Cowl Changes Hands

Devlin Selects New Editors; Conn, Sylvester, Joyce Named

Four Seniors on The Cowl staff resign their editorial positions with this issue.

Outgoing Seniors are Editor-in-Chief, Peter J. White; Executive Editor, Arthur C. Mattos, and Managing Editors Peter H. Whelan and Frank Mazzeo. All have been members of The Cowl staff since their Freshman year.

Despite the fact that the four are resigning their editorial positions they will remain on The Cowl staff as writers, and advisors.

Seniors Resign Position

Student Interns

Political Science Dept. To Continue Program

Professor Zygmunt J. Friedemann announced last Friday that the Administration of Providence College has approved the continuation of the Political Science Internship Program in Washington for PC students majoring in political science for another year.

The statewide program, originated last year by Senator Charles Gore (D.R.), covered Rhode Island College and the University of Rhode Island. Sixteen student interns from these institutions participated in the program with seven coming from PC. Professor Friedemann, coordinator of the program, has extended it this year to include not only the above mentioned institutions, but also Barrington College, Bryant College, and Salve Regina.

Through the personal efforts of William Duffy, a junior political science major, Senator Dell's program has been extended. Duffy, along with Representative Fernand St. Germain (D.R.), has been working on the bill this year to include not only the above mentioned institutions, but also Barrington College, Bryant College, and Salve Regima.

Lecturer from Yale Speaks This Evening

This evening the Providence College chapter of the National Federation of Catholic College Students is sponsoring Mr. John Guarascielli, a graduate student and instructor of history at Yale University, in a lecture entitled "Are Catholic Colleges Really Necessary?"

The meeting will take place in the Guild Room, Alumni Hall, at 7:30 p.m., and all students are invited to attend. In addition to discussing the role of Catholic Colleges, Mr. Guarascielli, a graduate of Holy Cross, will touch upon such subjects as the use of scripture in teaching theology and the use of the vernacular in literature.

Brown and URI to Feature Cartoons During Exam Week

Donald Duck and Gerald McBoing-Boing will attend Brown University and the University of Rhode Island next week to help the students pass their examinations. Bringing in Mickey Mouse has not yet been invited to ease their stress.

ROTC Ball Set; Open to All

On Friday evening, February 8, the Cadet Officers Honor Club of Providence College will sponsor the 12th Annual Military Ball. The affair will be held at the Alpine Country Club in Cranston with dancing to music provided by Father Farley's Band from 9 p.m. to 1 a.m.

Cadet Capt. Terry Sullivan, chairman, announced that the cost of tickets for this formal, non-alcoholic dance will be $2 per couple and will go on sale in the Alumni Hall cafeteria and Raymond Hall dining hall in the near future. He also stated that the Ball will be open to all students of the College.

means of relaxation during the exam period depends upon the individual himself.

"The question of relaxation during the exam period is a difficult one to answer," said Father Petter. "It is one of the subjective nature which depends on the individual. Going to a movie, cartoons or otherwise, may be a help to one person and no value at all to another.

"It is a very good idea, however, to have someone other than yourself to help you relax during exams, but cartoon shows are not the end-all of relaxing diversions. Activi­ ties such as reading, sports, music, and other hobbies can also help to relax a student during the exam period," Father Petter added.

In Father Petter's opinion, such a program is not for a college administration to sponsor. The sponsoring of such a program on campus by an organization such as the Student Congress or the Carbutian Club would probably not raise any objection, but the administration of the College.

Father Petter added that the pressured student at exam time is usually the one who does not give his full effort of preparation until perhaps one or two days before his examination.

"It would be a much greater value," said Father Petter. "To treat the problem of pressure during the exam period at its source by replacing any crash program of preparation or study by a well-ordered and well-planned budget of time in preparation for examinations.

Brown and URI to Feature Cartoons During Exam Week
Attendance at Festival Planned by Glee Club

On Saturday, March 30 and Sunday, March 31, the Providence College Glee Club will participate in the annual Catholic Collegiate Festival at St. John's in Long Island.

The festival, consisting of glee clubs from 12 of the biggest Catholic colleges in the East, will promote two days of superb competition. On Saturday night there will be 30 numbers from all the schools, and on Sunday morning a student choir will be sung by the entire student group. Later in the day five judges, each a specialist in his own field, will analyze the competition and award trophies for first, second, and third places.

Already this year the PC Glee Club, which numbers about 62, has played at two major benefits. On Dec. 2 they sang at the Annual Memorial Service for the Order of Elms and on Dec. 11 they sang for the Catholic Woman's Club in Fall River, Mass. At this affair, a near capacity crowd, including the Most Rev. Bishop James L. Connolly, gave the group a great reception. Bishop Connolly said of the affair that the glee club should be "praised for the quality of the singing and for the range of the repertoire."

This particular program included selections from Beethoven, Grieg, Palestrina, and Williams. Since the first semester is usually an organization time, the PC Glee Club plans to hold many more concerts in the second semester. Besides the St. John's Festival, other concerts will be, with probably a few more to be added later, the following: March 9 in Waterbury, Conn.; May first with St. Francis Hospital in Hartford, Conn.; and Sunday, May 18 with Our Lady of Elms in Chicopee, Mass.

Interns ...

(Continued from Page 1) for interns in Washington is nine students. Five spots will be allotted to juniors and four to the seniors. Dates for PC participation are the weeks of February 3rd, February 24th, and March 31st.

Students applying for the internships must be either junior or senior political science majors, must be legal residents of the state of Rhode Island, and must have a minimum cumulative academic average of 3.0. The interns will be chosen from this group on the basis of highest academic standing on the Dean's list.

January 15th is the deadline for all students who are eligible and interested to apply. Students who expect to achieve top ranking on their respective Dean's List should report by the above date to the political science department office and place their requests for consideration.

Participating students are expected to cover their own transportation and room and board expenses for the one week stay in Washington. The PC Administration will officially exempt the participants from class attendance.

The program is about to be subsidized by the National Committee for Education in Politics, and the College may receive $150.00 to be distributed among those eligible students who cannot financially afford to participate in the program. Any needy student who is eligible should not hesitate to request a stipend if he lacks the necessary funds to participate.

The Providence College Alumni Association of Washington has contributed to the program by arranging for PC students to have overnight accommodations on the Catholic University Campus for $2.00 a night.

Each participant in the program will receive a free copy of Clem Miller's book, Letters from a Congressman.

As last year, the participating students will attend sessions of the Congress and Congressional committees, conduct some legislative research, do some clerking work, and work in any capacity they desire in the offices of the Senator and the Congressman.

New Cowl Staff . . .

(Continued from Page 1) majoring in the pre-legislative division of the political science course.

He served as a Cowl reporter in 1960. In January of 1961, while still a freshman, he was named business manager. DeMaria has held this post ever since, and, at the conclusion of this new term, will have been business manager for three years.

He is a member of Theta Delta Chapter of Delta Epsilon Sigma. He has also served as treasurer of the Sailing Club. Following his freshman year at PC, McIntyre represented Providence College at the national convention of the National Student Association.

Romeo J. Blount has been chosen as news editor for the coming year. A former member of the news staff, he joined the Cowl news department in January of 1962.

Circulation manager Joseph Reiling will fill the sports editor's spot. Besides being a sports writer for the paper, he is also treasurer of the junior class.

Raymond Lajenneuse has been elevated to the post of associate editor. Lajenneuse, a former president and current secretary of the Conservative Club, had been the assistant news editor.

James W. Foley, who was formerly assistant news editor, has been re-appointed as copy editor. Foley was originally named copy editor in September of 1962.

Paul Ferguson, who has been assistant copy editor, will fill the second copy editor's post. Ferguson joined the paper in September of 1961 and has worked since then as a member of both the news and copy departments.

Photography Editor Richard Ciminelli will continue in his present position. Ciminelli, a senior, has been the Cowl's photography editor since October of 1961. At the end of his last semester this May, he will have completed four years of service to this newspaper.

Charles P. Reidy has been selected as the new circulation manager. Reidy, who lives in Abington, Massachusetts, is a member of the junior class.

Nothing else needed but you to complete this picture of filter smoking at its flavorful best. Enjoy yourself...light up a Winston.

Winston tastes good like a cigarette should!
Blood Bank Renewed

AED Drive Collects 71 Pints

Alpha Epsilon Delta's blood drive which was held December 11 in the exercise room of Alumni Hall collected a total of 71 pints. Co-chairmen of the drive were Joe Ryan and Conrad Lariviere.

Nineteen of those who donated to last year's drive were donors again this year. Faculty members who donated blood were the Rev. Charles V. Reihart, O.P., Rev. John F. Gerhard, O.P., Rev. Leo S. Cannon, O.P., Mr. Raymond J. Hanlon, and Dr. Hubert C. Kennedy.

The biology office is enlarging the filing system of donors and dates of donations which was established following the drive of December 1961. Donor cards will be distributed in the near future to those who contributed in the current drive. The Blood Bank provides protection for all Providence College faculty members and students. Each student is protected for one year only. Donors' immediate families are also protected but non-donors' families are insurable in the program. The insured total of faculty and alumni donors are protected for one year only.

Alpha also announced that anyone who was unable to give in the current drive but wishes to donate to the Providence College Blood Bank at a later date should contact the biology office which will make the necessary arrangements.

PC Pre-legalt Student Scores Well

By FARRELL SYLVESTER

John Milton's famous line that "Suspense in news is torture" well describes William Thornton's state of mind as he prepared to learn his results on the Law School Admission Test. Bill, a senior political science major from Pawtucket, probably was pondering a second line from Milton's Samson Agonistes that "Evil news rides past, while good news halts." Likewise, in Bill Thornton's case, the good news did come after an interminable wait.

He was recently notified that he scored a remarkable 727 on the morning examination and 71 and 67 on the afternoon writing ability and general background exams. His 727 out of a possible 800 places him in the upper one half of one percent of those who took the test nationally. His score is the highest that has ever been achieved by any student who has attended Providence College.

In a recent COWL interview, Thornton indicated his reaction to the good news: "I was extremely surprised. At first I was even afraid to open the letter. The results have solved many of my problems as they assure my obtaining a scholarship. It was certainly a big relief to me."

Bill, a member of Theta Chapter of Delta Epsilon Sigma, has been on every Dean's List since he arrived at Providence College. While maintaining his fine academic record, he has also worked thirty hours a week as an assistant foreman at the Apex department store in Pawtucket.

In discussing the factors behind his unusual achievement, he said that "rapid reading, the philosophy courses at Providence College which teach critical analysis of thought and words, and professors who insist on critical types of reading and writing were the influence this sort of success."

"I had six years of Latin and three of Greek. I've found that grammar studies give a person the capability of their position from a rule which must be applied in various circumstances. This type of reasoning follows through in the Law School Admissions Test, and you must be able to keep within the test of the test and within the terms of the question asked."

Bill emphasized the value of the knowledge and training he has acquired in the pre-legalt division of the political science department. He recalled that "A long section in the test is based on hypothetical law cases. It's not necessary to know any particular law but it is very helpful to understand the legal outlook and philosophy in regard to connecting cases and limiting holdings. Peter Shehan, in his legal method course in my junior year and in his constitutional law course this year, has helped me a great deal not only in understanding the case system, the intricacies of precedent and procedure, and other legal fundamentals but also in coming to a greater realization of the true spirit of the law and of the responsibilities, dignity, and value of the legal profession in contemporary society."

Thornton approved every (Continued on Page 7)

Physics Society Announces Awards for PC Students

The Providence College Student Section of the American Institute of Physics has announced recently that a grant of $250 has been given to William Hirsch and Stephen Meecs of PC, in support of their project in Physics: "Studies with a Radio Frequency Plasma Torch."

Both Mr. Hirsch and Mr. Meecs are members of the Class of 1964 and have performed this experiment almost completely on their own, in cooperation with Dr. Joseph E. Robertshaw, an Assistant Professor of Physics at PC.

These men have succeeded in producing from 10,000 to 12,000 Fahrenheit degrees of temperature, or approximately the temperature of the surface of the sun.

This experiment is involved in the study of "Plasma Physics" which is the examination of ions moving with high velocity in a high temperature area. It should be noted that there are a very few known machines or other apparatus that can duplicate this feat. The remark made of this discovery is that it can be adapted to use in industry.

This was the first time that any PC students have applied for such a grant. This grant which is given by the American Institute of Physics to its different student sections, was made possible by the benevolence of the Bendix Corporation.

There was $1,400 given out by the Institute throughout the country last year to only three other winners in the nation.

Congress Passes Motion Favoring Exam Cartoons

On Monday night, Mr. Joseph Calabria of Alpha Epsilon Delta's student section, President of the Class of 1965, brought onto the floor of the Student Congress a motion to form a committee to find out the feasibility of printing student exam cartoons during exam week. It was noted that these cartoons have proven very effective in lessening tensions, which arise during exams, at Brown University and the University of Rhode Island. The motion was passed and Mr. Calabria was named chairman of the committee.

Also passed at this meeting was a motion introduced by Mr. Goblet, which provides for the reinstatement of the S.T.D. and the Golf Club, which had been inactive for a year. The Judo Club, the Random Rifles, the Golf Club, the Flying Club, and the Swimming Club were declared inacvite by the Congress.

Handbooks or the rules and regulations of the Student Congress were confirmed by the Congress. The loss which was sustained by the Congress amounted to $640, but all bills have been paid for the weekend and a good balance still remains in the treasury. It was also noted by Mr. Musari that the "Jewels of Dixie," the band hired for the Saturday event at the Club 400, did not appear because the date was not confirmed by the Congress.

Bob DelStaff made a request for the Student-Faculty Board which asked for Student Senate approval of the regulations of neighboring colleges or universities.

Images of the Sun}

The heat temperature of the surface of the sun is 6000 C. This temperature may be compared with the temperature of the sun's core of 15 million C. This extreme temperature of the sun is produced by the nuclear reactions which occur in the sun's core.

The temperature of the sun's atmosphere is 6000 C, which is approximately the temperature of the sun's surface. This temperature is produced by the absorption of light by the gases in the sun's atmosphere.

The temperature of the sun's atmosphere is about 6000 C, which is approximately the temperature of the sun's surface. This temperature is produced by the absorption of light by the gases in the sun's atmosphere.
Editorially Speaking

Aid to Seniors...

Each year the members of the senior class who intend to go on to graduate school face the problem of seeking out information, overcoming financial handicaps, filling out applications, and securing the necessary recommendations.

Considerable time must be spent on the tedious project if the seniors hope to organize a program on their own that will eventually lead them to graduate school. Information is gathered from catalogues, brochures, and bulletin boards spread about the campus. Rather haphazardly the seniors are informed that some information may be obtained from administrative offices or from the library.

Obviously there is a need for coordination on the part of the College, to organize all the information which comes to the various offices concerning graduate program opportunities.

Perhaps it is too late to organize such a coordinating program this year, but couldn't PC look ahead to future years for the sake of those who intend to pursue their studies on the graduate level? The actual start of such a coordinating program would not present many complex problems. It would, however, require members of the faculty who would be willing to devote time and work closely with the seniors.

Basically the program would call for a three or four man faculty committee to disseminate the information regarding graduate programs and financial assistance available to those who desire it. Seniors who intend to go to graduate school would then register with the committee, and meet periodically to discuss the many problems which face these seniors aspiring to graduate school.

The work involved would be tedious and time-consuming but in the long run both the seniors and Providence College would benefit.

Lots of Laugh Wanted...

Do you suffer from tension, strain, anxiety, impatience, mental or physical apprehensiveness, consternation, insomnia, cold sweats, fear, or just plain panic at exam time? If so, we have the perfect cure: animation. To put it simply, cartoons. When January and May roll around, it seems as though the campus is enveloped in a sudden darkness. The formidable finals are approaching. The higher the senior's exam level? Perhaps the same solution could be attempted here at Providence College.

With showings at 12:30 p.m. and 3 p.m., the cartoon shows would provide a relaxing break from the tedious, hectic, welcome, tense, exhausting and exhaustive examinations to which the students are exposed.

Couldn't we look forward to an examination period enriched by the appearance on our campus of such famed celebrities as Andy Panda, Yogi Bear, Felix the Cat, the Jetsons, and the indomitable Woody Woodpecker?

A Note to the Basketball Team...

Students in the News

By RAY LEHUNESSE

Racial discrimination in educational institutions has been a controversial issue since the 1964 Supreme Court decision in Brown v. Board of Education, which ended the legal sanction of racial segregation in public schools. In the eight years since that ruling, the complex problems of educating and caring for pupils of different races has been brought before courts and legislatures in school districts and colleges (e.g., the recent Meredith case in Mississippi).

As a student in those districts, I feel directly subject to dispute at the University of Wisconsin, where the administration’s Human Rights Committee has ruled that discriminatory clauses are forbidden in the membership requirements of fraternities and sororities. In a situation under penalty of suspension for violation, the use of clause 78 is forbidden by the act, the effect has meant that any Greek-letter society which applies for application of the internal rules is not choosing to seek his com-

In consequence, the action of the university administration is a vital and arbitrary limitation of private property which cannot be justified by the end it is supposed to serve. The university must become actual own­er of the fraternities through the act of penalizing for the group with just compensation for the constitution of the Human Rights Committee and for any local legal means to cause the fraternities and sororities which they should voluntarily cease discrimination.

The student council of the University of Notre Dame, Notre Dame, Ind. N. Y., will submit entries will be awarded $25.00. Winning entries submitted on the inside of a Lucky Strike wrapper will get a $25.00 bonus. Enter as often as you like. Start right now!

Get Lucky
Play "Crazy Questions"

50 CASH AWARDS A MONTH. ENTER NOW. HERE'S HOW:
First, think of an answer. Any answer. Then come up with a nutty, surprising question for it, and you've done a "Crazy Question." It's the easy new way for students to make loot. Study the examples below, then do your own.

Send them, with your name, address, college and class, to GET LUCKY, Box 64F, Mt. Vernon, Ill., 62864. Winning entries will be awarded $25.00. Winning entries submitted on the inside of a Lucky Strike wrapper will get a $25.00 bonus. Enter as often as you like. Start right now!

THE QUESTION IS: How does one discover fine tobacco taste in a cigarette? Well, that was easy enough. Luckies are famous for taste. It's the reason we say: "Lucky smokes stay Lucky smokers." (Why don't you say it a few times?) Find out for yourself why Lucky Strike is the most popular regular-size cigarette among college students. Pick up a pack today!

Product of The American Tobacco Company—"Tobacco is our middle name"
The legal profession is more of a steppingstone for me rather than an end," answered Bill when asked to give his view on the value of a legal education. "It is a service to society, but more than that, it establishes a firm foundation of training and experience from which further types of public service may be rendered."

For those who will soon take the Law School Admission Test, Thornton advised that they should adjust their attitudes to the framework of the test. "Find any sort of rational hook on which to hang your answers. Use it and return later to check your answers to difficult questions if you have the time." Although many students avowedly dislike the afternoon exams because they are extremely difficult, Bill related his own reading has been concentrated in the areas of political science, history, economics, and the sciences.

Bill acknowledged that speed and accuracy in reading are two of the best assets that those who take the test can possess. He recommends a reading comprehension program that only fast readers whose speed is insufficient but also for rapid readers counseled that "No amount of preparation can make up for simple errors, especially in the 'no error' type of multiple choice question. Students who engage in any type of writing activity gain experience which is most beneficial on the writing ability exam."

In reference to the last or general background test, he stated that "No amount of undergraduate courses are sufficient to prepare the test taker to answer all the questions on this type of an exam. It is however prepared for by outside reading. I mean not only the great works of literature but also a varied diet of books especially those concerning biology, physics, chemistry, astronomy, art, music, and the social sciences."

"In general the arts student should fortify his knowledge of the liberal arts. He should cultivate the liberal arts to a greater degree." Thornton stated that his own reading has been concentrated in the areas of psychology, history, economics, and the sciences.

William Thornton (right) being interviewed by COWL news editor, Farrell Sylvester.

THE SAFE WAY to stay alert without harmful stimulants

NoDoz keeps you mentally alert with the same safe refreshing found in coffee and tea. Yet NoDoz is faster, handier, more reliable. Absolutely not habit-forming.

No time monotony makes you feel drowsy while driving, working or studying, do as millions do . . . perk up with safe, effective NoDoz tablets.

Another fine product of Grove Laboratories.
Faculty Makes Contributions

Two members of the Providence faculty have recently made significant intellectual contributions to the academic world.

In the October issue of the Deerfield Academy Bulletin, an article by Dr. John Rosenwald, Associate Professor of German, on "Catholic Novelisten in Contemporary Germany" was presented.

The December issue of the Bulletin contained an article by the Rev. Joseph J. Lennon, O.F., Dean of the College, titled "The Status of Women in the Middle Ages." Because of its length, the College, on "The Status of Women in the Middle Ages," the first part of an article by the Rev. Joseph J. Lennon, O.F., was published in the Bulletin. The first part contains the first part of the article, which is devoted to the position of women in the Middle Ages.

He happened to write the article, Father Lennon told The Cowl: "In graduate school I became interested in the question. I asked myself, 'By what criteria do we judge the condition of woman in the Middle Ages?' The answer would be that we judge by 20th-century standards while a more valid criteria would be the standards of the time. Father Lennon led me to investigate the extinct books of the period to determine the precise position of women in that time."

He stated that his article's conclusion was that the status of women in the Middle Ages was more prestigious in the 12th century than in the 20th century society of the western world. Modern woman is uncertain of the role that she plays in life while the duties and obligations of the Middle Age woman were well defined and the position of woman in the Middle Age was more prestigious in that period and status in the society of her day.

Fr. Haas Will Discuss "Abstract Art Forms"

The Aquinas Society will begin its spring semester on Thursday, January 31, with a talk by Father Haas, O.P., of the philosophy department at PC. He will speak on the necessity of Non-objective Abstract Art from the viewpoint of Phenomenology.

A graduate of PC Father Haas was ordained in 1933. He received his Ph.D. from the University of Leiden in Holland and has taught at the Catholic University of Nijmegen in Spain and the University of Haarlem in Holland.

Exam Schedule

(Continued from Page 4)

The answer would be that we judge the status of women in the Middle Ages by 20th-century standards while a more valid criteria would be the standards of the time. Father Lennon led me to investigate the extinct books of the period to determine the precise position of women in that time."

The economic integration of Europe is one of the most important developments of our time. It was born after World War II but its realization was too late. Instead of dramatic results, the Common Market has been set up to carry out and achieve the objectives of the Treaty of Rome, the representatives of the other Western European countries the world has ever known.

Hockey . . .

(Continued from Page 10)
they mangled Northeastern 13-2. Boston College present a formidable offensive threat but even more so as a top defensive outfit that has allowed an average of 2.1 goals per game.

Down from Waterville, Maine, the Mules shouldnt be counted out. They last their head coach to Boston University, and three ice greats in Ross Ryan, national high scorer last season; Frank Stephenson, All-American goalie; and All East defenseman, Don Young. Colby still could give the Friars quite a tussle.

Traveling to Troy, N.Y. on Feb. 3, the PC pucksters will collide with the Engineers of Rensselaer Polytechnic Institute. Already having skated to a 3-3 tie against each other in the R.P.I. Invitational Hockey Tournament, the Black and White have a clear picture of what to expect from the Engineers.

Basketball . . .

(Continued from Page 10)
has had good nights. It may be that, by the time we play them, they will have jelled. Among the leading players on the squad are Miles Allison, Fred Crawford, and Mike Rooney.

On Jan. 31, the Friars fare Dayton in Madison Square Garden. The defending N.I.T. Champion Flyers have lost 6-10 Bill Chiemlewski, but in his place is 6-10 Bill Westerkamp.

On Feb. 2, Providence will meet Niagara in Niagara Falls. The Purple Eagles are as yet undefeated with Ken Glenn and Bob Muddrey showing the way. Umass comes to PC on Feb. 5. Thus far the Redmen have been disappointing.

NOTES FROM THE SPORTSDESK

By Frank Mazzeo

Providence College's hockey success to date has raised both encouraging and disappointing factors. The Friars in 3-1 record includes a non-league competition and an outstanding performance in the R.P.I. Tournament. Although they were in three stunning defeats in the R.P.I. affair, they turned in an outstanding performance in a 2-4 loss to Minnesota, one of West coast's hockey powers and played sound hockey for the most part.

Providence now faces the most difficult part of their schedule with games like the one at Boston College. Prospects for success over this part of the campaign is, however, on unمقارn footing to say the least. Not because of the players' potential, but because of the uncomfortable and unwise policy the school follows in securing practice time for the skaters.

In exchange for the entire gate receipts from home games, the Rhode Island Auditorium guarantees to supply Providence College with practice time. The auditorium is allowed to distribute this time at their own discretion. Thus, the Friars play second fiddle to every organization that can pay for ice rentals as auditorium officials gloat over the players' potential, but because of the uncomfortable and unwise policy the school follows in securing practice time for the skaters.

Providence Administration, whoever decides the hockey policy, is pure.

The athletic Department or R.I. University, where the decision lies, can only do harm to the team.

The outstanding player of the game for PC was the goalie Tom Haugh. Tom stopped 45 shots, three times as many as Minnesota's goalie. Kenough, Lamorriello, Heffernan and Cannon all had one goal for P.C.

In the second outing of the tournament, the Friars jumped to an early lead tallowing three goals in the first period of play.

Late in the second period R.P.I. registered in the scoring columns when Bob Strachan whipped a shot past goalie Tom Haugh. The final two goals were added in that segment when Jerry Knightly and Bruce Tisdal tallied for the Engineers.

In the final tilt of the round-robin tourney Providence met McMaster. Larry Kish, Providence defenseman, was selected for the all-tourney team. Tom Haugh was also second team goalie.

You'll make the wisest choice no matter which Chevrolet you choose!

These four different cars are alike in one important way. Each is a product of Chevrolet Division of General Motors. So each will give you more performance, beauty, comfort and good news at trade-in. But each is tailored to a certain kind of buyer. Our big Chevrolet Sting Ray can best be described as dramatic. With a choice of 33 models, there's one Chevrolet that will suit you best.

Notes:

Hockey: Colby still could give the Friars one victory and six defeats, the clash with the Friars on January 29, at the R. I. Auditorium. Even with a present record of one victory and six defeats, the Mules shouldnt be counted out as a pushover. They lost their head coach to Boston University, and three ice greats in Ross Ryan, national high scorer last season; Frank Stephenson, All-American goalie; and All East defenseman, Don Young. Colby still could give the Friars quite a tussle.

Basketball: Providence College's hockey success to date has raised both encouraging and disappointing factors. Keough Sparks Fourth Win As Pucksters Defeat Wildcats

By Dick Herman

The Providence College varsity hockey team started the new year off on the right foot by posting its fourth victory over a scrappy University of New Hampshire, 4-2, on Saturday at the Rhode Island Auditorium.

Jake Keough started the PC scoring when he took a pass from Captain Lou Lamoriello at 2:24 of the first period and put the disc past Wildcat goalie, Doug Dunning. At 17:15 of the same period Keough took Larry Kish’s rebound shot and turned it back into the Wildcat net for his second goal.

In the second period Lamoriello, picking up assists from Larry Kish’s rebound shot and Bob Stone, hitting the puck past the goalie, raised the Friars count to 3-0 at 2:56.

But the huskies from New Hampshire were not to be denied. John Gidhay struck home at 4:08, and then at 10:30 Tom Persson idented the nets for number two.

Because of the superb neu­ nurling of New Hampshire’s Doug Dunning, the Friars couldn’t crack the door open until 25:00 of the third period when Max Rein Moore finally managed to score and the Cats were faced with the important task of holding on for victory over a scrappy University of New Hampshire, 4-2. Coach Tom Eccleston was not pleased with his team’s play in the second period.

The Friars are now 4-2-1.

The Providence College varsity hockey team sporting a record of four victories, two losses, and one tie will face off against a few of the toughest teams in the East during the upcoming weeks. Currently plagued by lack of ice time for practice and by a number of minor injuries, the Friars will definitely have to go into high gear to skate away with victory. On Saturday, January 12, the Grif­ fins will present essentially the same team that lost to PC last year 50-56. This year they have lost only one game and have been ranked in the nation’s top twenty. Leading the way is Villanova, currently averaging 27 points per game. In their first game since Christmas, Providence will face St. Bonaventure, on Jan. 26, in Alumni Hall. The Friars are playing the best they have been playing in a very long time.

On Saturday, January 12, the Friars will meet stiff opposition this month.

Friars to Meet Stiff Opposition This Month

Between now and the next is­ sues of the Cowl, the Friar hockey­ sters will have encountered, perhaps, the roughest stretch of their schedule. Top games include URI and Canisius this week and perhaps, the.space in five days, PC will meet St. Bonaventure, Day­ ton, and Niagara in what Coach Mullaney describes as “the toughest week of the year.”

Tomorrow night the Friars will journey to Kingston to meet URI, after which they will play Canisius in Buffalo. The Friars are looking at the intra-state rivals. PC will probably be without the services of Roy Tippl this week, and the intra-state rivals. PC will probably be without the services of Roy Tippl this week, and.

John Thompson (59) grab a rebound out of the clutches of Bob Madigan (42) in action Saturday night at the Rhode Island Audito­ rium, 59-49.

Pucksters Face Tough Games in Next Weeks
