Chafee to Lecture

John Chafee, governor of the State of Rhode Island and leader of the state's Republican party, will lecture tonight in Aquinas Lounge at 6:00 p.m. Mr. Chafee is in Providence to announce his plans for the future. He is expected to speak on positions on them?

From the job description given by President Johnson, it appeared that General Taylor is a special advisor for the President in exploring policy problems from the diplomatic to the economic.

Following Father Haas, Mr. Chafee, was sighted for his outstanding efforts in promoting student government.
In a little over two months the Class of '66 will see the hallowed halls of Providence College for the last time. It seems hard for many of us to realize that our stay here is nearing its end and I'm rapidly losing faith in the promise of us all graduating with mixed emotions. Yet, whether we are one of those hard boyled cynics seeing nothing but evil in life, or one of those who truly believe that the moral character of mankind is heading in the right direction, we all must face the fact that our stay here is nearing its end.

Since the heart of any school lies in its curriculum, it is only natural to wonder how we must turn when we speak of movement. Beautiful new buildings, re-decorated offices, these all help, but they are no more than "cooking on the cake" as the old saying goes when compared to the real core of the problem. That is to say, the problem of faith. I, for one, try to prolong our stay at the College, we all realize, in spite of many changes this year, that there is still much to be improved on—a fact which brings me to the point of my editorial.

To begin with, theology is, we suppose, a necessary evil in Catholic colleges. I say evil not because we are anti-religious in any sense, but rather because we are not in total agreement with the material used to teach theology nor in our concept of the subject matter itself. Caught in an age of disputed values and moral upheaval, the modern college student is looking for answers, answers to his own doubts and answers which will point him toward the one truth. I have written in my last campus comment about how the Catholic Church that it has had little or no effect on the smaller institutions within the Church—"cooking on the cake" by making it more meaningful to the modern student who, after all, is the proper object of theology. It is very disturbing to sit in the café and hear from many students that they honestly believe they are in danger of lessening their faith simply because of multiple experiences from the theology course. I do not wish to say that this is the case with all students but do wish to imply that it is the fault of all theology teachers, but, by the very fact that it does exist in many cases, I do not see how the problem can be avoided. It is ironical that in a time when Vatican II has made great strides in updating the Catholic Church that it has had little or no effect on the smaller institutions within the Church—such as Catholic colleges (though I do admit some are doing a great deal). We are looking for then is not to take religion out of the Catholic curriculum but rather to "put it back in" by making it more meaningful to the modern student who is looking for answers, answers to his own doubts and answers which will point him toward the one truth.

What then is the solution to this real problem? Though I cannot give a very exact answer, I must admit that I have no definitive answer, but then that has not been my purpose. I have simply tried to show that the problem does exist and that it is serious enough matter to be of extreme concern to the administration as a whole.

Our purpose. I have simply tried to show that the problem does exist and that it is serious enough matter to be of extreme concern to the administration as a whole.
Native of Greece Begins Teaching Career at PC

A touch of Greece has been added to the College's sociological department this semester in the person of journalist, translator, author and sociologist, Mr. Georgios Pan Piperopoulos.

Mr. Piperopoulos was born in Greece in 1942. His writings began to appear in 1960. A member of the varsity wrestling team, president of the Hellenic Society, chairman of the Student Activities Board, director of the International Student Services, he was a member of the varsity swimming team, and a member of the Sigma Alpha and Key Honor society, and was active in the Greek Society of New England, the Greek North, and the New Epoch, among others. In 1960-61 he wrote for the Greek North an anthology of short stories. He also won a national literary award in 1960.

In 1960, he came to America and entered New York City College where he majored in social sciences. At City College, he was a member of the varsity wrestling team, president of the Hellenic Society, chairman of the Student Activities Board, director of the International Student Services, chairman of the senior class, and a member of the Sigma Alpha and Key Honor society.

In 1963, he was awarded the Student Government Outstanding Service award. He was a member of the Best Foreign Student award. He was a guest at the International Conference held in spring, 1962, sponsored by the Commission on Intellectual Cooperation of the U.S. Department of State and the Greek Government. He received the M.A. degree.

At the university he wrote a series of guest editorials in the Collegian, the school's paper, and in 1963 he translated and published the Negro Protest by Dr. Kenneth Clark.

Mr. Piperopoulos is currently working for his Ph.D. while working as the U.S. correspondent for the Drausa Press Organization in Greece. He is also a research assistant for the Spanish-American Student Foundation project, Progress for Providence. He is writing a novel dealing with a realistic outlook of a Greek-American youth and hopes to publish by next fall a book on social problems in collaboration with the Office of the in-University of Massachusetts.

The first phase of the inspection team from Regimental Headquarters, North set to inspect team from Regimental Headquarters, North set to inspect the Regimental Team inspects the Orderly Room, the Files, and each officer's management of his section.

The inspections during the year plus the correspondence involved in running a company determine the Best Company Award, which is given at the last Drill Meet in Boston on April 30. Company K, always one of the best in the nation, has been doing exceptionally well this year, scoring a 90 on the last inspection tour. The P/R's hope to improve upon this score next week.
Lecture Scheduled For Monday Night

Dr. Eugene Guth, technical advisor to the director of the Oak Ridge National Laboratory, will speak here on Monday evening.

Dr. Guth will lecture on "Quantum Theory and Brownian Motion" at 7:30 p.m. in the Albertus Magnus Hall Auditorium. The lecture, open to the public, is another in the College's Distinguished Lecturers in Science Series supported by the National Institute of Health.

A native of Budapest, Dr. Guth was educated at the University of Vienna and was later research associate at Zurich, Leipzig, and Vienna. In 1937, he joined the faculty of the University of Notre Dame where he became research professor and established the polymer physics laboratory. He has been associated with Oak Ridge since 1948.

The Society of Rheology awarded its 1965 Bingham Medal—its highest honor—to Dr. Guth for his work in establishing quantitative foundations of the kinetic theory of rubber elasticity.

would give General Taylor "special assignments" and "seek his advice on diplomatic, military, economic and strategic problems that come to my desk."

General Taylor, who gained a reputation as an advocate of greater American military involvement in the Vietnamese war, especially in that obvious policy area.

In addition, the President had asked General Taylor "to undertake a review of all the practices and policies of our Government in the broad fields of assistance to free peoples who are threatened by Communist terror and subversion."

General Taylor, who desired to devote more time to his personal affairs, cited this wish in submitting his resignation as ambassador in July. The President, noting the 45 years the General had served his country, wishes to respect this desire.

For General Taylor, the assignment means a return to the inner workings of the White House, where he worked for three years in the Kennedy Administration. He resigned as Chief of Staff of the Army in 1963 in disagreement with the Eisenhower Administration's policies on nuclear warfare. But shortly after the Bay of Pigs invasion of Cuba in April, 1961, General Taylor was recalled by President Kennedy to serve as White House military advisor.

Then in 1962, with the mounting military crisis in Vietnam, General Taylor was made Chairman of the Joint Chiefs of Staff, which he held until his appointment as Ambassador to Vietnam in mid-1964.

When appointing General Taylor, President Johnson said the new consultant role "will give his country the benefit of his extraordinary experience and wisdom while permitting him at the same time to meet his personal and family obligations."

Allen Ferry Speaks
To Computer Club

Mr. Allen Ferry spoke to the PC Computer Club about the development and applications of the Laboratory Instrument Computer (LINK) recently.

Mr. Ferry discussed operating principles and programming of LINK and listed practical applications of the computer's abilities.

Dr. McCluskey of Princeton University will address the club tonight on the switching theory.

On April 2, a representative of the IBM Corporation will be on campus to tell club members about the make-up compilers, heart of the computer programming languages. The public is invited.

He didn't change his hair cream or his mouthwash or his deodorant...
Marine Corps Lt. Daniel M. Walsh, a member of the Providence College Class of 1965, has been wounded in Vietnam.

According to unofficial reports, the young lieutenant's wounds, to the shinbone and thigh, are not serious.

Lt. Walsh joined the Marine Corps while still at PC, under the training program here, and was commissioned a lieutenant upon his graduation last June.

He has been in Vietnam only since last November and previously had been in Hawaii.

The Air Force recruiting office in Providence announced yesterday that it has opened all categories of training through the Officer Training Program. Applications are being accepted at the present time for immediate consideration.

The training categories include pilot and navigator training, scientific, technical, and administrative fields.

The Officer Training Program is a three-month course at San Antonio, Texas, leading to a commission as a second lieutenant in the Air Force Reserve with an immediate call to active duty upon completion.

Interested students should contact the Air Force recruiting office in downtown Providence.

Rhode Island motorists have been slow in renewing their 1966 motor vehicle registrations. Registrar James F. Williamson stated that it appears likely that a large number of car owners will be caught in a last minute rush if the pace of registration renewals does not pick up. Thus far, there have been 290,000 motor vehicle registrations renewed, out of a total vehicle registration of 432,000.

The Registrar again advised all car owners to mail in their applications and avoid a last minute rush. Checks or money orders should be made payable to the Registry of Motor Vehicles. Do not send cash, as the Registry will not be responsible for cash sent through the mail.

Take a look at the above chart; then a good long look at Pratt & Whitney Aircraft—where technical careers offer exciting growth, continuing challenge, and lasting stability—where engineers and scientists are recognized as the major reason for the Company's continued success.

Engineers and scientists at Pratt & Whitney Aircraft are today exploring the ever-broadening avenues of energy conversion for every environment . . . all opening up new avenues of exploration in every field of aerospace, marine and industrial power application. The technical staff working on these programs, backed by Management's determination to provide the best and most advanced facilities and scientific apparatus, has already given the Company a firm foothold in the current land, sea, air and space programs so vital to our country's future. The list of achievements amassed by our technical staff is a veritable list of firsts in the development of compact power plants, dating back to the first Wasp engine which lifted the United States to a position of world leadership in aviation. These engineering and scientific achievements have enabled the Company to obtain its current position of leadership in fields such as gas turbines, liquid hydrogen technology and fuel cells.

Should you join us, you'll be assigned early responsibility. You'll find the spread of Pratt & Whitney Aircraft's programs requires virtually every technical talent. You'll find opportunities for professional growth further enhanced by our Corporation-financed Graduate Education Program. Your degree can be a BS, MS or PhD in MECHANICAL + AERONAUTICAL + ELECTRICAL + CHEMICAL ENGINEERING + PHYSICS + CHEMISTRY + METALLURGY + CERAMICS + MATHEMATICS + ENGINEERING SCIENCE OR APPLIED MECHANICS.

For further information concerning a career with Pratt & Whitney Aircraft, consult your college placement officer—or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

Specialists in power...power for propulsion—power for auxiliary systems. Current Utilizations include aircraft, missiles, space vehicles, marine and industrial applications.
by JOHN MCDONALD

I have been involved these past few weeks in the production of an experimental film that will have several public showings, and I can assure the reader the experience has its unique rewards.

The movie, entitled "Phyche-dylie Reflections on Olneyville" or ("The Journal of Oodlight") concerns a man and his complex attitude toward this historic section of Providence. The movie however does not stop there. It priess the surface and uncovers the inner frustration of a man at odds with his city.

The movie opens with a quick series of cleverly arranged scenes filmed in different areas of Providence. The central character is immediately established as a man of great contrast. He is a man of wealth and stature and yet he has great compassion for the poor. He seems to be a man on the move and yet his life is stagnant. He loves power and glory but hates war and greed. These contrasts re-occur throughout the film.

There are times when the viewer can get quite involved and other times when involvement is quite impossible.

Some of the scenes are very funny and only because of their complete absurdity.

The sound track of this movie deserves some mention. It includes a mixture of classical, rock 'n' roll, and Bing Crosby type music, automobile engines, human voices, animal sounds and factory noises.

The scenes mount in tension both visually and audibly and a fast moving chase scene follows. The identity of the chaser is never known but the torment of the chase is shown to us on the face of the chased.

The movie ends quite abruptly with very little resolution.

Bookstore Announces Return of Textbooks To Their Publishers

All unsold second semester textbooks will be returned to the publishers on April 7, 1966, the bookstore has announced.

Postage will be charged on any book which must be re-ordered after returns have been made.

Congress Hopefuls To Be Interviewed On Campus Radio

Paul Giannelli and Dan McKinnon, juniors, both seeking the presidency of the Student Congress, will be heard tonight over WDOM Radio.

An interview by Larry Walsh, assistant manager of the Friar Bookstore Announces Return of Textbooks To Their Publishers, with Gerry McCuen, newly-elected Cowl editor, is scheduled for 6:30.

It may be heard by campus residents on the AM dial at 600 and by commuter students on the FM dial at 91.3 WDOM is currently conducting program tests.

The permission for such testing is a prelude to the actual granting of the broadcast license which is still being processed by the F.C.C. WDOM is now operating on 10 watts of power which is the licensed rating, covering the greater Providence area.

A note of thanks to all who supported me during the past campaign.

Sincerely,

Vice President
Joseph Pilla

THE COWL, MARCH 23, 1966

Father Hogan Announces Cost of Library

A figure of three million dollars was given by Rev. Ernest Hogan, O.P., librarian, as the cost for the proposed library. This was announced at a meeting held for the heads of student organizations on Thursday of last week.

This figure does not include the cost of the stacks, flooring and furniture. Fr. Hogan expects that purchases of books will run up to subsequent million dollars. Presently the college has $700,000 in the building fund.

Fr. Collins, O.P., a member of the Library Committee, stated last December plans for the new library really began moving with the support of Fr. Haas, O.P., President of Providence College, and Fr. Hickey, O.P., Vice President.

Fr. Collins praised the expert advice given by Mr. McNiff, the director of the Boston Public Library and formerly on the staff of Harvard University. He cited the remarks of the architects who are planning the new library, by saying that they felt that the campus is excellently laid out and displays great potential for expansion. Father pointed out that members of the Library Committee have visited many college libraries in an attempt to acquire beneficial information on the construction of such a building; many valuable insights were gained from these visits.

Fr. Hogan gave a short history of the library and its conception. Plans for the library fund were first discussed in 1932. At that time a library was proposed which would have been located opposite the present Science Building. It would have been two stories and have a capacity for 50,000 volumes. However these plans failed to materialize.

With regard to the present library proposals he stated that the original cost of the building was two million dollars. Yet with the recommendation to construct a basement floor and other needed expansions, the cost has come to three million dollar mark. "The figure may still go higher," Father said.

The library will accommodate 1,500 students; any library which has a capacity for 40% of the student body is considered to be excellent. At this time the library will be located in between McDermott and Martin Halls. It will have a space of 92,000 square feet, again this is considered excellent for any college library. These plans are still tentative, in new circumstances and data arise plans may be revised.

Phone Sermons

(Public Information Office)—A one-minute spiritual thought is now available 24-hours a day by dialing a Providence telephone number.

By dialing 351-3370, the caller will hear a sermonette sponsored by the Providence College Chapter of the Third Order of St. Dominic, a group of laymen and women affiliated with the Dominicans Order.

Rev. John C. Bobba, O.P., moderator of the group, said that the sermonette will be changed every three days.

proper authorities by Michael Dooey, '68, and Daniel Blessington, '69, for hanging campaign posters before the legally scheduled time. Richard Cuffe, '67, replied to Edward Dunphy, '68, as to why the rule was interpreted that the class day ended at 6 o'clock midnight. Mr. Cuffe replied that the posters should have come down before the class ending day. He stated that it was his personal neglect that one of Mr. McKinnon's posters remained up and as such he apologized.

Malcolm Holmes, '66, went on record as disapproving the spirit of the resolution. A resolution introduced by John Cullinan, '66, that the Congress as a whole reject the complaint made by Mr. Dooey and Mr. Blessington, was passed.

Gregory Smith, '67, asked Edward Dunphy, '68, Chairman of the Bus Committee, why liquor was allowed on the buses that went to the St. Jospeh's game. Mr. Dunphy replied that since he did not go down by bus someone had allowed the bus driver to stop at a package store. He further added that only one complaint had been made so far. Mr. Smith made it clear that the fact that the incident occurred at the liquor store was not good for the reputation of the College.

Five athletic resolutions were passed by the Student Congress congratulating: (1) James Walker for being named All-American, (2) William Blair for being the number one foul shooter in the nation, (3) Barry Brown and Jerry Riordan for qualifying for the NCAA finals, (4) Coaches Mullany, Toppazini, and Hanlon for having winning 20 games for the eighth consecutive year.

One half-fare ID card is as good as another on Eastern to Florida or 79 other places.

Show us any airline's youth ID card. If it's valid, you'll pay only half price for your Eastern Coach seat (except on April 7th and certain days during the Thanksgiving and Christmas holidays). Provided there's a seat available at departure time, you can fly off on your spring vacation to any of our 96 destinations within the continental U.S. including Florida.

If you don't have such a card, and you're 12 through 21, it's a snap to get one from Eastern, as long as your parents don't object. Fill in the blank below. Send the blank, a photocopy of your birth certificate or other proof of age, and a $3.00 check or money order (payable to Eastern Airlines) to Eastern Airlines, Dept. 350, 10 Rockefeller Plaza, New York, N.Y. 10020. Or take same to any Eastern ticket office, and you can buy your half-fare ticket on the spot. We'll send you your ID card later.

EASTERN NUMBER ONE TO THE SUN
Congress Candidates...

(Continued from Page 1)

years, the Dean's List every semester, a full tuition scholar­
ship for four years from the Sears & Roebuck Company.

McKinnon: Membership in the Rhode Island Scholastic Honor Society, runner-up for the title of "R. I. Schoolboy Athlete of the Year" in 1963, Blackstone Valley "Rotarian Schoolboy of the Year," based on scholastic and athletic

achievement.

What are your specific plans, if elected?

Giannelli: Generally, to make the students more aware of the functions of the Congress, especially its function as represent­
ing the students to the administration; to have the students avail themselves of the oppor­
tunities to use the Congress as a channel.

Specifically, I would have the Student Congress solicit votes, and directory distributed early in the school year; mixers in Raymond Hall; effective trans­
portation for sports events; I would support the Dillon Club and also the classes regulating the sale of basketball tickets at Alumni Hall.

McKinnon: To consolidate the Student Congress with other functional and useful tool of the student body, to have the SC, upon a thorough investiga­
tion, give a detailed report on exactly what the ticket situa­
tion for basketball games is and could be made; to insure that no weekend would go by with­
out a social function being held on campus, so that the campus would then be attractive to the dorm and day-hop students; to have

more accessable and workable relationships between the stu­
dents and the administration in order to help the students with their

problems.

What do you consider to be the purpose of the Student Con­
gress?

Giannelli: The Student Congress is the service organization of the student body. While at­
tempting to provide the students with every possible bene­
fit, it is the obligation of the Congress to effectively repre­
sent student views and needs to the administration. There­fore, I would designate "service" and "representation" as the dual roles of the Student Con­
gress.

McKinnon: In my opinion the Providence College Student Congress is the backbone of the student body. It is the only means by which the students may become an integral part of the college. The congress should represent the student body's point of view when trying to arrive at as

available solution to all cam­
pus problems. The congress should set standards for its membership, conducive to the college's motto, "A Providence College man is a gentleman." The congress should stimulate a love and interest in Provi­
dence College that will carry over into graduate days.

Friar Council Holds Third Degree

The honors of the major de­
gree of the order were bestowed Sunday on a class of 41 candi­
dates from the newly formed Friar Council No. 3767.

Friar Council was instituted last December on the campus of Providence College and is the first college council ever to be formed in Rhode Island.

Peter J. Driscoll of Staten Island, N. Y., was chairman of the class named in honor of the late Rev. Bernard P. Shafer, O.P., former superior of the Dominican Community and a member of the faculty at the college.

District Deputies Leslie D. Lemenix and John R. Reynolds and their staffs officiated at the ceremonies which were held at the Rev. J. J. Bourdais coun­
cil home in North Providence.

Grand Knight John P. Mc­Bride of Teenack, N. J., pres­
ident of the meeting and intro­
duced State Deputy John W. Holland who welcomed the new members to the order.

Other speakers included State Warden Joseph E. Dailey, Jr., and the Rev. Damian R. Myett, O.P., Chaplain of Providence College and also Chaplain of Friar Council.

A collation followed in the council lounge.

Cowl Banquet Listed for May 4

The annual Cowl banquet will be held on Wednesday, May 4, at 6 p.m., at Oates' Tavern on Douglas Avenue, North Providence.

All members of the staff who wish to attend the affair should sign up on the sheet provided on the bulletin board in Har­

kins Hall rotunda. Those who sign up will be notified by Mr. Flynn, designer for Dieges & Clust, the ring's manufacturer.

The significance of the design of the sophomore ring has been outlined by Mr. Flynn, designer for Dieges & Clust, the ring's manufacturer.

The ring will incorporate three basic thoughts, according to Mr. Flynn: 1) the growth of PC; 2) the fiftieth graduating class, and 3) a tie-in with the new president, Father Haas.

Points one and two, Mr. Flynn said, were "achieved by contin­
uing the torch on the ring's standard "side as a modern or contempo­
rary torch."

The flame itself forms the numeral fifty. "In other words," he said, "it is the traditional PC torch of truth spanning fifty

years to the present day gradu­

ates.

Concerning the third thought, Mr. Flynn said: "The bold con­
cept of the Friar is reminiscent of Spanish art and sculpture and the Dominican Order origi­
nated in Spain) and suggests an aesthetic quality. The new look of the Friar, as Father Haas, known for his pro­
cessional style, with both hands in his pockets and his "live interest in art."

Officials from Dieges & Clust sign up to design the rings for rings in Alumni Hall's cafeteria annex until Fri­

tday.

When you can't afford to be dull, sharpen your wits with NoDoz™

SAFE AS COFFEE
Linkmen Begin Practice: Hurt by Graduation Loss

With the advent of spring, the PC Golf Team is ready, once again, to invade the neighboring courses. Although crippled by the loss of three seniors, Bruce Gilmore, Pat DiPadua, and Mike Seavey, the outlook is good. Coach Prisco feels that, "We have lost three strong men through graduation and we've picked up a few good boys. As a result this year's team is not quite as strong, although it does have a great deal more balance."

Returning from last fall's squad are Senior Captain Joe Monahan, Jack Guiragus, Craig Galipeau, Dave Grebutschak, Dennis Webber, Dave Adamo, Bill Sampson and Paul Salm. The squad normally carries 10-12 men with seven of those being regulars and the remainder being alternates.

Any improvement over last year's line 113 record could prove to be quite difficult. Many of the East's better teams, including R.C., Holy Cross, U.R.I. and Trinity, are on the sched-

ure. Last Fall the Friar tourneys were won by Grebutschak and Galipeau and Grebutschak qualified as one of the two teams (out of 22) chosen by the ECAC in this area. U.R.I. was the second choice. They went to Long Island, New York, where they placed seventh.

The first practice session is scheduled for tomorrow in preparation for their first match on April 11.

The New England Tournament, in which the Friars will be a participant, is currently set for 12:30 on May 15. Each participating school will have a free-man team in an attempt to capture the individual and team championships. The outlook of the N. E.'s is considered for one of the two NCAA eastern tourney bids.

Thus the prospects for this year's edition of the Friar Golf team rests upon their ability to take in the slack left by graduation.

Dick Neal, Joe Twomey, and Jim Bishop hitting the boards could be tough to stop.

The New England Tour-

nament, in which the Friars will
disadvantaged as a team. Jack plays a volatile game and is so quick that he can return a shot no matter how close he is to the wall or what position he is in. His diving returns are morale shattering to an opponent. Fr. Hall describes him as "quiet but effective." Roger, on the other hand, comes out and immediately slams into the walls, with real vigor, and dives onto the floor to accu-
tom himself to contact so that he will never quit on a shot. His warmup itself is brutal. But even then you are not prepared for his fiercely competitive attitude which results in an all-out effort. Roger won that match with a combination of brilliant "kills" and stamina, wearing Jack down in the third game.

The match that followed exhibited the comple-
mentary nature of their games which makes them so devastating as a team. Jack plays a volatile game and is so quick that he can return a shot no matter how close he is to the wall or what position he is in. His diving returns are morale shattering to an opponent. Fr. Hall describes him as "quiet but effective." Roger, on the other hand, comes out and immediately slams into the walls, with real vigor, and dives onto the floor to accu-
tom himself to contact so that he will never quit on a shot. His warmup itself is brutal. But even then you are not prepared for his fiercely competitive attitude which results in an all-out effort. Roger won that match with a combination of brilliant "kills" and stamina, wearing Jack down in the third game.

But even their personal rivalry is not the whole story. They have encouraged as many as twenty-five students, and maybe many more through these, to take up the game. In the last two years "our equipment was always out on loan," Jack once remarked. Also, an alumnus and frequent opponent of theirs, Mr. Vincent Patience, donated a dozen handballs and pairs of gloves to the athletic department. The handball revival which they helped to start and which is evident from increased use of the courts and more entries in the tournaments, should continue to grow.

The match that followed exhibited the comple-
mentary nature of their games which makes them so devastating as a team. Jack plays a volatile game and is so quick that he can return a shot no matter how close he is to the wall or what position he is in. His diving returns are morale shattering to an opponent. Fr. Hall describes him as "quiet but effective." Roger, on the other hand, comes out and immediately slams into the walls, with real vigor, and dives onto the floor to accu-
tom himself to contact so that he will never quit on a shot. His warmup itself is brutal. But even then you are not prepared for his fiercely competitive attitude which results in an all-out effort. Roger won that match with a combination of brilliant "kills" and stamina, wearing Jack down in the third game.

Also, an alumnus and frequent opponent of theirs, Mr. Vincent Patience, donated a dozen handballs and pairs of gloves to the athletic department. The handball revival which they helped to start and which is evident from increased use of the courts and more entries in the tournaments, should continue to grow.

Tonight Jack and Roger meet for what might be their last championship, head-on encounter before they enter the postgraduate world. The match is at 6:30 in the Alumni handball courts. Jack said, "It should last a while," and I recommend it.
Track Team Captures 3rd Place at UConn Meet

Doherty, Lamoriello
To Captain Bucksters

By TOM HUTTON

In its annual election last week, the hockey team selected two junior forwards as captains for the 1966-67 season. The captains-elect are Jack Doherty and Nick Lamoriello. Jack, a business major from Boston, Mass., came to PC in 1963 as a graduate of St. Sebastian's High School in Newton, Mass. At St. Sebastian, Doherty was a leading scorer and captain in his senior year. Personally, one of the best independent teams in Massachusetts, the Saints in Jack's senior year beat the eventual New England champs, Melrose, 7-4.

While at Providence College, Doherty has finished high in the scoring in both his sophomore and junior years. A left-winger on the "yellow-line," along with Lamoriello and Jerry Menard, "Moose" showed that he was one of the best all-around hockey players on the squad.

Defense and Hitting Set; Injuries Plague Pitchers

By PETE MEADE

"This is the earliest that we have ever had outdoors." With these words Coach Nahigian has summed up the progress of the 1966 Varsity baseball team. Only with good weather are the Friars permitted to practice outdoors and sharpen their hitting and fielding skills, and this spring has provided the team with ample time.

Daily intrasquad games, brisk wind and outfield drills, and concentration on the fundamentals have highlighted the practices to date, with the emphasis being placed on defense right now.

"We try to prepare ourselves mentally for the season now in order that the players will be set properly to avoid mental lapses during the later stages of the season."

Coach Nahigian has stressed defense against the variety of base-running tactics which opposing teams will undoubtedly employ, such as the double steal. Working on relays and cutoffs from the outfield, this year's edition of the baseball Friars has been improving in its timing and is progressing rapidly.

With the season opener only nine days away, Coach Nahigian has been testing his pitching corps thoroughly, but is experiencing some difficulty. sore shoulders, aching backs, and torn muscles, are hampering the progress of the pitching staff and could prove to be a problem in the early part of the season.

"There is more to hockey than just scoring. A good hockey player has to be able to fake in around the cage of all defenses against the variety of opponent forwards. I knew that he should be able to fake in around the cage of all defenses including former Friars: Dan Sheehan, Bill Warburton, Chuck Gaffney and Tom Fecteau. The goalie from that team was Jack Ferriera who passed up an offer from P.C. and went to B.U. where he has made All-America and can two seasons in a row."

"Looking back at that year," remarked Lou Cimini, La Salle Academy hockey coach, "I remember that Nick was a natural." Nick said that the pucksters should enjoy a good season. "The big problem will be replacing goalie John Campbell, John kept us in a lot of games this year. We had a good goalie on the freshman squad this year and I think that he could have been our starting goalie." (Continued on Page 9)

"Cowl" to Give MVP Award

Carolan Club to Host Five School Tourney

The Carolan Club's Sixth Annual Invitational Basketball Tournament will get under way this evening at 7 p.m. at Alumni Hall.

Representatives from six different colleges will participate in the event, with P.C. sending two squads—the Dorm League champs and an all-starter team.

Tonight the "all stars" will face Brown's entry, Delta Tau Lambda's High School in Newton, Mass., for the 1965-66 Varsity basketball title.

ment which starts today. This win made it 26 in a row for the Friars and earned them a berth in the Carolan Club Invitational Tournament which starts today. This win made it 26 in a row for the Friars and earned them a berth in the Carolan Club Invitational Tournament which starts today.

"The Perps' Sulphur" JACK FEASILL scores another bucket as his team won the best-three-of-three against the Rats, earning them a berth in the Carolan Club Invitational Tournament which starts today. This win made it 26 in a row for the Friars and earned them a berth in the Carolan Club Invitational Tournament which starts today.

Last Saturday, the Friar track team almost toppled the Connecticut Relay team crown at Stonybrook, but fell short by one mile relay. This was a tremendous effort in the final event, the mile relay.

Said Skidmore outstanding throw-off star, Donnelly, "We have every reason to be satisfied with our performances, but we could have placed in every other team in the meet, the Friars were still leading going into the final event, the mile relay."

The 1965-66 varsity basketball title was decided late in the season with a game against Brown. Brown's winning time was 12.6. To paraphrase one point.

The fact that there was no run rule (PC's) for the first time this year, Brown had the lead at the 12:15 point to win the game. "This was a good enough edge to edge the Friars for the win," said one point.

"There is more to hockey than just scoring. A good hockey player has to be able to fake in around the cage of all defenses including former Friars: Dan Sheehan, Bill Warburton, Chuck Gaffney and Tom Fecteau. The goalie from that team was Jack Ferriera who passed up an offer from P.C. and went to B.U. where he has made All-America and can two seasons in a row."

"The big problem will be replacing goalie John Campbell, John kept us in a lot of games this year. We had a good goalie on the freshman squad this year and I think that he could have been our starting goalie." (Continued on Page 9)

The three other final-quarter games ended with the expected outcomes. The Friar team did everything right except their defense. The team had some difficulty, but were able to control both backboards and limit Waterbury to one shot at a time. Jack Doherty was a standout in defeat for Waterbury as he scored eight of the Friars' 26 points in the last two minutes, but the rally fell short and Met Men won.
