Arthur Schlesinger
Speaks at College

Sunday evening, Feb. 6, noted historian and liberal advisor to the late President Kennedy, Arthur Schlesinger, spoke at Providence College to a large and enthusiastic audience.

Mr. Schlesinger, who presently has the number one best seller in the country, A Thousand Days, dealt with the problem of foreign affairs. He started by stating how, in a poll day headlines when not viewed in historical context can be misleading. His address emphasized the importance of historical considerations in the molding of foreign policy, for as Mr. Schlesinger pointed out, “the future begins with the past.”

The presidential advisor then turned his attention to Communism in the view of world affairs, its evolutionary changes and the fatal error of Marx’s Communist theory, the belief that the executive branch of a democratic government would represent the interests of the masses of the capitalist leaders. The success of both the left and right parties in Congress, and Schlesinger’s opinion, defeated the Marx’s ideology. It was the individual who must exercise the duties of society, he went on to say, that he’s happier to lose an election than to lose a fair time.

Continuing on the topic of communism and its relation to world affairs, the speaker pointed out certain changes in Communist thought which demand the failure of Marx’s ideology. He explained that the more affluent nations would be the ones to embrace his philosophy, however, but that communism has turned toward Communism are the backward and underdeveloped countries, he further went on to state that.

A Traffic Hazard

A short time ago an alumnus returning to the campus for the first time in about a year was suddenly met by a new addition to the College. It was not the new dorms and not the refurbished offices in Harkens Hall, but a pole in the middle of the road behind Raymond Hall. The result? A serious accident resulting in hospitalization — at least the third such accident in the shortest period of time.

Right from the beginning the possibility of such a misfortune presented itself and it is only a wonder that such an accident did not happen before. This pole, to which a chain is connected thereby preventing excessive traffic on campus at certain times, has been haphazardly placed right around a sharp corner. To any one unfamiliar with the area, especially in times of darkness or bad weather, this pole is almost unseen until the point of contact and in several cases this point of contact has been dramatically felt.

Though the original purpose of the restrictions, that of preventing outsiders from using the campus as a highway and shortcut, is a good one, in reality, the chain has not lived up to its full expectations. Incidents of speeding, as evidenced by the number of tickets, have not been lessened and even the chain itself has not prevented many from converting the field behind Raymond Hall into a thoroughfare.

We hope to see then that the barriers put up a few months ago have served no useful purpose but have only caused grief to many motorists. The barricade is "a speed bump" but it cannot prevent future mishaps on the practical level we must urge its removal. Maybe a solution would be to move the pole or at least put up a warning sign that it will be only a suggestion, but certainly something must be done to prevent future disasters.

A Timely Appointment

It was recently announced by the Chairman of the English Department that Mr. Edward McCrorie has been appointed to the post of Director of Freshman English. At other, larger colleges, this would be rather unimportant news. Not so here at the College. This is the first post of this sort and it is noteworthy that Mr. McCrorie does not yet have his doctorate. In all respects, this is a step forward in the history of Providence College. Now, the Freshman English program will have a greater continuity and at the same time, the "almighty doctorate" is not necessary for advancement. Can one imagine the changes and inroads it has become the practice of some schools to put in of-ficers of high rank instead of the person who knows the students best. Subject matter is not of primary importance but can, by using these methods, be the best guarantee to deterring student participation would seem to be the best guarantee to deter ruining his natural human per- ceptiveness and sapping his hu- man courage by barring him into the conception that if only he learns the proper methods of teaching, the student will risk himself in his classroom, in an effort to control and direct his students," Dr. Moore stated.

"Teachers try their whole lives not to be persons, to leave the 'schoolroom door,'" he continued. "They literally exhaust them- selves nothing but an encyclo- pedia full of information plus a collection of teaching 'meth- ods,'" Dr. Moore said. He be- lieves it is by his relation to the teacher as a person that the student becomes a person— through a face-to-face encour- ager with another.

"This results in the idea that we should do is to stop rushing his natural human per- ceptiveness and sapping his hu- man courage by barring him into the conception that if only he learns the proper methods of teaching, the student will risk himself in his classroom, in an effort to control and direct his students," Dr. Moore stated.

Ann Arbor, Mich. (I. P.) — The $2 million library building, which is another prime example of a collection of teaching 'meth- ods,' "Dr. Moore said. He be- lieves it is by his relation to the teacher as a person that the student becomes a person— through a face-to-face encour- ageer with another.

"This results in the idea that we should do is to stop rushing his natural human per- ceptiveness and sapping his hu- man courage by barring him into the conception that if only he learns the proper methods of teaching, the student will risk himself in his classroom, in an effort to control and direct his students," Dr. Moore stated.

And now let me turn to the subject of our nationally famous ROTC Brigade. Much has been said since the walkout and much, no doubt, will be said in the near future. The cadets and their commander, Cadet Colonel Dennis Quinn, have been warmly praised and vehemently contigated. Unfortunately, no one has, in my opinion, hit upon the truth of the matter. Colonel Quinn has been re- ferred to, variously, as a defender of the American way and an opponent of free speech.

Colonel Quinn is, indeed, a defender of America, but he is certainly no opponent of free speech. I am sure that Colonel Quinn never had any intention of denying Judy Collins's right to sing her song. What the ROTC com- mander was concerned about was that the song was an insult to the uniform that he was wearing. I am sure that Cadet Quinn would be the first to defend Miss Collins's right to sing her protest songs. This is inherent in the oath he must take as an officer, an oath that he will willingly stand by, both as an officer and as a citizen.
ROOMMATES: THEIR CAUSE AND CURE

You’d think that with all the progress we have made in the education game, somebody would have found a cure for roommates yet. It seems, as long as the human race remains as big a problem today as they were when Ethan Mather founded the college, the problem will follow us.

(Contrary to popular belief, Harvard was not the first. Mr. Mather started his institution some 100 years earlier. And quite an institution it was, let me tell you! Mr. Mather built schools of liberal arts, fine arts, dentistry and nursing. He built a lacrosse stadium that seated 200,000. Everywhere on campus was emblazoned the stirring Latin motto CAVE MUS—“Watch out for moos.” The student union contained a bowling alley, a weighing machine, and a sixteen-chair barber shop.)

(It was this last feature—the barber shop—that, alas, brought Mr. Mather’s college to an end. The student body, being drawn chiefly from the nearby countryside, was completely and refreshingly colorful, not entirely enduring. Mark you, I didn’t mind so much the fact that was only an hour or the string of firecrackers he set off on the half-second floor. But that and the singing chicken feathers every dusk and daybreak. What I did mind was that he sang them in my hat.)

To be fair, he was not totally taken with some of my habits either—especially my hobby of collecting water. I had to clean the room at the time, so I just had to stack the water any-old-where.

Well, things grew steadily colder between Ringading and me, and we might actually have gotten ugly one day. Ringading snapped his package, paused, smiled shyly at me, and offered me a gift.

“Thank you,” I said. “What is it?”

“Yak butter,” he said. “You put it in your hair. In Tibetan they call it ‘kisser; try it.”

“Wow, that’s a mighty gift,” I said, and offered him a gift from my package. “Now you must have one of mine.”

“Thank you,” he said. “What is this?”

“Personna Stainless Steel Barber Blades,” I said.

“You can try one at once,” he said. And did.

“Wow!” he cried. “Moreover, I cried, ‘Personna Blades come both in Double Edge style and Injector style.”

“Sort of makes a man feel humble,” he said.

We were both silent then, not trusting ourselves to speak. Silently we clasped hands, friends at last, and I am proud to ring in as one of Ringading’s friends to this day. We exchange cards each Christmas and firecrackers each Fourth of July.

The Providence College chapter of the Association for Computing Machinery held its first meeting of the second semester on Wednesday, Feb. 2. The meeting centered around the talks of three members of the Junior Class: James Tanne, Roger Roy, and Paul Courcy. Then Ramsay presented to the body of the organization general explanations of problems which they have programmed on the IBM 1620 computer.

Bob Noonan, ’96, head of the seminar program, announced the opening of classes in Fortran programming. These classes will begin Feb. 10, at 6:30 p.m., with a demonstration of the IBM and the element of the schedules. The course will last four weeks and will meet twice weekly. There is no charge and anyone interested is invited to sit in.

Jim Noonan, ’66, chairman of the speakers committee, informed us that several prominent men in the field of computing machinery will speak before the club in the coming months. These will include John Clark, IBM’s sales representative from Princeton University, a speaker from the IBM Corporation, a speaker from the IBM experimental systems, and Allen Ferry from the Worcester Foundation for Experimental Biology.

The next meeting will tentatively be scheduled for Wednesday, Feb. 23. The guest speaker will be Dr. McCluskey, speaking on “The Review of Switching Theory.” All students are cordially invited to attend. Also, anyone interested in taking up membership in the society may come to this meeting, or contact George McCabe in Room 310 Stephens Hall.

E. McCrorie Assigned

By ROB ROY

Mr. Edward P. McCrorie has been named the college’s first Director of Freshman English, the Rev. Robert L. Walker, O.F. English department chairman, announced today.

“The new post is a sign of the growth of the college,” Father Walker said. Such positions usually exist only in larger universities, he said.

Mr. McCrorie, who became a member of the Providence College faculty in 1964, will serve as an assistant to Father Walker and will preside at meetings of teachers of freshman English.

“I’m happy to get the appointment,” Mr. McCrorie said. “The more I look at the problems, the more difficult they seem to get. But this presents a great challenge.”

Working with freshman English teachers to produce a syllabus for freshman courses, he said, will be one of his first duties. Until now there has been only a statement of minimum requirements.

A native of Central Falls, R.I., Mr. McCrorie received his B.A. degree from Assumption College, Worcester, Mass., in 1962 and his M.A. degree from Villanova University, Villanova, Pa., in 1964. He taught English on a part-time basis at Villanova.

He lives with his wife and four children in Providence. He is the son of Mr. and Mrs. Charles Dawson of Central Falls.

ROTC Initiates New Program For Sophomores

The Military Science Department recently announced that members of the class of 1968 will be eligible to participate in the Reserve Officers Training Corps program at the college in their junior and senior years.

The two-year program leading to a commission as a Second Lieutenant in the United States Army was initiated last year. Basically the same as the four-year program, the student must attend a six-week summer camp between his sophomore and junior years in lieu of the basic course given normally in the freshman and sophomore years.

Dates of the camp this year will be 12 June-23 July and 19 June-30 July.

Upon successful completion of the Basic Camp the student will be accepted into the advanced course when he returns to the college in September. Students participate in the last two years of the program and will receive a monthly retainer of $40 as well as all necessary uniforms, books and equipment. This, plus pay for summer camp attendance amounts to approximately $1100 over the two-year period.

All students presently enrolled in the college who are interested in the two-year program are invited to attend a meeting in room C7 in the basement of Alumni Hall on March 1 at 3:00 p.m., and at this time more detailed information will be presented.

Mr. Edward McCrorie has been named to newly created post of Director of Freshman English.

Contest Deadline

The deadline for the annual writing contest of the Alembic, official literary magazine of the college, is March 1.

John Thompson, editor, has announced cash prizes for the best contributions to the quarterly magazine: essay, $30; one act play, $30; short story, $20; and poetry, $20.

Submissions may be left at the Alembic office in the basement of Aquinas Hall.

Student Paintings

An exhibition of paintings by students of the college’s evening art course will be presented in the lounge adjacent to the Alumni cafeteria until February 18.

The works were completed during the first semester by students of Art 121, a beginner’s course. The course, by permission of the Rev. Thomas R. Peterson, O.P., Assistant Dean of Studies, is open for credit to students of the regular college. Ten students are enrolled.

For the guy who’d rather drive than fly: Chevelle SS 396

This is about a Chevelle—a very special one—with a bulging hood, a black grille and red stripe nylon tires. Start it up and you’ve tuned in on 396 cubic inches of Turbo-Jet V8. Get it moving and suddenly you’re a driver again. With gears to shift. A clutch to work. Even a set of gauges to read, if specified.

Now take a curve, surrounded by a machine that delights in crooked roads.

This, you see, is an SS 396. A Chevelle, yes. But what a Chevelle.
Placement Process To Benefit Alumni

Now, through the miracle of electronic data processing, Providence College Placement Office can dispose a dramatic new service of many of the placement courses that have had in years of candidate in a matter of seconds.

Not since the advent of the College Placement Annual have there been revolutionary concepts upon the placement and recruitment scene. Interested graduates who have had at least one year experience in industry, employers of candidates in a matter of seconds.

When you can’t afford to be dull, sharpen your wits with NoDoz.

INTERVIEWS:
Sales and Management Training Program

This Program is designed to develop young men for careers in insurance sales and sales management. It provides an initial training period of 3 months (including 2 weeks in the Home Office School) before the men move into full sales work.

Those trainees who are interested in and who are found qualified after the management tests are assured of ample opportunity to move on to such work in either our field offices or in the Home Office School in sales.

The Connecticut Mutual is a 119-year-old company with 580,000 policyholders and over one hundred million dollars in assets. The program offers progressive expansion plans provide unusual opportunities for the men accepted.

Schlesinger On Foreign Policy

(Continued from Page 1)

humbled by the idea that class struggle involved in capitalism has not come to pass and that "Communism is not the model to which all nations are aspiring." The social system of Russia has changed and is changing, he explained. Schlesinger's opinion on the emergence of technical and managerial groups to fight for their interests poses a question of normalization, or as he termed it, of Russian social practices. Schlesinger pointed out that the conflict between Democrats and Republicans in the United States and Russia is dealing with nuclear weapons. This cooperation is not viewed by Cuba missile crisis, for Mr. Schlesinger believes "Russia learned that nuclear blackmail could not work." He sees that as an important historical turning point.

Mr. Schlesinger then turned his attention to the Soviet Union. He pointed out that his position is coexisting with regards to national role. He believes that the Soviet Union's position is coexisting with the rest of the world. One result of the 1960s was the attempt to have the privilege of two examinations during the fourth quarter as determined by the administering of two examinations during the fourth quarter. As a result, the Committee on Studies decided that the privilege will be reinstated for all seniors who have attained maintenance of this grade throughout the fourth quarter as determined by the administration of two examinations during the fourth quarter. Mr. Schlesinger spoke of two diverse courses of action which the United States may possibly undertake in dealing with the Vietnam situation. Our country may fight a ground war with a force of approximately three-quarters of a million men for some years and gradually defeat the Viet Cong, or it may strive for a peaceful settlement. The historian says a feeling of uprightness as a barrier in striving for a Vietnamese peace. Mr. Schlesinger drew his lecture to a close by condemning his opinion China has not been isolated, in that they have found followers in the new emerging nations of Africa, and so he felt that the problem does not present itself at this time. The final inquiry addressed to the historian was—did he believe the resumption of the bombing was a mistake? He said that the case made for the resumption of the bombing was not good enough.

Academic Changes...

(Continued from Page 1)

granted for all seniors who achieve a B average for the third quarter grade, with the condition maintained of this grade through the fourth quarter as determined by the administering of two examinations during the fourth quarter; thirdly, that with the status of a B average for the year; that is a B for the first year average, plus the combination of the third quarter grade, as determined by the administering of two examinations during the last quarter. In the case of a student who is a member of the senior class and who has a B average for the year, plus the combination of the third quarter grade, as determined by the administering of two examinations during the last quarter. In the case of a student who is a member of the senior class and who has a B average for the year, plus the combination of the third quarter grade, as determined by the administering of two examinations during the fourth quarter.

Miller Lectures To Legal Club

Last night in the Guild Room, Mr. William Miller, president of Textron, Inc. of Providence, spoke to the St. Thomas Day Club.

Mr. Miller was elected to his present position at Textron, a major diversified manufacturing company operating more than 100 plants in 30 states and several foreign countries, in June, 1960, at the age of 35.

Mr. Miller has served as the first national chairman of the Plans for Progress Advisory Council of the President's Committee on Equal Employment Opportunity from August, 1963, to August, 1965. The Plans for Progress Advisory Council was established by President John-son to implement the Plans for Progress program under industry leadership working in close cooperation with government agencies.

Born in Sapulpa, Okla., Mr. Miller was brought up in Bor- ger, Texas. He was graduated in 1944 from the U. S. Coast Guard Academy with a B.S. de-gree in marine engineering. Follow ing graduation he served as a line officer and took part in the Cuban missile crisis, and thirdly, the formation of the Southeast Asia Treaty Organization. The historian was—did he believe the resumption of the bombing was a mistake? He said that the case made for the resumption of the bombing was not good enough.

Letters to the Editor

The enthusiastic backing of the student body of our school has contributed a great deal to the spirit in time of victory. It is after the game that the Providence College students had set a standard for campuses around the country.

For the second straight year I am writing the Cowl to heap lavish praise on the student body and fans. It is again the unique spirit of our campus that made our game a standard for campuses around the country.

The scheduling of examinations for a seven day period requires the average student to have at least two subjects, one day after the other. In some cases, there would be two examinations on the same day and even the same examination may occur for two successive days. To expect a student to fully prepare for two tests on the same day or even two tests on successive days during such a short examination schedule only serves to sacrifice adequate preparation and appreciation of the course material.

A two week examination schedule with tests more evenly spaced is provided in many eastern colleges. The adequate preparation which such a well-spaced schedule would allow could not help but to improve examination results. In addition, it would allow the dedicated teachers more time to concentrate.

The type of test which has given much to be desired appreciation of an individual subject. It can be questioned that the common one hundred question "true-false" theology or philosophy requires an overall knowledge of a particular course rather than occasional all-night cramming which may not cover the entire semester's work.

It could not have happened to fully prepare for two tests on the same day or even two tests on successive days during such a short examination schedule only serves to sacrifice adequate preparation and appreciation of the course material.

To the Editor:

The past semester examination period has proved that there are a number of conditions which reveal a somewhat uncollegiate atmosphere at Providence College during the semi-annual test period. These conditions are quite flagrant and constantly occur during each examination period.

The study time allotted during the reading period does not take into account the actual amount of studying required for adequate preparation for a semester test. Taking even the maximum amount of time into consideration, only three days are allowed for a review of five to six subjects, not taking into account the "exam night" before the actual day of the test. This situation requires intensive cramming before examinations which may or may not cover the entire semester's work.

A more suitable reading period should be provided. In most colleges there is a week of pre-examination study allotted to reviewing the entire semester's work. Such an extended reading period would provide a truly adequate amount of time for six subjects. Only one day could be scheduled for each subject under these conditions and it would provide a better situation than now exists.

The Rhode Island Philharmonic Orchestra presented its fourth concert of the season on Saturday evening, February 5, 1966, at 8:30 in Veterans Memorial Auditorium. This "Evening at the Pops" turned out to be an evening of dismay, disenchchantment and distaste for this reviewer.

My dismay was occasioned by the selections offered. The first half of the program was at best satisfactory, although the appropriateness of some of the selections was questionable. The second half of the evening was in general an insult to good taste. There were instances here of not only just second-rate material but even third-rate trash. Leroy Anderson's "Sleigh Ride" was cute the first time, but no one really wanted another ride. To subject an audience to two "Sleigh Rides," Victor Herbert and pedestrian Robert Russell Bennett arrangements is audacious poor taste.

The evening was almost saved by the splendid work of the orchestra in the delightful "January February March." This was enjoyable music enjoyably played. Though the evening was disenchancing, Michaelini Chomicz was very enchanting in both looks and voice in her selections from Mozart, Meyerbeer and Puccini. Her performance of the aria "Ore dolci e divine" from Puccini's La Sonnambula was especially delightful.

The biggest disappointment of the concert came from the lackluster performances of Thomas's Overture to Mignon and Verdi's Grand March and Ballet Music from Aida. Mignon lacked the verve and sparkle that are inherent in this completely charming little work. The Aida selections were neither grand nor much of a march or dance. In this limp performance everything was lacking, especially in the way of interpretation. The high nobility of this great march and the primitive drive of the ballet sections were entirely absent.

To be completely fair I must acknowledge the fine musicianship exhibited by members and sections of the orchestra at various points in the concert. This shows that an honest effort was being made to cope with the ineptness of the second half.

A pops concert can be a most enjoyable evening, however, let us hope that we may be rewarded with a more substantial programming next season. Someone once said, "A pretty girl is like a melody..."—even if the melody is Monti's Czardas, Miss Chomicz alone could not save the show.

Letter...

If these students would like the idea of giving such books to the library at Paul Quinn. Perhaps also, in some cases, college bookstores in your State would find it feasible to ship spare quantities of good, current, college-level books to the library rather than returning them somewhere to be remaindered or abandoned.

This is as far as our thinking has gone on this. I am writing to ask if your, your paper, or a group at your school might want to take the pass and make a run with it. All I am really sure of it, that the students who come to the library at Paul Quinn ought to be able to choose from among shelves that are full of good books.

We know you will seriously consider this appeal for books for the students' use at Paul Quinn College. Books may be shipped EXPRESS-COLLECT to: Mrs. Delores Harris, Librarian, Paul Quinn College, Waco, Texas 76704.

Bernard Rapoport, Trustee
Paul Quinn College
Frosh Hockey Team Hampered by Injuries

Due to a number of key injuries the froshmen hockey team has been unable to live up to its potential.

The pucksters record to date is two wins, seven losses, and two ties. The team is third in the Quaker state, having won only 10 games in the past five years.

The reason behind the team's problems is lack of strength at the goalie position. Tom Feeley, who used to be the second string goalie, is now playing center. The defense has been split up and the forwards have been grouped together.

Injuries have also been a problem. Junior hockey players have not been able to play because they have been playing in local games.

The team is looking forward to the next season and hopes to improve its record.

FROM THE SPORTSDESK

By VINCENT MAROTTOI

Basketball

(Continued from Page 10)

Since the end of the first semester, the Froshmen basketball team has shown a great improve-
ment. Two fine wins over Stonehill College and a tough loss to Lehigh University have boosted the Froshmen's hopes for the remainder of the season.

Coach Gavitt feels that the team is finally reaching the potential expected of it before the start of the season. "The team has played well in every game and they have never given up," Gavitt said. This attitude, combined with the play-making ability of Al Hayes and Bill Harrington, the scoring of Bill Judkins, and the all-around play of Stu Marquis and Andy Clarkey, has paid off.

Gavitt feels that his team has finally adjusted to each other's play and that they are being more careful with the ball on offense. In the game played at Worcester, Leitner's overall size and a definite home court advantage were the deciding factors. Hayes had the scoring honors with 33 points, while Bill Judkins and Fazekas, both of Stonehill, had 23 points each.

The defense should be improved, but the coach added that defense is the biggest problem facing any froshman team. The defense will have to get tougher because the competition will be tougher.

Track

(Continued from Page 10)

The froshmen runners journeyed to the Philadelphia Inquirer Games in Convention Hall, where they were second in the distance medley relay. The time posted by the runners: Jim Schratz (1/4 mile): John Grange (1/4 mile); Henry Monticello (1 lap); and Bob Cook (1 mile), represents one of the closest ever run by a froshmen relay team at this distance. Of particular significance is the record established by Cook in the mile, as his 4:23.2 is the second fastest time ever run by a froshmen runner.

The Varsity travels to N. Y. for the N.Y.A.C. games in Madison Square Garden next Friday.
Mal Brown: Legend on Campus

By BOB FRIED

The story of Mal Brown is the story of a trainer who wore a derby hat and a white smile. It is the story of an outstanding athlete in the history of Amherst High, Mal late in helping Connecticut State, but transferred to Providence College, found a way of life here, and never left. Mal's rubbing table was a conditioner in more ways than one. In addition to relieving the aches and pains of the athlete, he was a sympathetic listener, a confidante of a personal kind. Mal's table was the center of the Friars' medical staff.

When asked if he took anything seriously, Mal replied, "Nothin' but my faith." Indeed, Mal had an unbroken fidelity to daily Mass and Holy Communion. Mix accomplishments in the lay apostolate are innumerable.

Defensively the Stags are not the Friars' match although the difference might not show up in an important tense game. They play a loose man-to-man defense, trying to help each other out. Bob Kovalski returns: Bob Kovalski is one of the unheralded members of the current Friar basketball team. A giant of a man at 6'8" and 225 pounds, Bob is now in running form into his second year of college and has become a welcome asset to the team. His 22 points and grab key rebounds as the Friars rallied to win.

Outside of BC, Fairfield ranks a brand of basketball. As Coach Gavitt described their offense, "The Stags have much the same type of personnel as the Friars but they play a different game. The Friars are good to Bob, and he in turn has been a stalwart for the Friars. His graduation will mark the end to a 4-year period. Bob has come through with many clutch performances for the Friars. His most memorable game was against Duquesne. He scored 38 points and grabbed key rebounds as the Friars rallied to win.

The Friar pucksters began rushing for a play-off birth, more than an athletic trainer—"the story of a trainer who wore a derby hat and a white smile." The Friar medical staff, led by Mal Brown, is the backbone of the team's success.
