercising their constitutionally guaranteed freedoms of speech and assembly.

"The mere existence of this un-defined power to use the draft as a political weapon may therefore have a chilling effect upon academic freedom and free speech and assembly as guaranteed by the First Amendment."

Thetelegram also stated the conduct of some members of the academic community may be punishable under existing legal or institutional procedures and that the further use of the Selective Service as a punishment violates traditional American due process guarantees and is inimical to the national interest.

"We do not believe that your letter serves the national interest, and we urge that it be promptly rescinded," the telegram said.

Junior Year Abroad Interview

Mr. Stanley Galke will conduct interviews for the Junior Year Abroad program in the Language Learning Center, room 15, Meagher Hall at the following times: Thursday, Nov. 16, 9 a.m.-11 a.m.; Friday, Nov. 17, 10 a.m.-12 noon; Monday, Nov. 20, 10 a.m.-12 noon.

from national universities as well as from non-university sources. He hopes to achieve his goals. Individuality has a great deal to offer those who lack it. We welcome it. We think that the Student Congress has a great deal to offer, that it is in the best interest of the Student Body, and attempting to preserve righteous principles in perilous and confusing times, protest napalm as an immoral and unjust weapon and the Dow Chemical Company as that weapon's sole manufacturer.

After a long, and at times heated, discussion, Borges' bill was defeated by a vote of eighteen to three.

In a private interview with Borges, he stated, "I resent being accused of legislating morality or being a representative of any group trying to legislate morality. There were basic moral questions involved. I think that the Student Congress has failed in upholding standards which reflect the Student Body. I resent my remarks being cut off before the debate had ended. The turmoil was necessitated because some congressmen called for a vote before all the remarks from the floor had been terminated."

Panel on Constitution

The Democratic Caucus of the Providence College Political Science Club will sponsor a panel discussion on the proposed state constitution Tuesday, November 29, at 7:30 p.m. in the Guild Room of Alumni Hall. Patrick T. Conley, an Assistant Professor of Political Science at Providence College; Elmer C. Cornwell, Chairman of the Department of Political Science at Brown University, and a delegate from the Constitutional Convention will participate in the discussion. J. Joseph Garzino, who has been a member of the Democratic State Committee, will moderate the discussion.

Students from Bryant College, Brown University, Rhode Island College, Rhode Island Junior College, Roger Williams College, Salve Regina College and Providence College have been invited to attend.

DO PRIESTS

- Cut Ribbons at Civic Affairs?
- Wrestle with Bookkeeping?
- Balance the Budget?
- Shuffle Papers?

Let's face it. There are some things that have to be done. In that we differ from no other profession.

But — the Paulists feels he can rise above the everyday tasks that must be done. Because he is an individual and is treated accordingly, he is free to develop his own innate talents to achieve his goals. Individuality is the keynote of the Paulists. We depend on the individual to bring him this unique contribution. We welcome it. All of us, all profit by it.

The Paulists is a modern man, free from stifling formalism, a pioneer in using contemporary mediums and techniques to be of service to God and man.

If you are interested in making a greater contribution with your life as a priest write to the Paulists today for a special application test designed to help determine if you are of priestly caliber.

FOOTBALL FOR SHUT-INS

At next Saturday's football game while you are sitting in your armchair or in your dives, and you think you may not pause and give a thought to football's greatest and, alas, most neglected name? I refer, of course, to Champert Sigafosse (1714-1928) who started life humbly on a farm near Thud, Kansas. His mother and father, both named Walter, were bean-gleaners, and Champert became a bean-gleaner too. But he lived of the work and went to Montana where he got a job with a logging firm. Here the firstwhile bean-gleaner worked as a stump-thumper. After a month he went to North Dakota where he tended the furnace in a grainery (wheat-heater). Then he drifted to Texas where he tied up oil fields (pipe-wiper). Then to Arizona where he strung dried fruit (fig-rigger). Then to Minnesota where he determined the odds in a gambling house (dice-pricer). Then to Milwaukee where he pasted camera lenses together (Zeiss-splicer).

Next door to Champert's hog-floggery was a mooring furnace in a granary (wheat-heater). Here occurred the event that changed not Champert's life, but all of ours.

So Champert, his face a study in epidermal elegance, says to himself, "I know, is a signally underpaid profession. Still, thought over, and he knew love. Though Graffa's beauty was not upper lip kissable, would you not use the blade that dewlaps like damask, a chin strokable, cheeks fondlesome, making significant, but prudent, strides in this direction through the organization of such bodies as the student-faculty relationships, especially as manifested by the availability of many faculty members, are particularly edifying for Father. He could also, with a good degree of facility in English, Lat-
Fr. Mark Heath Questioned on Religious Studies Department

The recently appointed head of the Department of Religious Studies, Fr. Mark Heath, O.P., was recently questioned by the Providence Student Press regarding his department. Ecumenism in our pluralistic world was foremost in the minds of both faculty and students. The possible merger of various Catholic Schools of Religion and the Department of Religious Studies was the subject of the conversation.

"The merging of various Catholic Schools of Religion and the Department of Religious Studies was of great interest to the students," said Fr. Heath. "The merging would provide an opportunity to pool the resources of these institutions and create a more comprehensive program of religious education."

It was also stressed that the merging would allow for a more coordinated approach to the teaching of religious studies. "By merging, we can better coordinate the courses offered and make them more relevant to the needs of our students," said Fr. Heath. "This would also allow for a more integrated approach to the study of religious traditions."
Ring Controversy

(Continued from Page 1)

But the major advantage of the bill, according to Mr. Morrisay, is that, with the administration handling the arrangements, a substantial decrease in the price of the individual ring will occur. He also cited the advantage of having the administration back up the guarantees of the contract.

The alternative to the administration handling these arrangements would be for the students themselves to handle it. It is significant to note that the present junior class, the class of 1969, did just that and did so satisfactorily. Accord- ing to William Freeland, the chairman of the Class of '69 committee, who was in charge of finance, the procedure which they followed went like this:

Different ring manufacturers were contacted and they sent the ring committee a sample of rings, each manufacturer spoke with the Ring Committee. The committee informed them as to the standards, specifications, and other stipulations which it de- signed and then the representative drew up a statement as to what could be offered in line with the committee's proposals. After analyzing statements from five companies, the Herff- Jones Co., which has plants in Providence and Indianapolis, was selected. There was no actual contract with Herff-Jones, for only the letter of acceptance which the committee sent to the company was signed. (Fr. Francis Duffy, O.P., Administrative Assistant, who had stated in the Student Congress meeting of Oct. 31 that he believed that Fr. Adrian Wade, O.P., former mod- erator of the Class of '69, had signed some document last year which could have obligated the school to assume financial responsibility for the rings. Fr. Wade was contacted in Michigan, however, and said that he did not recall having signed anything.)

Collecting the money for the rings, the committee kept a set of master ledgers, two sets of ledger cards, and a third ledger card so that with the three copies the records so to speak of their rings could be kept more efficiently. For eight days each second Thursday in October the Ring Weekend approached the other Thursday. The money which was collected was de- posited in the bank, no interest could be accumulated. By not going through the book- keeping service, the book- keeping service charge, but, since the class's loss in debt at the end of the week was agreed that the $4 would be collected and deposited in the bank, the collection of the class is interest on approximately $51,000.

Mr. Morrisay's ring was received by the company after eight days until it was entirely paid for and after Nov. 18 anyone who had paid will have to deal with Herff-Jones. Thus, the responsibility and the money will be handled for the individual student and the school was not responsible in any case.

Mr. Morrisay's bill was not paid and he put in a statement significant to note that the three dentists were all junior and seniors and that they were not members of the Ring Committee. Another, Kenneth Goulé, designed the ring. Albert Pape, the other dentist, stated, "I can see the students lost, but an ordinary person wouldn't accept financial responsibility for something over which he has no control." He added that accepting financial responsibility for something over which it has no control is not a good idea. In that time, I don't like the idea of having us (the Congress) legis- late for classes as to whether they or the school should handle it."

Mr. Goulé noted that the effect of liability was his main objection to the bill. According to Mr. Goulé, the principle of liability is that if the money is lost and if a ring is lost, he believes that the class in question itself against this. "No one receives a ring," he said, "until it is fully paid for. So, there is not much liability on the part of the students unless the money is lost. Otherwise, however, it could be used to insure the class against this." He added that a committeeperson who voted against the bill, James Borges, said that he thought there are definite advantages to the bill and that no student's rights are being invaded, which I voted no because of the incom- plete facts and misunderstood concepts which were presented at the meeting when the bill was passed.

Each of these three has a somewhat different reason for voting no, but they all agree on one thing: That the Student Congress should not fund future classes to cover insurance charges. They believe that it should be left up to the individual class whether it wants the school to handle the negotiations, or the class itself. As Mr. Goulé stated, "I can't see why other classes can't handle it the way we did." There are other additional factors. With the possibility of pressure from local ring companies, the administra- tion is using the price, profit, and the probability of a long term contract as first of these objections. Mr. Richard E. Fritz, Director of Purchasing, stated that four major companies were contacted for the Class of 1970 ring. These companies were: DiesSEL-Clust, Providence; Bal- four, Providence; Jones, Providence, (main plant in Indianapolis); and Justen, Milwaukee. (Local plant in Atteboro). These four major companies are located near the city of Providence, but, accord-
Faculty Senate

The formation of a Faculty Senate at Providence College is more than just a development which affects the status of the faculty; it has definite implications for the student body. Because the Senate is empowered to recommend curricular, admissions, and departmental policies, it has the great potential for initiating changes which could vastly improve the academic lot of the PC student and faculty member.

In giving the faculty access to the policy-making machinery, the administration is testifying to its objectives of providing quality education and not indoctrination. This disregard of responsibility may help remove the impression, prevalent in many minds, that PC is an academic “cloister” where religion rules and regulates. New and better qualified professors who before would not have considered a position at Providence College may now be attracted because there exists an organization on campus that would guarantee their rights and privileges. Likewise, those well qualified professors already a part of our faculty now have more reason to stay on.

The power of the Senate to recommend curriculum policy may manifest itself in new and more timely course offerings. Also, the curriculum will be more subject to actual class room experience and considerations. This can only result in improved instruction since in most cases the instructor will be teaching subjects which interest him and the student.

Indeed it is a heartening thought to know that these and many more mutual benefits to both student and teacher can now be realized. The prerequisite for action however, is aggressive leadership. We trust that the Faculty Senate will become the dynamic and activist force which it has the potential for. Such a representative body has been long in coming to Providence College. It would be a step backward if the Senate relegated itself to the role of a mere advisory board or is vetoed into impotence.

Meet the Congress

The student demands at PC in the past few years have been many and diversified, but one of the most constant complaints has been exemplified by the statement that the students seem to lack REAL representation in the Student Congress. For any governing body to meet all the demands of its voters, even in a democracy, is impossible. If our elected officials are to truly represent those who have elected them, they must make a valid attempt to seek out popular opinion. A “meeting of the minds” must occur if the demands of a working democracy are going to be satisfied.

Until recently, the student representative at PC only came in contact with the student populace casually on the social level. The Congress meetings, although they were theoretically open to all students, were attended only by the student senators and a handful of INTERESTED students. It seems that the masses have become so complacent that there is practically no interest at all in the student governing body! Even controversial issues, such as the newly passed Ring Bill, stir only mild discussion among its dissenters. The student sector of the campus community seems to be steeped in the gospel of apathy.

In order to combat this student indifference the Congress has inaugurated a series of casual smokers which are open to all students. The meetings should serve as an informal forum of discussion between the student body and their elected officials. This marks a very noteworthy opportunity for each student to “Meet the Congress,” and discuss his favorite gripe with them. We of the Cowl sincerely hope that the student body will meet the “challenge of democracy” by attending the smoker and supporting its purposes.

Splash Party

WILL THIS SITUATION PREVAIL AGAIN THIS YEAR? Two drains installed at the top and bottom of sophomore stairs would alleviate the problem.
Lack of Faith...

Editor:

It seems very inappropriate and incongruous that The Cowl as the voice of the Student Body should represent the Administration as a greedy adversary, hungry for control of the entire realm of student affairs. This attitude seems highly prevalent in the editorial concerning "the Ring Controversy" in the November 9th issue of The Cowl. In answer to the question "why such a maneuver should be made," perhaps another question can be posed, "Does it seem too much to actually believe that the Administration has for its main objective the welfare and well-being of the student Body?" Although headlined as a ring "standardization," the bill passed by the Student Congress only opens to the student the full benefits of the Class of 1970 de­signed ring, yet the Administration seems to want the student to pay an additional $2.10 to be entitled to a ring purchased this year. The Administration, as we have tried to make clear in our past editorial, has always been open to all student organizations to either utilize or bypass. The newly passed bill simply stated that financial arrangements will now be handled by the Purchasing Office of the Col­lege. Negotiations regarding the individual class design will, as in the past, be totally deter­mined by the classes them­selves. It seems erroneous to state that the Class of 1968 de­signed their entire ring since two-thirds of the ring has to con­quer with Student Congress specifications. These specifica­tions insure that the finished product will be recognized as the College ring and not merely as a class ring.

As a result of the Administra­tion's grabbing for power the Class of 1970 was presented last week with a contract which will represent a saving of between $5 to $10 per ring in most cases. This includes all service and handling charges. This saving will be realized by the individual student, not merely by a class treasury. Some of the more prominent features of the contract of the Class of 1970 were these:

1. On most base ring prices the student will be able to save a saving of at least $2, or more.

2. Members of the Class of 1969 can save $8.00 extra for a heavier and more desirable synthetic sapphire stones, both blue and yellow, at the Class of 1970 will pay $2.10.

3. Members of the Class of 1969 enjoy the same variety of choice that the Class of 1969 enjoyed. The Class of 1970 will be able to choose either yellow or white gold. The student can prefer it instead of the more common green gold.

4. As in the past, refurbish­ings and replacement of damaged stones will be provided free of charge to the student until graduation.

The Class of 1970 will also have the security of knowing that a ring repair or ring re­placement at any time after graduation can be accomplished merely by contacting the Book­store.

Sincerely,
Ronald E. Reinsfelder
Ring Chairman, Class of 1970

Standardization

Editor:

I am writing to express concern over the proposed "standardization" of the Providence College ring. As a member of the 1969 Ring Com­mittee I have had access to facts that most, not having been available to those considering the bill proposed to the Student Congress, do not exist. At the recent meeting of the Committee, I presented to the committee the data regarding the cost of the ring situation to a large ad­vantage and the Club Football association has handled large amounts of money with little or no problem and there is no reason to suppose that the future classes cannot be expected to pay the same. It seems to display a lack of faith in the students by both the ad­ministration and the Student Congress.

Sincerely,

John F. Sherlock

Father Haas Delivers Speech: ‘The Effrontery of Chance’

At the November 7 meeting of the Philosophy Club, the Rev. William P. Haas, O.P., president of Providence College, addressed the club on “The Effrontery of Chance.”

Fr. Haas, a former professor of philosophy, reviewed the philosophical aspects of chance and chance occurrences in his speech. In beginning his discussion, Fr. Haas dealt with the four main approaches in any consideration of chance: determinism, nominalism, pragmatism, and realism.

“The determinist admits of a basic order and consistency to the world.” In this approach the temptation is to say that reality is absolutely determined, and therefore variability does not exist in the world.

The nominalist admits the objective reality of chance, but only here and now. Fr. Haas classifies most contemporary philosophies as forms of nominalism. While agreeing that there is no real structural continuity in nature, the nominalist cannot entertain any real theories on chance since chance only exists in time present.

The pragmatist approach accepts the concepts of law and order in the universe to the extent that they produce affirmative results. A pragmatist will agree to hypotheses on laws and exceptions to these laws because he can make them work.

Realism considers both law and chance as realities of the external world. According to Fr. Haas, “the realist sees nature as a regulated system in which things can happen which are chance occurrences, whether the mind recognizes them or not.” Nature appears to be at “cross purposes” with itself in the sense that some laws of nature operate against each other.

Turning to the phenomenology of chance, Fr. Haas observes two dominant views on the role which man plays in chance occurrences. The first view places man as an observer within the drama of the world itself. Man, being the subject of chance, has determined the probable solutions to problems of chance. The second view on the phenomenology of chance is that of man as the disturbing factor in the order of the universe. Man, a part of the haphazardness of the world, can move freely within the universe, even when he is in error. He is constantly in the midst of disorder and thus experiences it from within.

In a sense, “man is rocking the boat all the time by the very mind with which he is trying to observe haphazardness.”

One problem encountered in dealing with chance is the theory of evolution. The absolute determinist claims that every process and law of nature should be reversible. To illustrate this point, Fr. Haas uses the example of confined gas. Pressure applied to the gas produces an increase in heat, while an increase in temperature likewise results in a greater gas pressure.

Evolution on the other hand is a “un-directional procedure,” in that if it progresses forward but cannot go backward. Chance forces the evolutionary process in the forward direction which it takes.

The Cowl Advertisement Draws Attention of Mr. Newton

An advertisement appeared in last week’s Cowl which began “Send your dollar now.”

The one column by one inch ad has raised a furor in official circles as well as among the grapevine.

It has been termed a “hoax” by the Office of Student Affairs, a fraud by some, a joke by others.

The origin of the ad is as mysterious to the Cowl as it is to the rest of the College. It appeared under the door of the Cowl office Friday morning, well in advance of the advertising deadline. Attached was a request to bill the ad to the box number to which dollars were to be sent.

The Cowl felt the ad innocuous and, considering the small charge involved, $1.35, a reasonable business risk. As yet the bill has not been sent; however, Business Manager Francis Flaherty feels that the bill will be paid.

A check of the Friars Station Post Office revealed that the post office box was issued to a student at PC by that name.

Library Fire . . .

(Continued from Page 1) a full complement of 11 pieces of apparatus reported to the 1:02 p.m. alarm.

To prevent recurrences of Sunday’s fire, the basement of the construction site will be boarded up to prevent unauthorized entry.

The fire raised the question of security guards at the library site. Fr. Thomas Fallon, O.P., said that the Colbert campus security guards cannot provide the protection necessary because the personal injury insurance policy which covers the men would not apply to the construction area. It was hoped that Dimeo Construction Co. could obtain the necessary guards since they customarily have a force of men to protect construction at most of their jobs.

In concluding his speech, Fr. Haas touched briefly on the philosophy of history. He calls history “a human fabrication.” Thus man is a central part of history and its imbalance. It is the “disturbing, chanceing mind” contained within history, which makes that history a living thing.
C. I. A. Demonstrations . . .
(Continued from Page 1)
In this demonstration, questioned the inter­viewer as to whether this was the function of the CIA, or if it was not, in fact, involved in "many subversive activities from mere intelligence work." He stated the morality of these things was "at least questionable," and wondered if a person interested in working for the CIA should not at least know what the whole purpose of the organization and its basic methods were.

The interviewer answered that this was an irrelevant topic, un­related to working for the CIA. Mr. Keane reiterated his interest in working for the CIA and work for it. "If you are scandalized by the methods of the CIA," he told Mr. Keane, who was wondering about actual involvement, for example the Bay of Pigs or Guiana."

The interviewer replied that he was working about actual involvement, for example the Bay of Pigs or Guiana." The recruiter answered that he was not interested in working for the CIA. Mr. Keane repeated that he did not know, and would not discuss such matters anyway.

After the meeting Mr. Borges stated that he felt he better understood "why students of other schools had actually for­cibly prevented CIA interview­ers from conducting interviews on their campuses."

"The recruiter's presentation of half the facts about the CIA, leaving out one of its most im­portant functions, makes these interviewers a perversion of the truth," continued Mr. Borges. "The function of the CIA as a subverter of all communist gov­ernments and supporter of all pro-American governments, dem­ocratie or despotic, is one which cannot be ignored when consid­ering a job with this organiza­tion, yet the interviewer re­fused to touch on this topic. If one of the main goals of an or­ganization is to support, by things like terrorism and bribes, the continuance of such despotic regimes as those of Marshall Ry and Franco, then any prospective employee of this organization should be aware of this. Therefore, I would be forced to oppose any future CIA interviews on this campus unless these topics are discussed."

The recruiter, a Mr. Russell, arrived three hours late, miss­ing appointments for private in­terviews from 10:00 a.m. until the afternoon sessions began at 1 p.m. Mr. Raymond Thibeault of the PC Placement Office, told the Cowl that Russell simply "forgot" that he was scheduled at PC Thursday, and that he thought he was to be here Fri­day. All indications are that Russell's being late was simply an honest mistake, not an at­tempt to avoid confrontation with the demonstrators.

According to Mr. Thibeault, when Mr. Russell first saw the members of the PCSP, he ex­claimed, "Oh, another one of those days." This apparently was a reference to the previous day's incidents at Southern Mas­sachusetts Technological Insti­tute where anti-CIA demonstra­tors nearly erupted into a seri­ous disorder.

A small counter-demonstra­tion was conducted in Harkins foyer across from where the PCSP members were gathered. A PC junior, Ismael J. Torres, showed his disagreement with the protectors and displayed a sign calling for the CIA's "HELP" in fighting commu­nism.

Torres, author of a letter against the PCSP which ap­peared in the Cowl November 2, is a former resident of Cuba and claims a very personal knowledge of the evils of com­munist rule. Torres said he was not op­posed to the members of the PCSP personally, but he wanted to express to them his disagree­ment with their stand. He said the PCSP are "not aware that they are aiding the commu­nists." He did not feel that the PCSP were "coconscious" in behalf of the communists.

Mr. Russell declined comment­ing for the Cowl. He said, "We really don't want the pub­licity, or need it." He ap­peared nonchalant and almost bored by the demonstrators.

Modern city government is far different from "the old days." Now the trained, creative administrator is in high demand, to meet intricate, fast-changing problems. In New York City, these may be on a scale larger than in many entire countries. Newest information, planning systems and management methods are being used more and more intensively.

In few training positions you can take on responsibility in actual work problems and acquire so much direct ex­perience that, ... learn so much about your field . . . meet and work with so many distinguished people. The object of the program is to bring top talent into city government. That's why it offers you a clear path to rapid advancement, and a solid future, that are hard to equal.

Openings will be in these categories:
City Planning • Urban Renewal Management Analysis • Methods Analysis Personnel Administration
Starting salaries $6,500; substantial increase and promo­tion after one year to as much as $8,200. Rapid advancement is possible — modern, sophisticated city management is a booming field. Many benefits; 4 weeks annual. New York offers unmatched edu­cational, cultural and recreational resources.

Please send coupon or call for brochure which gives more information on these exceptional opportunities.
Ring Committee
Announces Prices

The price list for the Class of 1970 ring was announced Monday by the Sophomore Ring Committee.

The price for the ring are as follows: (All the following prices are for a standard 10K yellow, white, or white gold ring).

- 17 dwt. with open back or plastic back and genuine black onyx stone: $44.10; with AAA synthetic black spinel or black sapphire stone: $46.20.
- 19 dwt. with gold closed back and genuine black onyx stone: $47.25; with AAA synthetic black spinel or black sapphire stone: $49.35.
- 21 dwt. with gold closed back and genuine black onyx stone: $50.40; with AAA synthetic black spinel or black sapphire stone: $52.50.
- 23 dwt. with gold closed back and genuine black onyx stone: $51.45; with AAA synthetic black spinel or black sapphire stone: $53.50.

All prices include the 5% Rhode Island State Tax and the service charge.

Ronald Reinfelder, Chairman of the Committee, said that the 23 dwt. ring with gold closed back and an AAA synthetic black spinel or black sapphire stone is the most commonly purchased ring.

He also stated that the prices as a whole reflected a savings of $5-$10 over last year's ring. The cause of this, he believes, is that the class of '69 paid more for extras on its ring.

Other terms of the contract, which was awarded to Jostens of Attleboro, include: no extra charge for Miraculous Medal, no charge for replacing stones or re-sizing while purchaser is an undergraduate, and the prices include two initials and last name engraved inside the ring. Also, additional weights are available at $1.00 per dwt. and 14K gold is 25% extra.

Disciplinary Board . . .

(Continued from Page 1) gressed, Fr. Murphy's arguments lost substance as Mr. Montague answered the objections to the proposal.

In his closing remarks, Fr. Murphy emphasized the fact that he was trying to save the student body from an extra "burden" that would result from the responsibility of "consideration of such delicate matters."

Montague pointed out that the students were asking that the burden be placed on them. His statement was given substance Monday night when the Student Congress voted almost unanimously to support the proposal. The one dissenting vote in favor of the proposal came from a rather irate parent.

The one dissenting vote in the Congress was by Frank Esposito, Dillon Club President, and a member of the Student Administration Board. He had made some minor objections to the proposal in the course of his discussion last Thursday night. His objections, involving the wording of the clause regarding giving students the alternative of not having pens on the Board, were dismissed by Montague.

Letters . . .

(Continued from Page 7) article on the Providence College Counseling Center. We feel that your observations are, for the most part, accurate and responsible. Hopefully the Counseling Center shall be able to expand its services next year and thus encompass many of the suggestions you propose.

One point we would like to mention is the editorial remark about selling the Counseling Center to the students. Last September, each student who had been placed on academic probation by The Dean's office, received a letter from the Counseling Center. We offered to discuss the academic situation and try to work towards bettering that situation. Of the approximate one hundred and fifty (250) letters sent out, only one student replied by coming to the Counseling Center.

Secondly, the Counseling Center sent approximately fourteen hundred (1400) letters to the legal residents of Rhode Island informing them of the affiliation between the Division of Vocational Rehabilitation and the Counseling Center. This "publicity campaign" brought one response: I might add it was from a rather irate parent! Hopefully, your article and subsequent coverage will bring the Counseling Center facilities to the attention of the Student Body.

Edward C. Brennan
Director

Counseling Center.

Some say we specialize in power . . . power for propulsion . . . power for auxiliary systems . . . power for aircraft, missiles and space vehicles . . . power for marine and industrial applications . . .

Pratt & Whitney Aircraft
CONNECTICUT OPERATIONS EAST HARTFORD, CONNECTICUT

...they're right.
And wrong.

It might be said, instead, that we specialize in people, for we believe that people are a most important reason for our company's success. We act on that belief.

We select our engineers and scientists carefully. Motivate them well. Give them the equipment and facilities only a leader can provide. Offer them company-paid, graduate-education opportunities. Encourage them to push into fields that have not been explored before. Keep them reaching for a little bit more responsibility than they can manage. Reward them well when they do manage it.

You could be one of the reasons for Pratt & Whitney Aircraft's success . . . if you have a B.S., M.S. or Ph.D. in:

• MECHANICAL • AERONAUTICAL • ELECTRICAL
• CHEMICAL • CIVIL • MARINE • INDUSTRIAL
• ENGINEERING • PHYSICS • CHEMISTRY • METALLURGY
• CERAMICS • MATHEMATICS • STATISTICS
• COMPUTER SCIENCE • ENGINEERING SCIENCE
• ENGINEERING MECHANICS.

And we could be the big reason for your success. Consult your college placement officer—or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.
Interview with John Champeau

Q. John, where did the original idea for club football come from?
A. The first concept of this program began in my sophomore year. A bunch of us approached the subject among ourselves and we approached the athletic department. They said that it would never go so we dropped the idea. However, the ensuing summer, Ed Dunbar and I decided that something ought to be done about the void in Fall sports. We thought that football would fill this void admirably so we set out on a little program of our own to find out if other schools established Fall sports. We thought that this void existed and we were willing to work for this cause.

Q. What was your next step?
A. During the summer, as I said, we contacted various schools to see how we would go about establishing the program. We realized that we had to raise in the vicinity of $10,000 in order to get going. What we did was find out the support we had in the student body. We set a table in Alumni and Raymond Hall just to see how many students would support us, by this I mean work for us. In these two days we signed 250 students who were willing to work for this cause.

Q. How about finances for next season?
A. At the end of this year we should have enough to be able to start with. We will have to raise more money year to year—every football program such as this has to. We have to raise $8,000.

Q. Was there any provision made for the football program with the assumption that if it is needed funds to continue for the next year?
A. We have run into difficulties Father Haas would have had to have backed us but we have tried to put it outside first before going to the administration.

Q. Earlier you mentioned a $10,000 figure as necessary to field a team. Is this what it took P.C.?
A. We started with the idea of $10,000 but we found that when equipment and all the essentials were bought that we spent closer to the neighborhood of $15,000. I might add that Steve Croom and Joe Montecello did a tremendous job. The financial success of the club rests on their shoulders.

Q. Turning to the fine coaching staff, how did you acquire Dick Lynch and Chet Hanewith?
A. Well it was a matter of chance. We were seeking coaches and we received some very promising replies. We wanted them, if possible, from the local area. Pete Louthis, a friend of Mr. Lynch, told us that Dick might be interested in coaching for P.C. I contacted Mr. Lynch and after seeing the organization he decided that he would come. Mr. Lynch also brought Chet Hanewith along with him. Speaking for the team, I must say that we feel bad that we couldn’t have done as well as we thought we could. We wanted a winning season for them. We didn’t think a 33 season was good enough. They taught us how to play football and good football at that.

Q. If you could do it over again, any planning for next season?
A. We started planning for next year right after the New Haven game. We are lucky to have a man such as Father Dreschel who will add the professional touch to all our endeavors, and a new slate of officers who will be announced shortly and will carry on what many feel will be tradition. As of now, we are planning a seven game schedule, four home and three away. Our first game is scheduled for the fifth of October and is away. We then return home for the next two weeks. The schedule should be announced within the next three weeks, at the same time as the announcement of new officers.

Q. How are you approaching the fine football students on this year’s squad? Iors on this years squad?
A. Sometime next week or the week after, this years graduating seniors will be examining recruiting tables in Alumni Hall and Raymond Hall. At this time we will speak to all intended prospects, and have them fill out a registration form. We hope to have a good response from all the underclassmen. As you know, there are upwards of 16 spots available due to graduation. I feel that there is a lot of talent in this school that has not made itself known, especially from among the day students. I understand that there are many talented local ball players enrolled at the college, and we’d like to see them out for spring practice.

TRW is success by association

In the fast moving Computer Sciences, from Los Angeles to Houston to Washington, young people are making things happen at TRW.

If you look around at any TRW location, you'll see far more young faces than old. This is particularly true in the computer sciences. Why? Because we depend on new ideas and fresh viewpoints to apply fast changing computer techniques to a fast changing industry. That's why we need people like you.

What kind of a place is TRW? Ask around. Talk to your professors or faculty advisors, or to your friends who are already working with TRW. Most of our professional employees applied to TRW on the recommendation of friends.

Interested? Check with your Placement Director and talk with us while we're on campus. If you can't make it then and would like to be considered for openings in the Los Angeles area, Houston or Washington, send your resume to: W. D. Mclvers, College Relations, TRW, One Space Park, Redondo Beach, California 90278.

missions, to propose policies of departmental organization and to propose policies for the college library, to recommend guidelines for faculty benefits, to set up a board of appeals to hear faculty grievances, and to have representation on the Committee on Administration.

Steps leading up to the faculty senate were initiated by the administration last fall. "It is our philosophy that the various elements of Providence College should communicate and cooperate in its government. We saw good existing channels for student opinion, but a channel for faculty opinion seemed to be missing," Father Haas said.

Soon afterwards the Providence College chapter of the A.A.U.P. in a communication to Fr. Haas endorsed the idea of a faculty senate at P.C.

Last November the faculty elected a committee of fourteen to write a faculty senate constitution. Eight of the Committee members were lay professors and six were Dominican priests.

The committee's members were: Dr. J. J. Hanley, Mr. J. R. King, Mr. R. L. Deasy, Dr. Mario DiNunzio, Dr. Z. V. Friedemar, Mr. R. T. Carmody, Dr. R. K. Belemea, Dr. R. E. Portin, Dr. F. F. Thomas, Fr. E. B. Halton, Fr. C. F. Duffy, Fr. J. F. Counthrenham, Fr. T. U. Mullaney, Fr. G. A. Vanderhaar, Fr. J. L. Lennon. Both Fr. Lennon and Dr. Thomson were non-voting advisory members appointed by the administration.

In preparing its document the committee studied faculty governing bodies at 15 institutions throughout the country. State and private schools as well as private church related schools were included in the survey.

They deliberated for six months and came up with a constitution which was presented to the faculty and the A.A.U.P. for approval.

After extensive discussion both the chapter and the faculty endorsed it as written.

If you look around at any TRW location, you'll see far more young faces than old. This is particularly true in the computer sciences. Why? Because we depend on new ideas and fresh viewpoints to apply fast changing computer techniques to a fast changing industry. That's why we need people like you.

What kind of a place is TRW? Ask around. Talk to your professors or faculty advisors, or to your friends who are already working with TRW. Most of our professional employees applied to TRW on the recommendation of friends.

At TRW Systems Computation and Data Reduction Center—Incidentally, one of the world's most advanced computer centers—we provide scientific and business programming support for mechanical disciplines.

If you'll be receiving your degree (Ph.D., MS or BS) in Engineering, Mathematics, Physics or Chemistry this year, consider joining a group of computer professionals who are developing computer applications in the following disciplines:

TRW CAMPUS INTERVIEWS

NOVEMBER 28th

SEE YOUR PLACEMENT OFFICE

Bach Festival
Harkins Hall
7 p.m. Nov. 17
IN AN ELECTION last spring, Donnie Henderson and Tony Koski were chosen as co-captains of Providence College basketball squad. With the season drawing near, both have already sustained injuries that could have affected their future in high school. Hard work and determination, however, earned him a starting center position on the Providence College basketball squad. To the upperclassmen of the Providence College team, the purchase of tickets is a necessary step for the team to continue to stay with him, even though he had a year layoff last season. Jerry is looking forward to his junior year, sees the making of a great team. "If a team allows me to be the center, I am confident that the support of the squad, the number of seats available for the home games, and the number of games to be played in the Providence College Friars. This problem has plagued every effort due to the fact that Alumni Hall can only hold so many people.

Tickets will go on sale for the Villanova game which will be played at Alumni Hall on Saturday, December 2nd this coming Monday and Tuesday, the 20th and 21st of November, at a specific time to be announced via the School bulletin boards across the campus. To the upperclassmen who are experienced in ticket purchasing, I wish you success. For the freshmen who are about to be in the doors, I will suggest that you try to remain undaunted after your initial attempt to obtain a ticket to a home basketball game of the Providence College Friars.

SPORTS 'N STUFF—The Student Congress will sponsor a Sports Week immediately following the Thanksgiving vacation. Cash prizes for the winners of a banner contest, a rally featuring both the Providence College and the Robert Morris University teams will be held, and a smoker (free admission and refreshments) will offer game films on the performance of the Friars in the Holiday Festival and CIT tournaments of the 1966-67 season.
Friars Edged by Fairfield In Hard Fought Contest

The Stags of Fairfield University parlayed a tough, hustling defense with an opportunistic offense as they won 17-7 in the 1967 season opener.

In losing their third game of the season, the Friars were outplayed and outscored both on offense and defense. The Stags scored the first four touchdowns of the game.

Joe Thies, former Friar halfback, scored the first touchdown for the Stags. He was tackled for a loss of yardage on the third play of the game.

George McMahon, one of the defensive mainstays for the Friars in their final game of the season, hits Fairfield halfback Joe Devaney with a jarring tackle in their final game.

Paul Iacono's

AS I SEE IT

Coming into the homestretch of the college football season, it is not likely that any college football team's record would be a reflection of its national position. A healthy margin of victory is not likely, but a win in the Big Eight, the Big Ten, or the Southeastern Conference would go a long way towards making the team a national factor. A healthy margin of victory would be the best that any team could ask for in a conference game.

UCCLA vs. Southern California: The Army-Navy game of the West. All the marbles are at stake... the conference crown and a Rose Bowl bid and possibly the national championship. Army will be looking for payback against the Sooners of Oklahoma.

Tennessee vs. Mississippi: National championship is a possibility for the Volunteers. Tennessee has been hitting its stride under Coach Ray Perkins. The Volunteers have been playing defense to perfection.

Purdue vs. Michigan State: Purdue is hot, State is still thinking about last year. The Boilermakers should win in a walk.

Indiana vs. Minnesota: Rose Bowl bid to the winner. If Indiana wins the rest of their games... national championship. They will be in the Rose Bowl though.

Wyoming vs. University of Texas of El Paso: Undefeated season will come this Saturday for Wyoming. They are a tough team with great depth.

Oklahoma vs. Kansas: Big strong defense will lead the Sooners to the Big Eight title and an Orange Bowl bid.

Georgia Tech vs. Georgia: Another run-away for the Irish. They are too strong and have too much depth for most college teams. Even with two losses, ND is still the best team in the nation.

Notre Dame: Texas vs. TCU: Bradley and Gilbert will lead the Longhorns to their seventh in a row. They are one of the top two bowl candidates.

Alabama vs. South Carolina: Bama will move past SC into the Orange Bowl where they will play Oklahoma. This is just a fast stop for a warm up game.

Army vs. Pittsburgh: URI over Connecticut; Harvard over Brown; Yale over Princeton; Arkansas over SMU; Florida over Kentucky; Auburn over Georgia; Penn State over Ohio University; Oregon State over University of Oregon; Syracuse over Boston College.

PHIL ROBERT="Cowl" Player of the Week. Swiss-born, Jim has been one of the top players in the Big Ten this year. He is a "hard-nosed" hustler, and possesses an excellent shot. He is a team leader and a key player for the Irish in their quest for a Rose Bowl bid.

PHIL ROBERT="Cowl" Player of the Week. Swiss-born, Jim has been one of the top players in the Big Ten this year. He is a "hard-nosed" hustler, and possesses an excellent shot. He is a team leader and a key player for the Irish in their quest for a Rose Bowl bid.

Umile, Zifcak - Named Hockey Co-Captains

The Providence College Hockey Co-Captains are Jerry Zifcak and Jim Umile. Both of these players are excellent leaders and have earned their stripes as co-captains for the Friars this season. Jerry Zifcak is the leading scorer for the Friars, while Jim Umile is the second leading scorer. Both of these players are crucial to the Friars' success this season.

Jerry Zifcak was born in Melrose, Mass., on October 21, 1948. He began playing hockey when he was six years old. In his senior year, he was named MVP in the state championships. Zifcak has played in several tournaments and has been a member of the United States National Team. He is a fast skater and has excellent shot skills.

Jim Umile was born in Melrose, Mass., on October 21, 1948. He began playing hockey when he was six years old. In his senior year, he was named MVP in the state championships. Umile has played in several tournaments and has been a member of the United States National Team. He is a fast skater and has excellent shot skills.

Both Zifcak and Umile are also known for their leadership abilities. They are strong team players and always look to have fun on the ice. Both players are respected by their teammates and are known for their ability to make quick decisions on the ice.

With Zifcak and Umile leading the Friars, it is clear that the Friars have a strong team. They are a team that is built on hard work and dedication, and they are always looking to improve. With the season coming to an end, the Friars are looking to finish strong and make a run for the national championship.

The Friars have a tough schedule ahead of them, but they are up to the challenge. They are a team that is always looking to improve and they are always looking to make their fans proud. With Zifcak and Umile leading the way, the Friars are looking to make a run for the national championship and bring home a title for the Friar faithful.
