ATHLETIC COUNCIL FORMED

Annual Retreat to Start After Mid-Year Exams

Confessions Set for Feb. 6, 7, 8

The annual retreat will begin on Monday, February 6, immediately following the mid-year examinations, and will continue through Wednesday noon, February 8. Retreat Masters this year will be the Rev. T. P. Conlon, O.P., Rev. A. H. Neel, O.P., and J. B. Heaney, O.P., all of whom are members of the Dominican Eastern Mission Band.

Conferences will be held in the auditorium, students' chapel, and students' lounge. The meeting place for each class will be published on the official bulletin boards. The retreat this year will be given in much the same manner as in other years. Mass will be celebrated at nine o'clock and will be followed immediately by a sermon. The second year's Mass will be celebrated at nine o'clock. Holy Communion will be observed at the conclusion of the Rosary, will be held approximately a half-hour after the first. After another half-hour interval the third conference will be held, followed by Benediction of the Blessed Sacrament.

Confessions will be heard at all conferences and at any other time a student may request. A general Holy Communion will be observed at nine o'clock Mass on Wednesday. The conferences will be over by twelve-thirty each day.

Attention at every conference of the retreat is compulsory for every Catholic student. The confessions of the class will be divided into groups of a definite seating plan being arranged by the Chaplains. Non-Catholic students are invited to attend and seats will be reserved for them in the rear of the auditorium.

Third Order to Hear Talk on Stigmata

A scientific explanation of the stigmata of Theresa Neumann will be given by Father J. O. Flaherty, Cranston, to members of Third Order after Friday Tertiary devotions at Aquinas Hall.

Dr. Donahue saw medical service during the recent war when he met and conversed to some length with the famous stigmatic.

Carolan Dance Committee

Left to Right, Seated: Robert Flaherty, '51; Gerald Creely, '50, Chairman; and Paul Pinhetti, '51. Left to Right, Standing: James McCalley, '50; William Quinn, '52; Jay Tabbott, '51; and Gerald Kallman, '52.

LOUIS PASCO ELECTED FRESHMAN PRESIDENT; VOTE TURNOUT POOR

Lou Pasco was elected as president of the Freshman Class at elections held last week in Room 163.

TO ADVISE COLLEGE SPORTS' ACTIVITIES

James F. Sullivan, Student Representative

Formation of a seven-member Advisory Athletic Council composed of faculty, alumni and students was announced today by the Very Reverend Robert J. Slavin, O.P., S.T.L., Ph.D., president of Providence College.

Simultaneously with Father Slavin's announcement, Assistant President Frank J. Lowery, '26, made known that the Alumni Board of Governors had elected William J. Iovanna, '27, of New Haven, and Charles F. Reynolds, '26, of Pawtucket, and Joseph P. McGee, '24, of this city, both former Player athletic board members of a quarter of a century ago, to serve on the council.

Raymonds won, famed pitching Providence College to a 3 to 6 victory over Brown University in a thrilling baseball game in 1924, and McGee was the first football captain and a former coach of football at the Dominican College. Jovanna has long been interested in interscholastic sports and athletics.

James F. Sullivan, of Fall River, a junior, was elected to represent the student body in the panel. The Rev. Edwin H. Schmidt, O.P., advisor to the board, gave a talk after a special meeting of the student government group that is supplemented to the by-laws will provide for the annual election of a senior by the student members of the college each year to serve the rest of the academic year.

The Rev. A. B. Brayley, O.P., director of athletics, will be chairman of the new council, and the Rev. Vincent C. Dore, O.P., L.L.D., dean of studies, will be faculty representative on the council. The ex-officio member of the group and does not plan to take an active part in its proceedings, preferring to have the advisory council's recommendations by letter for the council's deliberation.

The council will advise the athletic department and colleges authorities on schedules, interscholastic activities and intra-sports, physical education and health, and may be called upon for important decisions during the construction of the college's program.

Gigantic Penny Sale

Need 700 Workers To Aid Chaplain at Gigantic Penny Sale

This week Father McKenna is sending out a call for seven hundred workers to help the gigantic Penny Sale which will be held at the Rhode Island Auditorium the evening of Feb. 6. This is two hundred more than last year. Anyone who attended last year’s sale will know that 500 tickets are requested to make return as soon as possible.

All students with automobiles should stop at the desk in the retenus to help advertise the Penny Sale.

Barristers Defeat Boston College

The Providence College Barristers overpowered the Boston College team yesterday night by going a close decision over the Notre Dame Debate Team.

The debate took place in the Parish Hall of St. Edward’s Church, where the ballots were counted.

The topic of the evening was the national resolution, “Resolved: The United States and the United Nations have the basic non-agricultural industries.”

John St. A. and William McMillan, Jr., represent the Barristers; Russell Harbison and Malcolm Arthur represent the Bostonians.

The judges were Rev. John Lynne of St. Joseph College, Pawtucket, Rev. Paul J. McDonald, Vice President of Rhode Island College of Education, and Mr. C. Dore, of the Providence School Department.

At a meeting Monday afternoon, the Barristers chose Dr. Robert F. Reynolds, the office of Club President and William Quinn, of the office of Club Treasurer.

Dr. Reynolds is an ex-officio member of the group and does not plan to take an active part in its proceedings, preferring to have the advice council’s recommendations by letter for the council’s deliberation.

The council will advise the athletic department and colleges authorities on schedules, interscholastic activities and intrasports, physical education and health, and may be called upon for important decisions during the construction of the college’s program.

Roving Reporter

By Gerald G. Gregory, ’51

We have been hearing and reading a great deal lately concerning the policies of the "Administration" in promoting a program of social welfare, which is reputed to eliminate the inequalities still existing in the social and industrial structure of the country. In interviewing the below-named students, the following question was asked: "Do you believe that the current trend in government legislation will lead to the installation of our system of free enterprise in order to alleviate the present depression?"

JOHN B. MURPHY, ’51. Yes, the present administration has already done a great deal along the lines of nationalization of our so-called system of "free enterprise." Moreover, its program for the future leaves little doubt as to its intent. The farm-price support plan, a novel conception, is one. Some federal public housing, plans for new TVA's, plans for this, plans for that, in short, the whole "fair deal" program is im
doubtedly founded on a very respectable level.

JOHN POLLIT, ’51. In any system of government, there is always a certain amount of socialism, but in our govern
dment, this socialism has been stepped up steadily increasing, and although it may be called by another name, that name is socialism.

WILLIAM GAW, ’51. No, I believe that socialism is necessary in order to prevent a depression; however, the government is not stepping too far out of line. It is doing just what it has been doing for the past few years--socializing as far as it can.

Here Goes!

Ring that Bell!

Next week, our minds and memories will be put to the supreme test. The result of four months' application or lack of it should come to light when we have finished the series of mid-term examinations.

Some students among us have been diligent since the opening of the school year. They have attacked each assignment with vigor, have studied regularly and thoroughly. They have made of their work a day-by-day chore that must be performed conscientiously. As a result, they have no cause for worry because they feel the self-confidence of having done their work to the best of their ability.

Others among us, unfortunately, have neglected our studies since September. These students have lagged behind for various reasons. They may have postponed their reading or their reference work in the belief that they could make it up another day. Their social life may be so full that their studies were mistakenly pushed aside. They may even be intellectually lazy.

The result of this tardiness is, of course, not a happy one. As the fatal hour draws near, sounds of weeping and gnashing of teeth may be heard in the corridors and study halls of the College. Till the end of this week and into the next, the work to be covered for each particular examination will boom fantastically large. The remaining hours lost for last minute cramming will seem too short, much too short.

But there is still time. It's not too late for lagging students to ring the bell of good semester marks. This week, the time should be apportioned with an eye to the best results.

For example, those most difficult subjects (evidently the most useful tool with which to forge a new life) should be concentrated on when studying. If this be done, the low marks should go up, resulting in a general average which is respectable or possibly good or excellent.

Again, what is important is that the most be done in the available time. It is too late for weeping and regrets but it is not too late for a calm appraisal of what can and should be studied, then a real effort in that direction. There is still time to ring the bell.

Ring that Bell!
Progress: Club to H-Bomb; Question: Will Man Survive?

Many, many years ago, in the far shadows of history, our ancestors set-spiked clubs. Everyone was expected their differences with large, spiked clubs, and invented the wheel for transportation. By slow and halting progress he became civilized. At the same time he found protection against the wild beasts of the forest. Over the centuries he learned to utilize the elements to make his life easier. He learned to harness the powers of fire, for instance. He invented the wheel to make transportation. By very gradually, man's knowledge increased. With the increase in knowledge came the invention of the gun, which began with the airplane. Since then has followed with amazing efficiency. This type of scientific progress bodes nothing but evil for the human race.

Where or when will this race to destruction end? The pattern is clear. The more effective the weapon, the more efficient the destruction. The development of war weapons which has proceeded so far will lead to a point

New Ski Club Plans

N.H. Week-end Trip

At a recent meeting of the Ski Club members were formulated a weekend trip to North Conway, New Hampshire. Among other plans of the club a dance is to be held after semester examinations and an in- ternal party for club members.

Toad, Science Hall Escapee, Relates Visit to Harkins Hall

BY A HOPPER AS TOLD TO LEONARD L. LEVIN, ’32

I'll tell you about the first time I was in Harkins Hall. But first, let me tell you about me. My name is A. Hopper. I'm a toad, hopping variety. During the rebirth of the planet I work in the laboratory at Albertus Magnus Hall. They call me an experimental assistant. Not a bad life over there. They don't pay anything, but I manage to catch quite a few flies, and I don't go hungry. And, boy, what a bunch of girl toads they got over there.

I had heard through the animal grapevines that they treat you pretty good over in Harkins Hall. They told me there were a couple of white dogs with black spots there and they were sitting on top of the world. So I decided I'd take a short leave of absence from Albertus Magnus Hall and investigate the situation.

The day before I put on my very best traveling suit — the gray one with the traveling suit — the gray one with the traveling suit. I got up very early that morning. I put up a good fight, but after all, I got out! I hopped down about a mile or two and then I got in the door and I jumped in. The door was locked, but after all, I got in. I made it to Albertus Magnus Hall. I know they have that grapevine that they treat you pretty good, but I don't believe it. You know how humans feel about us lizards, so I really didn't care much. But they were nice, and they let me walk around the room.

However, I was glad to get out of that room when everybody left. When I got out! I hopped down about a mile of stairs until I came to a big room, even bigger than the first room I was in. There were a bunch of guys there with all kinds of strange things. I saw some big ball around the room. It looked like a lot of fun, and I started running around with them. Then I saw that big ball coming at me and again everything went black.

When I woke up again I was lying in a bag of rubbish and I was cold outside. Then I saw two white dogs with black spots there and I thought they were the dogs I had heard about and I was sure they would ask me how they liked it, or one of them tried to like it. I decided to take off and I came around again. We got out of Albertus Magnus Hall and I jumped in the door and stood in.

I dreamed that I might treat the dogs nice over in Harkins Hall, but who wants to lead a dog's life? I decided to stay at Albertus Magnus Hall. I know they don't pay you, but I have all the flies I can eat, and boy, those girl toads were great.

A principal rapture of friendship is in the ease and discharge of the fulness and swellings of the heart, which positions of all kinds do cause and induce.
VOLLEYBALL CHALLENGE
The Faculty Volleyball team has been holding annual matches with any student team so desiring. This match will take place this Sunday, following the exhibitions. Any team desiring to accept this challenge may apply at the Athletic Office.

COMBO OF PENLER AND MURKIN, KALLMAN AND CASSEDY TOP FOES

By Jack Shea
Perseverance finally bestowed its long sought after reward last Saturday night when the Providence College 1 mile relay team, after two years of grinding training the Providence College 1 mile relay team captured its first major victory in the Massachusetts K. of C. Meet. No team that ever stepped on the track to attempt to win, or no coach was ever more thrilled than the one at the head of Harry Coates, for neither could accept the idea of another consolation prize.

There was to be no consolation prize at this meet. The team of Jim Penler, Gerald M. Murkin, Jerry Kallman, and Jack Cassedy, four of the most talked about athletes in the province, rained the entire competition and the prize of victory again. Team led off for the Friars in their race with R. I. State, Springfield, and Tufts. He slipped to third in the first group, this race was nervous in disguise, for the speedy representation of the hot point that he runs best when forced to come it was literally blown out of the starting gate and exploded in the lead in the last forty and placed the ball on -

McMurkin, the fiery P. C. captain, drew a roar from the crowd with the opening burst of speed he displayed as he took the point. Running what seemed to be the most consistent mile of his career McMurkin kept up his blistering pace throughout and in the not too distant future Kallman took over as the next in the linkage in the race, and the New Big Jersey runner maintained a consistently good pace throughout but he was left by the point.

Jack Cassedy was now called upon to perform his all important duties. He was brought against the effect that Cassedy would be able to place in the race, but he was quickly dispelled as Frank Dwyer of Hampden Medical and the third place at the end placed to overtake the Friar sprint speed mound with a lap to go. For a moment it looked as if victory was once again to evade Prov- enence College, but Cassedy's top speed of 22 seconds placed him in the lead in the event of the occasion, and shocked off Dwyer's claim to victory as the point with the crowd of about 11,000 on its feet, screaming, broke the tape in the 2:52-5.

The college's other entrants were as good as he was in creditable performance. The Var- sity of Providence College was represented by Bill Keenan, Bob Aldrich, John Mc- Mullen, and Bill Sherry, placed 4th for the reasons of their position. Their entry was placed near the early in the race and were un- able to maintain their position. Their entry was placed near the early in the race and were un- able to maintain their position.

Co-Capt. Art Weinschell drives through Holy Cross defenders in contest at Worcester Auditorium.

Ticket for Brown Streak Available

By DICK BOELET
Tickets for the Brown vs. Providence College basketball game at the Marvel Gymnasium Feb. 1st will go on sale at 9 o'clock Wednesday morning. Feb. 1st. These tickets will only be sold for 1.50 each.

As this P. C. home game, there will be no charge for Providence Col- lege students, but all students must obtain a special ticket from the athletic office for this game. Students can obtain this ticket on or after Feb. 1st and in order to do the student must present his athletic book. The student ticket sale will close at 3 p.m. on Feb. 8th. No student books will be honored at the price of the game. Tickets must be pro- curred at the P. C. Athletic Office.

Frosh Top Bryant Stop Losing Streak

By John Salemes
Paced by Bob Prendergast's fine showing, the Providence College frosh basketball team turned back a hard fighting Bryant College quintet, 84-74, at the Hope High School Gym last Saturday night.

Defeated in their previous outing by Bryant, 86-65, the Frosh showed their capabilities by being able to come back and win. In doing so, they ended a four game losing streak that started with the Brown- men.

It was the all around improvements in their play that gave Providence College the victory. The Frosh third victory of the sea- son was a result of a combined effort.

A complete reversal on the part of the Froshmen is expected to the game, one exception, as that has started through the Froshmen's liking for one group is Jim Shimlin. He has shown his liking for the group as a natural result of his ex- cellent shooting performances against top opposition last season. (Continued on Page 3)

Coatesmen Best Action in P. C. track circles has been on the increase. In order that the athletes have the opportunity to prepare for the future, the Spike and Show men go back to

FINALE...

Three years ago this month this column made its ap- pearance on these pages for the first time. It being a time honored custom that seniors cease contributions at the end of the first semester, the column is terminated.

I've often wondered during the m a n y w e e k s, what it would have been like to have written about the scores of the big college newspapers while reminiscing about past days when college basketball teams, and crack base- ball nine were the marks of the day. But fate it seems to me, be- cause it is tough at times to write about basketball, yet I look for- ward, until the current basketball season, I had been associated only with losing teams as Providence College has had in the last few years, but as many winning teams rolled forth from here in the past, and just as many winning teams and more will pour forth in the future.

But for as many losing teams as Providence College has had in the last few years, just as many winning teams rolled forth from here in the past, and just as many winning teams and more will pour forth in the future.

Artful Antidote Against the Best

By Francis S. Kanes
In the following article a formal ath- letic activity for the semester, the Providence College basketball team will for the second successful week, engage in two weekend games.

The first of these games will be played against Sacred Heart Univer- sity. For the season opener at St. Leo's Gymnasium this week.

The second meeting of the season for the Friars was a rout of the New England quartet, 84-74, at the Hope High School Gym last Saturday night.

Defeated in their previous outing by Bryant, 86-65, the Frosh showed their capabilities by being able to come back and win. In doing so, they ended a four game losing streak that started with the Brown- men.

Encouraged by the signing of four new candidates for his intramural bowling team, Captain John Lutho was working hard with his boys, trying to get them into shape for the forthcoming ring ring. Coach Louthia feels that although the prospects for the bowling night have been brightened by the addition of the four newcomers, he would still like a few more candidates, even if they can only start working out after exams. He assured the point that fellows need not worry about head injuries, because regulation headgear will be used for that purpose.

At Arizona, Vin Calhoun, Gerry Bashawya and Stan Hossawa are the fellows who signed up last week. Among those who have been working out regularly, several have been showing up well. John Xav, Dick Dragnan, Art Daglo, Dick Meam, and John McLaun were some of those who had had any finite experience before reporting. In any case, the boys have come a long way under the expert guidance of Coach Lutho.

An added inducement for fellows to become interested in the bowling team was the fact that it is possible that Arizona will be able to stay in the ball game until the end of the season. If the Friars were not disgraced measurably.

Lossocki and Art Weinstock at the pro shops are high scorers for the team.

Army Seeks Grads
In Technical Field

Commissions in the Regular Army are now offered to young men graduating from recognized colleges and universities and in February and June in approximately sixty-eight special technical categories.

These direct commissions as second lieutenants in the Regular Army are open to prospective graduates who meet the qualifications. The opportunity is being extended exclusively to individuals specializing in technical categories especially needed by the Army at this time.

Further details may be obtained from individuals specializing in technical categories.

Certainly, it is heaven upon earth to be able to consult with friends and fellow students. The opportunity to meet new people and to live in a foreign land.

The Army is seeking graduates in a variety of technical fields. These include, but are not limited to, Physics, Nuclear Engineering, Chemical Engineering, Meteorology, Geology, Industrial Engineering, Metallurgy, Mathematics, and Industrial Management.

Grants are available to students in these fields. Individuals interested in applying for a grant should contact the appropriate department or college counseling center.

Other opportunities may also be available, such as scholarships and academic awards. Students are encouraged to inquire about these options as well.
