The Rev. John F. Cunningham, O.P., Director of Residence, has announced that the removal of curfews for senior residents, effective on an experimen-
tation basis since October of the past year, has become a permanent regulation as of De-
ember 1, 1967.

Father Cunningham reports that the rule will be entered in the Book of Disciplinary Regulations for Resident Students for the 1968-
69 academic year, providing there are no subsequent major abuses of the privilege.

Father Cunningham has also mentioned the possibility of recommendations for relaxing, if the curfews seem to be working for the sophomore and junior classes. No decision is anticipated on these proposals, however, until the next academic year. Existing freshmen curfews of 3:00 p.m. on weekdays and 12:00 p.m. on weekends are expected to re-
main in effect.

Several other recommendations have been drawn up by the Committee on Resident Student Life. The committee, composed of members of both the faculty and the student body, has been reviewing the Book of Discipli-

nary Regulations in view of numer-
ous legal briefs and state laws concerned with the authority of schools in matters of discipline.

The most extensive study by the committee thus far has concerned the philosophy of resident student life. Controversy has centered around the committee's attitude toward the "in loco parentis" theory of author-
ity over students.

The committee will also con-
sider updating the rules in other areas, with the possibility of some regulations being added as well as others being re-
moved. Recommendations drawn up by the committee will be submit-
ted for consideration in a re-
port to President William P. Haas, O.P., at a later date.

Vista Program Hailed Important Plan of Attack in Poverty War

"To help people help them-
selves." The words are those of Cynthia Nicas, a VISTA repre-
sentative visiting the College this week. Vista, the abbreviated name of the Volunteers in Service to America, is a call for young Americans to become involved. It is a plan of attack in the War on Poverty.

Areas of poverty and racial discrimination have greatly benefited from the program. According to Cynthia, the best results have been realized in the north-
ern cities because of good co-
operation and social pressures that have rendered the program somewhat less successful in the South. However, progress is still evident.

Cynthia Nicas, VISTA Representative, explains the program to Dave Byrne.

Vistas participate in a six-
week orientation program which prepares them for a year of service in poverty areas throughout America.

With the exception of Missis-
sippi, because of the tense ra-
cial situation, Vista is active in all the states and both Puerto Rico and the Virgin Islands.

The text of the committee's report describing the proposed Committee on student publications will be affect the COWL's past record." I think the committee on publi-
cations can do little to improve the welfare of their publications, that they have had too small a part in the pre-
paring of the proposal.

The editors object also that the committee preparing the proposal would in effect usurp the major function of the editorial boards in controlling editorial policies. COWL Editor Gerald Feeley said, "With few exceptions, the COWL has in the past exercised maturity and moderation in its editorial policies; there is no reason to think that the COWL should succeed in maintaining its high standards in the future. I think the committee on publi-
cations can do little to improve upon the COWL's past record."

The freshmen officers who will be in charge of the Student Congress when they meet Monday night, and the board which will be in opera-
tion, they must attend one meeting each month. The board will con-
tinue to meet as long as it is needed. It will be formal-
ly sworn in at the next Student Congress meeting, which is scheduled for Monday night.

At this meeting also, Mr. Ed-
wards, president of the board, re-
ported that he had requested ballots for par-
ticipation in Time Magazine's Choice '68 pri-
macy conducted on college cam-
puses.

Time Magazine has notified the Cowl that all of the schools which are participating in the Choice '68 campaign will be sup-
plied with information concern-
ing the views and the activities of all the candidates. The Cowl intends to make a sincere effort to make sure that Providence College students are aware of this campaign.

A bill presented by Mr. Pagli-
eri to a letter to a Mr. Mur-
phy accomplished a proposal for what this company is doing for what.
The purpose of the demonstration, according to a priest, was to give
the views and the activities of all the candidates. The Cowl intends to make a sincere effort to make sure that Providence College students are aware of this campaign.

The Providence College Stu-
dents for Peace staged their second meeting of the spring, this time against Dow Chemical Company, on Wednesday, December 13.

About twenty to thirty stu-
dents attended the meeting, which was set up in Hurri-
Hall rotunda.

Debating team held its inter-
views in Raymond Hall Snack bar from 10 a.m. to 6 p.m. on December 10, and some of the pickets did congre-
gate in the area outside.

The purpose of the demon-
stration, according to a priest, was to give
the views and the activities of all the candidates. The Cowl intends to make a sincere effort to make sure that Providence College students are aware of this campaign.

The pamphlet which was issued to the students who were present in Alumni Hall yesterday, said that the demonstration was simply to clarify the proposal and explain its function.

A bill presented by Mr. Pagli-
eri to a letter to a Mr. Mur-
phy accomplished a proposal for what this company is doing for what.
The purpose of the demonstration, according to a priest, was to give
the views and the activities of all the candidates. The Cowl intends to make a sincere effort to make sure that Providence College students are aware of this campaign.

Closely Watched Trains was directed by the twenty-nine-year-old Czech, Jiri Menzel, and de-
picts a sexually-afraid young man who lives in a small Czech town during World War II. He is caught up in the railway system and this is the big move of his life. His mother dressed him in one big day. His fellow student attendant is one of the workers in the Cinema, quite the accomplished lover, and a patriot. In no time the young hero met a nice girl who was quite ready but the poor boy was just unable to even kiss the girl. After this sad affair he gave up the whole and nearly committed sui-
cide. He finally gets enough courage to ask his co-worker for a bit of help and the other in his class offers it. The film was done in black and white but this fact is more than made up for by the quality of the photography.

The film managed to capture with great success the peculiar quality of the winter of 1944 on the eastern front, by means of minor characters, especially the Reich appointed mayor of the small town, and any "Closely watched trains" were the mun-
ition-carrying trains on the way to the front and provided a means of development for the story. The film is about petrolisation which supported the main theme of the slow-but-sure movement to maturity on the part of the young hero.

In all Closely Watched Trains is a brilliant mixture of comedy and pathos.
1968: ITS CAUSE AND CURE

Are you a sophomore, "68" on your papers and letters? I'll bet you are, you scamp! But I am not one to be harsh; I'll bet you are. Mr. Arthur later came to regret his hasty action. He wished he hadn't of repealed 1874. Whereupon the French emperor made his immortal rejoiner, "Tui que nous et tyfeas." Well, sir, they had many a good laugh about that, today.

I'll bet you are, you scamp! But I am not one to be harsh.

Arthur came Salmon P. Chase. Millard Fillmore's son went into office. His father, a Democrat, had already accepted a bid to become Mad Ludwig of Bavaria. Van Buren's son, Walter "Blinky" Van Buren, was at one time secretary of the Treasury. And if I seem a bit excessive in my admiration of the young man, it is only because we must remember that the philosophy behind them are one target of the student power movement, and some changes can be attributed to this part of the students. But others have come only by force of circumstances, in recognition of the temper of the times.

Debate over open houses and open doors is nothing new; it has been going on for many years. But I digress. How can we remember to write 1968 on our checks, our letters, and our calendars? How can we remember to write 1968 on our checks, our letters, and our calendars?

Not, mind you, that it is any chore for me to sing the praises of the young people of this day and age. It is a pleasure to me to sing the praises of the young people of this day and age. But I digress. How can we remember to write 1968 on our checks, our letters, and our calendars? How can we remember to write 1968 on our checks, our letters, and our calendars?

According to Mr. Raymond Thibault, Placement Director at Personna, "The Ys-C Student locker has more job offers than the average person today, takes a pen, and tries. A Salary Survey conducted by the Placement Council indicates that the number of liberal arts and non-technical students has also dropped, but only slightly.

"If we've judged mature enough to be permitted ten percent more than we do now, then we should be allowed this freedom to entertain guests with the doors open. Of course, the privacy afforded by an open door surely must be as well as in the doors.

As Texas Technological University, students lock the doors to the courts to fight a rule requiring them to live on campus. The students were denied permission to register this fall because they were not residents in campus housing, the University Daily reported. They filed as in-relation against the university, claiming financial inability to live dormitories.

And after weeks of arbitrating an appeals system established to consider such cases and grant permission to live off campus, many were denied.

"Much more is involved," the Daily commented, "than the right of students to live off campus this fall, as both sides stress. It is one of nation-wide precedence and importance, affecting apart- ment owners, school administrators, and bond holders in all cities with college or university campus.

School administrations are not only for pecuniary reasons, but because the entire in loco parents philosophy is founded on the idea that the university campus may well overlap into other areas involving university regulations of the private life of a student.

Changes in rules regarding alcoholic beverages are perhaps less frequent than in other social regulations. Carleton College, Northfield, Minn., recently liberalized its rules about open houses and open doors. It now permits students who are of legal age to bring guests to open houses. The extension was not greeted with enthusiasm by the faculty, however. "That will get us into some serious trouble," said one of the professors.

Not, mind you, that it is any chore for me to sing the praises of the young people of this day and age. But I digress. How can we remember to write 1968 on our checks, our letters, and our calendars? How can we remember to write 1968 on our checks, our letters, and our calendars?

**After Hours**

Recently we of the Cowl received a release from the Committee on Resident Student Life announcing the removal of curfews for senior resident students as a permanent regulation. This administrative dictate did not come as a shock to those familiar with the College Community. Many people connected with the College were well aware of the fact that the elimination of Senior curfews has been a topic of considerable debate and successful experimentation. The relaxation of curfews for seniors has been attempted twice during the first semester and the results of this experiment testify to the prudence and maturity of the senior resident students.

This curfew relaxation, along with the statement by Father Cunningham in which he mentioned the possibility of recommendations for the adjustment, if not termination of curfews for sophomores and juniors, must be considered a significant departure from the strict adherence to the "in loco parents" concept which previously restricted our residence regulations. The "in loco parents" principle dictates that an educational endeavor cannot provide resident facilities must act "in place of parents." In the departure from this archaic system Father Cunningham said: "What is being rejected, precisely, is the type of paternalism that encourages and perpetuates immaturity, stifles initiative, and impedes the growth of a healthy critical spirit." We agree with you wholeheartedly Father. Maturity can only be fostered in an atmosphere of self-discipline. The absolute direction and control of students by an institution can only serve to impede their psychological and social growth.

Father Cunningham also announced that the regulations presently governing freshman curfews would change in impact. Although freshman regulations present somewhat of a more complex problem, it seems as though some concession could be made here also. We understand that our first year in college is a time of great transition. The much freedom at this time could very well prove hazardous. But if we were to extend the freshman weekend curfew until 1 A.M. during the second semester, it would aid in the establishment of the freshmen's identity as members of the College Community and give them the opportunity to display their maturity.

At any rate, we wish to thank the Committee on resident student life for its efforts. Surely our students will prove that your toil has not been in vain. Relaxation of the stringent regulations governing resident students will give them the opportunity to display their maturity through prudent demonstration of responsibility.

---

**Editor's Note:** The following is a program of objections to the proposal for a Committee on Publications. Formulated by the editorial boards of the Veritas, Alembic and Cowl, it is intended to be both a critical evaluation and a statement of position.

1. The committee preparing the report does not contain students when its concern is student publications.

2. The board established should not have the responsibility for policies as this duty is already the major concern of the editorial board of each of the publications.

3. The composition of the board suggested in the report should contain students selected on the basis of sufficient knowledge and experience to deal adequately with the publications involved.

4. Concerning the Advisory Boards established by the report:
   a) In themselves, they are superfluous since advisory boards already exist in conjunction with the faculty moderators, publishing representatives, and the editorial boards of the publications.
   b) The report would place students lacking knowledge and experience in an advisory position.
   c) An editor would have no voice in controlling his own publication.
   d) Through delaying tactics established by the report, editors would loose effectiveness during the time they are in process.
   e) The choice of the succeeding editors should remain in the domain of the publication concerned.
   f) The staff and editor would have the best knowledge of the experience and ability of a proposed candidate.

(ii) the system established by the report would allow for the possibility of interference by campus politics in the selection of succeeding editors.

(iii) the individual publications normally set their own standards and requirements for the selection of editors.

f) Concerning the power of appointment and dismissal of the faculty moderator, this power is already vested with the President of the College.

5. The board established should not have the power to remove student editors or faculty moderators.

In the Bulletin of the A.A.U.P., Freedom and censorship of the College Press, an article entitled "Faculty Responsibility for the Academic Freedom of Students" states that:

1. Editors and managers of student publications should be selected democratically, on the basis (sic) of competence, and in accordance with established procedures.

2. Editors and managers should have independence of action during their term of office. They should be protected against suspensions for legal because of faculty, administrative, or public disapproval of editorial policy or content. Similarly, neither student control of the publication nor the powers of the student governing body should be used to limit editorial freedom. On the other hand, a student publication should open its pages to representation of diverse points of view.

3. Students should also be free to establish, publish, and distribute unsponsored publications without institutional interference.
Letters to the Editor

"Yellow Journalism"

Editor:
For some time now, I have been well aware that in war, people can get hurt, maimed, or killed. I feel quite sure that the same can be said of my fellow students. The PCSP advertisement re. napalm, I feel quite sure that it is a flagrant case of a form of yellow journalism, and all that it connotes.

War is either a moral or immoral form of human endeavor. If war is moral, then a particular war cannot be condemned on the grounds that it has the characteristics of war (such as suffering, maiming, or death). Only one thing can be drawn from the PCSP advertisement, and that is an age old truth — "War is hell." Edw. H. Cunningham, '70

Drug Reply

The COWL of December 14 published Michael Keane's clarification of his position on drugs, presented as a condemnation of the position which was presented by a panel on drugs of which I was a member. Mr. Keane had the following comments to offer about my presentation:

"But Dr. Johnson was surely not the most flagrantly 'non-understanding' member of the panel. Dr. DeMouy seemed to consider himself quite 'on top of' the drug phenomenon, as a result of his work in establishing a student panel on drugs at Holy Cross, where it may be fairly certainly said, the drug sub-culture is in its nascent stages, and the student body is assuredly not among the best informed on the topic. But it is interesting that the actual purpose for which this allegedly enlightened student group was founded was not, information, as was stated, but rather condemnation; the people the panel invited to represent the 'pro' side of the drug question were invited 'to make asses of themselves.' This would seem the typical open-mindedness of such groups."

A professor from Providence College who was not a member of the panel and is not a counselor, but who was present at the meeting, sent me the article. I have his complete agreement with his attached letter, which states that: "... the out-of-context quotations may misrepresent the intent of your statements." First of all, I never claimed to be 'on top of' the drug phenomenon; in fact, I introduced myself as the only non-expert on the panel. I don't know what voices Mr. Keane listens to when he attends a lecture. He surely did not listen to mine. I did not 'establish a student panel on drugs at Holy Cross.' I originated a Student Drug Inquiry Commission which — among other things — planned and held public lectures from January 15-31 concerning the drug phenomenon. They know "they are not among the best informed on the topic," and that their "mission" (quote) remains.

Second, whether the people invited to Holy Cross College to represent the "pro-side" of the drug question will make "asses of themselves" (I was also quoting) is completely up to themselves. One of the speakers is Mr. Keating, editor of Avatar. The middle pages of "Avatar" No. 13, contains nothing more than four four-letter words printed in huge letters. If that's what Mr. Keating stands for, I can not help but think that he might indeed be prone to make an ass out of himself. I would assume (to use his own vernacular) to insure communication on the same level) that all he stands for might be "———" — if not, he will get a chance to prove it. The very fact that the Drug Inquiry Commission on campus held public lectures for and by the students) tried to schedule Timothy Leary as one of the speakers seems to reflect the "typical open-mindedness of this group." As an alumnus of Holy Cross College, Dr. Leary agreed to do us a favor by asking only $200. The experts who are scheduled are not the only ones the Drug Inquiry Commission had in mind. Unfortunately, however, the drug "high-priests of the pro-camp" seem to be preoccupied with high honorariums. On the other hand, Dr. Graham Blaine, Jr., Dr. Leo J. Nealon, or the PCSP "high priests" would not participate without fee. These people seem to be interested in the "means" of their "mission." I completely agree that "drugs" are a very real thing. But claiming that marijuana is certainly superior to a six-pack of beer sounds as foolish to me as claiming that cutting your face up is a high honorarium. On the other hand, I would miss a great deal. I would miss the opportunity to feel pity for myself, and might indeed be prone to make an ass out of myself. I would certainly miss a great deal. I would miss all the meaningfulness I find around me, and I certainly would miss a great deal. I would miss all the meaningless nonsense I find around me."

(Continued on Page 9)

Administrative Proposal
For Committee on Publications

MAKEUP OF THE COMMITTEE: Six student representatives would have the controlling voice on the board. The students would be the editors-in-chief, or THE COWL, THE ALEMBIC, and THE VERITAS. Plus three other students chosen by the student congress. There would be five other voting members of the committee drawn from the faculty and administration and appointed by the president. They will be the moderators of the publications and the chairman. In addition, a professional consultant (perhaps an alumnus like Joe Ungaro) would be a non-voting member.

ADVISORY BOARD: Within the parent committee there would be three advisory boards—one for each publication. In effect, these would be sub-committees of the parent committee.

In the case of THE ALEMBIC AND VERITAS the advisory boards would consist of the editor and moderator of each publication plus an additional student for each board.

THE COWL ADVISORY BOARD would consist of the editor and moderator, a faculty or administration representative, one of the students chosen by the student congress, and a professional consultant.

ROLE OF ADVISORY BOARDS: As the name indicates these boards would be primarily concerned with the final production of the publications. The boards would meet regularly with their advisors in the publication.

Board members would have the power to read editorial matters before publication. The board could advise against publishing particular material. If the editor refused the advice the board could refer the matter to the parent committee on publications.

In the case of the COWL, the advisory board could do the publication of an editorial for one week as soon as the committee on publications ratifies what was done. The board should have the right to ratify any action taken by the parent committee.

After consultation with the student editorial boards, the advisory boards would recommend on the appointment of new student editors. This would be subject to ratification by the committee on publications.

ROLE AND POWERS OF THE COMMITTEE ON PUBLICATIONS: The committee would be called into session for the ratification of new student editors and to take up other matters referred to it by the advisory boards.

In addition to the powers of ratifying new editors the committee would have the power to recommend censure, suspension or removal of student editors. It would have the power to recommend removal of moderators.

FURTHER NOTES: Student editors would not have the right to produce columns of their own on their advisory boards but would have a vote on the parent committee.

New student publications that might be formed would be subject to the approval of the committee on publications. Board members would have the power to read editorial matters before publication. The board could advise against publishing particular material. If the editor refused the advice the board could refer the matter to the parent committee on publications.

FURTHER NOTES: Student editors would not have the right to produce columns of their own on their advisory boards but would have a vote on the parent committee.

New student publications that might be formed would be subject to the approval of the committee on publications.
Several Revisions Made
In Psychology Division

The Psychology Department of Providence College has announced plans for major changes in the curriculum which will take effect in the 1968-69 scholastic year.

In a COWL interview, Mr. Thomas Bosack, Chairman of the department, said that while the changes have not as yet been approved by the Committee on Studies, favorable action is expected.

Mr. Bosack termed the re-vamping of the Psychology curriculum as an effort "to provide the basic knowledge necessary in all other fields at the Department of Health, Education, and Welfare for a funding grant on a 50%-50% matching basis. If the College's application is approved, the department will offer next fall a four credit course in Physiological Psychology which will entail a three hour lab once a week. A construction of the new lab will also allow the department to offer a four credit course in "Schools in Experimental Child Psychology" with an accompanying three hour lab.

Another course to be offered this fall is entitled "Abnormal Child Psychology." This will deal with clinical problems in child development.

The department also plans a sequenced two subject course which will consist of two alternating courses in successive years. One will be a study in Advanced Statistics designed to prepare the student for graduate studies of research. The course to be offered in the alternate year will be entitled "Experimental Psychology." It will place "Mathematical Psychology." It will be a study in the mathematical theory of learning and perception.

Also, a course in construction of investigative tests (such as IQ tests) with special emphasis on the mathematical problems involved therein will be added to the department's curriculum.

Finally, a course in Clinical Psychology will be offered in the coming semester. It will provide the student with a combination of classroom instruction and practical training in state institutions, including involvement in actual cases.

As for the future, Mr. Bosack expressed hope for the Psychology Department's affiliation with a planned university-associate center for the mentally retarded. Upon completion of the institute, which will be named for the late Rhode Island Congressman John E. Fogarty, Mr. Bosack hopes that courses and training at the center will become an additional facet of the psychology curriculum.

Library Ahead of Schedule
Other Plans Being Readied

The Rev. Robert A. Morris, O.P., Vice-President for Development, reports that construction of the new library is running ahead of schedule.

As Father Morris explained, there are two construction schedules: the schedule stipulated in the contract with the builder and the actual progress schedule. According to the contract, completion of the library was set for January, 1969, but indications now are that building an exceptionally severe winter, completion of the building can be expected by October of 1968.

Present efforts of the construction workers are being concentrated on erecting the roof within the next month to assure a continuity of the work through the winter. Once the roof has been constructed, the workers will be able to push ahead with work under the protection of the roof regardless of the weather.

Initially, the library is expected to carry something over a hundred thousand volumes. Plans for spending one million dollars for the acquisition of new books during the upcoming years, the library should eventually house over 500,000 volumes.

Plans for parking facilities to accompany construction of the library are limited. Father Morris said that parking will be provided for the library staff only.

Apparently, progress with Father Haas' Ten Year Program is proceeding better than expected. Father Morris noted that the entire plan might possibly be realized before the termination of the ten year period. The architect's model of the first dormitory has already been completed, and contract bids are expected to go out in the spring. The College Union Building is already in the planning stage.

Father Morris observed that planning for the Ten Year Program is constantly subject to unpredictable variables and this entails planning with what is presently known and making estimates of future student population and college financial capabilities. Any plans made now must incorporate a certain flexibility which will enable them to adapt to the unforeseen.

Genesians Ready
For New Season

The Genesian Players have openings for male students in the new areas of lighting, sound, and set construction.

There are also openings in acting and business-publicity.

Initially, interested female college students are needed in hair make-up, costumes, and acting. Students who are interested should inquire in the Genesan Dramatics office, located in the basement of Stephen Hall, either on Thursday, January 11 from 3:30 to 4:30, and from 7:00 to 9:00 p.m. or Friday, January 12, at the same time.

The season's agenda for the Genesian Players includes: The Yale Drama Festival being held on March 22, 23, and 24; entertainment for the New England High School Drama Festival, held on April 19 and 20; and the semester production scheduled for May 17, 18, and 19, here at the College's Harkins Arena Theatre.

Some productions being considered for May's production are: "Born Yesterday" by Garson Kanin, "Bus Stop" by William Inge, "The Would-be Gentlemen" by James Thurber, "The Time of Your Life" by William Saroyan, and "Three Men on a Horse" by George Abbott.

Apparently, progress with Father Haas' Ten Year Program is proceeding better than expected. Father Morris noted that the entire plan might possibly be realized before the termination of the ten year period. The architect's model of the first dormitory has already been completed, and contract bids are expected to go out in the spring. The College Union Building is already in the planning stage.

Father Morris observed that planning for the Ten Year Program is constantly subject to unpredictable variables and this entails planning with what is presently known and making estimates of future student population and college financial capabilities. Any plans made now must incorporate a certain flexibility which will enable them to adapt to the unforeseen.

Genesians Ready
For New Season

The Genesian Players have openings for male students in the new areas of lighting, sound, and set construction.

There are also openings in acting and business-publicity.

Initially, interested female college students are needed in hair make-up, costumes, and acting. Students who are interested should inquire in the Genesan Dramatics office, located in the basement of Stephen Hall, either on Thursday, January 11 from 3:30 to 4:30, and from 7:00 to 9:00 p.m. or Friday, January 12, at the same time.

The season's agenda for the Genesian Players includes: The Yale Drama Festival being held on March 22, 23, and 24; entertainment for the New England High School Drama Festival, held on April 19 and 20; and the semester production scheduled for May 17, 18, and 19, here at the College's Harkins Arena Theatre.

Some productions being considered for May's production are: "Born Yesterday" by Garson Kanin, "Bus Stop" by William Inge, "The Would-be Gentlemen" by James Thurber, "The Time of Your Life" by William Saroyan, and "Three Men on a Horse" by George Abbott.
Programs Offered to Visit Foreign Nations in Summer

One of the little-known opportunities which students of Providence College in the past have enjoyed is the Experiment program designed for students of various educational programs.

"The Experiment in International Living is the only program in the country for students of like educational level to receive the opportunity to travel outside of this country, usually for an extended period of time," says Colonel Paul D. Wharton, who is the coordinator of these programs for Providence College.

"The Experiment in International Living is the only program in the country for students of like educational level to receive the opportunity to travel outside of this country, usually for an extended period of time," says Colonel Paul D. Wharton, who is the coordinator of these programs for Providence College.

The Experiment's programs are based on the conviction that one best learns to understand another people and their culture by living under their conditions for a period of time. In order to achieve this, the Experiment has established programs in many countries throughout the world. The Experiment is available for students majoring in any field of study.

The Experiment's programs are based on the conviction that one best learns to understand another people and their culture by living under their conditions for a period of time. In order to achieve this, the Experiment has established programs in many countries throughout the world. The Experiment is available for students majoring in any field of study.

The Experiment offers a wide variety of programs, including the Summer Program in Denmark and the Summer Program in Germany. The Summer Program in Denmark includes tours of provincial towns, an intercity tour of Denmark, and an excursion to the Rebild National Park to participate in the famous and government-supervised celebration of the American Independence Day.

1938 Cowl Refutes Idea That Times Are Changing

By ROB ROY

A popular folk song proclaims that "the times they are a changin'." But fragments from the COWL of 1938 seem to dispute this point.

Thirty years ago our paper printed an editorial criticizing student behavior in the cafeteria. Another editorial expressed the hope that PC would remain a small, personal college where students are not lost in numbers. And yet another defended Catholic dogma against "Where's God?" movement.

A regular column feature entitled "What Do You Think?"

Vista

(Continued from Page 1)

made aware of their rights and are beginning to seek them. Cynthia thinks that "there is a revolt of the Negroes and poor whites, and this is a prerequisite if they are to better their lot."

Presently, Vista claims approximately 3500 active volunteers among its ranks, and although there are no formal bonds with the Peace Corps, the two groups strive for a common goal of a Great Society.

Vista candidates are offered their choice of both geographic and specific work. With the exception of the Virgin Islands, Hawaii and Puerto Rico because of their climatic desirability and the limited number of spaces available, the preferences of the volunteers are usually satisfied.

Participation in Vista does not guarantee exemption from the draft, but it does minimize the possibility of an individual being drafted. Vista also provides excellent experience for graduate work in Sociology and Political Science.

Notice!

Providence College will adapt the following cumulative grade point average standards for the Dean's List and Honors at graduation beginning in the academic year 1968-69:

3.50—Dean's List
3.25—For Cum Laude at graduation, June 1969
3.25—For Summa Cum Laude at graduation, June 1969
3.50—For Summa Cum Laude at graduation, June 1969

This action was taken by the President after approval by the Committee on Studies and the Committee on Administration, and after taking into account the opinions expressed by the Student Faculty Committee.

AETNA'S AID TO HIGHER EDUCATION PROGRAM HAS SOME IMPORTANT EXTRAS

A number of responsible business organizations have matching grant programs to help institutions of higher learning meet the increasing demands made on them.

Many of them will match the gift of an employee to his alma mater. Aetna Life & Casualty goes several steps further.

We'll match the grant of both the employee and his wife to any eligible college, junior college, graduate or professional school.

And as a special incentive, we'll add 25% to our gift if half of the institution's alumni have made direct gifts during the past year.

Over 1100 of our people took advantage of our Aid to Higher Education program to benefit 386 institutions last year.

We think that's a solid expression of good citizenship, both personal and corporate. Our business may be selling insurance.

But our concern is people.
Film Series . . .

(Continued from Page 1)

lead discussion groups so that students will be able to profit more from the film.

To date, the list of discussion leaders is as follows: Dr. John Kennedy (“La Dolce Vita”), Dr. Rene Fortin (“8½”), Fr. Anthony Vanderhaar (“Darling”), and Mr. Charles Duffy (“Citizen Kane”).

Mr. Bargamian expressed his hope that some members of the Psychology Dept. will offer to discuss the technique and the content of these films. He also stated that any other faculty member interested in this program can contact him.

The cost of this film series is being shared by the Audio-Visual Center, Student Congress, and the Carolan Club. Both the Student Congress and the Carolan Club are cooperating in other ways also. The Student Congress has dropped seven of its own films so these could be substituted, and the Carolan Club is providing the equipment to show these films.

Mr. Bargamian also acknowledged the cooperation of several members of the administration, especially Fr. James Murphy, O.P., Fr. Francis Duffy, O.P., and Fr. Robert Morris, O.P.

Mr. Bargamian said that, “if it is found that this experiment works out well, then possibly in the next school year we will go into a full-scale program, bringing in other films of this nature.”

“We will try to present one major film from each country so that other people’s view of the world can be seen,” he said.

Some say we specialize in power . . .

power for propulsion . . . power for auxiliary systems . . . power for aircraft, missiles and space vehicles . . . power for marine and industrial applications . . .

they’re right.

And wrong.

Physics Colloquium

To Be Held Today

A Physics Colloquium with Dr. M. J. Drummond and Dr. A. J. Drummond will be held at the laboratories, Newport, R. I., and will be held on January 11 here.

The colloquium will feature two papers by both men on the subject of “Recent Advances in Space Physics at the Eppling Laboratories.”

Dr. Drummond will discuss the aspect of short-wave solar radiation. Included in this topic will be the design and calibration of the multi-channel radiometric system for the measurement of the sun’s energetic fluxes, totally and spectrally above the earth’s atmosphere (jet and rocket aircraft satellite).

Dr. Drummond also will talk about the first experimental results of the Eppling JPL program for the direct determination of the solar constant of radiation.

Long-wave terrestrial radiation will be the topic of Dr. Karol’s address. He will discuss the Nimbus satellite infrared spectrometer (SIRS) experiment to determine vertical temperature profiles in the earth’s atmosphere-balloon trials.

Included in this will be calibration procedures for such satellite borne IR spectrometers.

The colloquium will be held in Rooms A-100 of Albertus Magnus Hall at 7:30 p.m.

Computer Dance

On February 16

The Computer Club and Student Congress will co-sponsor the annual Computer Dance in Alumni cafe and annex, from 7:30 to 12:00 p.m. on Feb. 16.

The price of the tickets will be $2.50, with a dollar refunded during the dance to assure attendance of a sufficient number of dates.

A questionnaire will be distributed by the club members; anyone interested in attending the dance must fill out this questionnaire and return it to the club before purchasing his ticket. This questionnaire will then be processed by the computer, and the matches will be made. Participating girls will be Rhode Island College, Salve Regina, and Regis.

Questionnaires and tickets should be available in Alumni cafeteria, and Raymond Hall cafeteria in the very near future.

Letters . . .

(Continued from Page 5) which confuses him.

What is Mr. Keane going to do about the “adult world” he is expected to join pretty soon? I would suggest that he prepare himself to differ from those adults who try to guide the youth with dogmatic do’s and don’ts while they themselves violate the basic laws of human decency. Don’t escape, but prepare yourself to reach out and make certain that you have something meaningful to offer so that others might find life a little bit less meaningless.

That is the kind of adult we are in desperate need of. We could use at least one more...

Sign up for an interview at your placement office—even if you're headed for graduate school or military service.

Maybe you think you need a technical background to work for us.
Not true.
Sure we need engineers and scientists. But we also need liberal arts and business majors. We'd like to talk with you even if you're in something as far afield as Music. Not that we'd hire you to analyze Bach fugues. But we might hire you to analyze problems as a computer programmer.

What you can do at IBM
The point is, our business isn't just selling computers. It's solving problems. So if you have a logical mind, we need you to help our customers solve problems in such diverse areas as government, business, law, education, medicine, science, the humanities.
Whatever your major, you can do a lot of good things at IBM. Change the world (maybe). Continue your education (certainly, through plans such as our Tuition Refund Program). And have a wide choice of places to work (we have over 300 locations throughout the United States).

What to do next
We'll be on campus to interview for careers in Marketing, Computer Applications, Programming, Research, Design and Development, Manufacturing, and Finance and Administration.
If you can't make a campus interview, send an outline of your interests and educational background to J. E. Bull, IBM Corporation, 425 Park Ave., New York, New York 10022. We're an equal opportunity employer.
Here are the Providence College students as they bravely file through the January cold . . .

With their cars in sight, they dash through Winter’s obstacle course . . .

Momentarily Set Back . . .

They finally reach their goal . . .

Only to be set back again. “Curse you winter weather!”
The Providence College freshman basketball team overcame a five point deficit with seven minutes remaining in their game Monday evening and defeated the Cruiser-Destroyer Forces of Newport 92-86 at Newport. It was a hard earned win and the Yearlings got back on the winning track since falling victim to the URI frosh squad.

The Frosh five jumped off to a quick six point lead in their first game since December the sixteenth but the Chargers, a fine Navy team, tied it at seven with the hot hands of Bill Price. During the first half the game was marked with numerous turnovers on the part of the Friars who had trouble handling the full court press used by Newport. The Chargers were also very patient on offense as they continually found the open man underneath despite the three-two zone employed by the Frosh. Price was the big man all night for the Chargers as he was effective from both the inside and outside. He finished with 30 points to lead all scorers.

The Friars managed to take a 49-47 lead off the floor with them at the half, but the Newport Club came out in the second half and hustled their way to a five point advantage. At that point the frosh went to a man to man defense and began to employ a full court press. With seven minutes remaining it was tied at 63-63 and the Friars went on a spree, outscoring Newport 18-5 over a five minute period. With the score 81-69, the frosh just coasted to their sixth victory against three losses.

The man to man coverage used by the Friars quickly tired out the Chargers and thus the conditioning of the two clubs played a big role in helping the Friars who were a little sloppy on the defensive side of the ledger while in the 3-2 zone.

An Equal Opportunity Employer A Plans for Progress Company
Albertus A and Fall River Share Lead With Met A

After three weeks of keen competition, Albertus A and Met A squads all share the lead in the Providence College Hocky League in the PCIACAA basketball league. Precision basketball and sur-

prising power play was the highpoint of the season thus far.

The Fall River team, playing with absolutely no substitutes at all, has managed to run up such impressive victories as the 59-24 pasting of Providence College, head

ministered to the Blackstone Valley Crows. If they can hold the pace and continue to receive the excellent support from the sharpshooters, Bill Harrington and Ted Dempsey, the Fall River club could be this season's dark horse winner.

In the 1966-67 season, Albertus A finished second, and it is back once more with per-

haps the tallest team in the league. Buddy Thomas, Book Malley, and Dee Stovsene have provided the rebouncing and shooting spark that has enabled them to post four victories against no defeats.

The Met A squad is also un-

b-imished in its first three out-

puts. With many of the stal-

warts of last year's champion-

ship team returning, such as Bob Katalka, Ralph Imperato and Mike Walsh, and the addi-

tion of newcomers Skip Len-

zicki, Bud and Brian Dobinski, and Johnny Samojoy, the Met club seems a sure bet to make it two straight crowns. In their first few contests they over-

whelmed the New Haven club in a lopsided 74-41 win and carried off a three-game shooting streak to halt the Blackstone Valley Club.

This coming week promises major surprises and top notch action as many of the contend-

ers will clash. The main fea-
sure should be the tilt between the Fall River squad and Albertus A on Wednesday evening.

Indoor Track Season Opens Sat. in Boston

As the cold weather descends upon us, the winter sports scene moves to the hosted in-

doors. The Providence College track team is no exception to this as they swing into the indoor season as one of the top teams in the land.

Perhaps the word “indoor” is not quite the right term to Friars quickly opened a 2-0 lead in the first period. Rick Pumple put the Friars up they have managed to run up with absolutely no substitutes at all, has managed to run up such impressive victories as the 59-24 pasting of Providence College, head ministered to the Blackstone Valley Crows. Zifcak, Sampson Lead the Hockey Squad in Latest Comeback Surge

The Providence College Hockey squad experienced a very dismal holiday schedule by managing to win only one contest while suffering two losses. The sextet started off on the right track by soundly defeating the Carling Semi-Pro squad from Boston by a score of 4-2 at the Rhode Island Auditorium prior to the Brown Christmas Tournament.

Jerry Zifcak opened the scoring in the first period when a Huskie player fired the disc past Jack Sanford as he turned away his initial try. His initial try was stopped, but Zifcak hit the post twice, and his second try put it by the sprawling Carling goaler.
