Residence plan: No action imminent

By Thomas Brown

Last semester, a task force was appointed by Rev. Thomas Peterson, O.P., President of Providence College, to study the campus housing situation. Specifically, the committee, chaired by Donna McCaffrey, was formed to look into alternatives concerning a possible increase in dormitory compartments. That task force has since presented its recommendations to Fr. Peterson. Simply put, its advice was to “do nothing.”

The committee actually made two reports to Father Peterson. Rev. Walter Heath, O.P., Director of Residence and a member of the special task force, said that the first set of proposals was rejected. The committee’s initial findings, said Father Heath, were that the President should immediately abandon the current proposals; the Guzman-East proposal would be implemented; the Guzman-East proposal should be followed through since four persons rooms be eliminated; and the procedure for assignment of rooms remain the same.

With regard to a lottery, the task force decided that “time had run out on Father Peterson’s promise,” said Father Heath. Last semester Fr. Peterson announced that if a lottery were to be held this year it would be notified in the fall, preferably in October. “It would be bad public relations to go with a lottery now,” said Fr. Heath, and the main concern was that if the student population was on the increase, continued Fr. Heath, “we would be talking about a lottery next year.”

The factors indicate that the population is in a pattern of decrease. “Four years ago,” said Fr. Heath, “we had 3,496 students at P.C.” “This year,” he added, “we have 3,388 students and will have 3,350 next year.” Fr. Heath also pointed to a statement by Father Peterson, Director of Admissions, that six years ago there was a 36 percent fewer high school seniors than today.

This decreasing market has been a crucial issue in the progress of any dormitory expansion. The administration, said Father Heath, feels that it is not wise to spend over $300,000 on dormitories, in a declining market. The $300,000 number of female applications has increased. Male applications have also increased for two years in a row, but were down slightly last year. “It is still too early to predict a definite trend of male/female applications,” said Father Heath. “We are going to wait and see what we have in terms of an incoming freshman class,” he continued.

After having their first set of proposals rejected, the task force on campus facilities drew up a second set of recommendations. In view of the different factors affecting the housing situation, said Father Heath, they suggested the President do nothing. On January 9th of this year, Father Peterson released a letter saying that he would be implementing the Guzman-East proposal, said that the special task force has since presented its recommendations to Fr. Peterson. It was sent to the President. The idea for such a store was developed in 1976 by Rev. Lynn Lawton and Sharon Trayes ‘80. They studied other college plans such as food co-ops and food and variety stores. After meeting with many food distributors and student representatives, the food and variety store concept was chosen. It was sent to the Committee on Administration two years ago, but was tabled because of many unanswered questions such as who would manage the store and how the store would be stocked. It has been decided that two senior accounting majors will manage the store and Mr. Joseph Murphy, Director of Food Services, will oversee supply of the stock.

After $3000 and $3000 miles

The Bell Will Toll Again

By Carol Perri

Due to overwhelming support and enthusiasm, the bell atop Alumni Hall will be ringing soon. In the midst of November the Student Congress, led by Kerry Rafanelli, began making plans to raise money to get the bell ringing. Because of the collections, contributions, and different efforts of many people, the money raised was Student Congress members, with the assistance of other interested students, spent much time collecting for the bell, not only in dorms, but in Slavin Center and extracurricular activities.

The bell is a Westminster Chime bell which will have two speakers. The bell is located on top of Alumni Hall and has been silent for twenty-two years. It was a gift from the Class of 1917, and was then said to be worth $2,000. $5,000 was necessary to have the bell sent to the West Coast to be fixed. The student body and the staff contributed a total of $1,500, the College contributed $1,000, and the remainder was donated by outside contributors. To replace the whole bell system would now cost close to $8,000 and the overall system is said to be valued in total at $30,000. Student Congress will donate an additional $200 as a maintenance fund for the bell. Fafih Park will be responsible for its maintenance here at P.C.

It was sent to California about two weeks ago to have the timing device fixed and the amending system overhauled. On January 23rd, the bell will be installed and it should be ringing shortly after that. It will now be a multi-purpose unit which can serve not only as a victory bell but can also ring for weddings and funerals.

The latest date for the bell to begin ringing is February 15th. Kerry Rafanelli, president of Student Congress, would like to thank everyone who participated. He was quoted as saying, “Something like this is a class gift shouldn’t be idle. It was a different kind of communication because it wasn’t merely changing something but constructively restoring a very significant item.”

This brought the school closer since everyone worked together and contributed in some way to complete this important project.”

John J. McGrath welcomed as new Placement Co-ordinator

By Karen Ryder

The Providence College Counseling and Placement Center welcomed a new Placement Coordinator on Monday, Jan. 14th. John J. McGrath replaced Mr. Joel Cohn as the co-ordinator of Placement and Career Planning, effective January first. Prior to his arrival at Providence College, McGrath had worked for two years at Bradley Associates, a career counseling firm. Before that he was the program co-ordinator for a Division of Employment Security in Tacoma, Washington. McGrath also holds a B.A. and an M.A. in English from Fordham University.

As Placement Coordinator, McGrath’s responsibilities include giving seminars on how to write an effective resume and how to conduct oneself in a job interview, as well as inviting various businesses to PC.

Prior to his arrival at Providence College, McGrath had worked for two years at Bradley Associates, a career counseling firm. Before that he was the program co-ordinator for a Division of Employment Security in Tacoma, Washington. McGrath also holds a B.A. and an M.A. in English from Fordham University.

As Placement Coordinator, McGrath’s responsibilities include giving seminars on how to write an effective resume and how to conduct oneself in a job interview, as well as inviting various businesses to PC.

McGrath stated that McGrath will be working closely with students because they feel that, “students need to take a very active role in their search for a job.” She went on to say that the staff of the center “feels that Mr. McGrath will bring a new dimension and new creative ideas to the Placement Center.”

Mr. McGrath was quoted as saying, “I know from previous acquaintance with PC it’s a good place to grow not only academically and professionally, but as a human being, so I certainly look forward to being a part of that effort.”

Obituary

Rev Joseph B. Taylor, O.P.

The Rev. Joseph B. Taylor, O.P., Providence College’s Associate Athletic Director, for 15 years, who was credited along with the late Rev. Aloysius B. Blegy, with building the college’s nationally-recognized athletic programs, died Dec. 11, at our Lady of Fatima Uni of St. Joseph’s Hospital. A long-distance resident of Columbus, Ohio, Father Taylor was ordained a Dominican priest in 1931. He graduated from Providence College in 1926 and completed graduate studies in romance languages at Catholic University. A year after Alumni Hall was constructed in 1933, Father Taylor returned to Providence College and was named Associate Athletic Director. In addition to working with Father Blegy in developing one of New England’s most respected sports programs, he was a faculty member in the College’s foreign language department.

He came to Providence College from Aquinas College in Columbus, Ohio. The Rev. Blegy spent 23 years at the high school. He served as Assistant Principal and Religious Director for 16 years and was named Principal and Religious Director of the Ohio Dominican Community for his last seven years at the Ohio educational institution.

After stepping down as the College’s Associate Athletic Director in 1971, he continued to teach Spanish in the Foreign Language Department.

Planning Committee.

reviews requirements

The Planning Committee of the College has begun to review all academic departments and programs this year. The Committee has initiated a departmental review and has requested that the Faculty Senate reassess the College’s general degree requirements. The Academic Affairs Committee started this phase of the review last semester. It will report its findings to the Planning Committee, which will then make recommendations to the Senate for legislative action.

As part of its review, the Academic Affairs Committee will hold a series of open meetings on all parts of the general degree requirements. The purpose of these meetings is to discuss opinions on any aspect of the requirements being considered from any interested person. Since the Foundations of Science course, it is a first requirement being considered. Later meetings will be held on the four course curricula, the Western Civilization program, and the Social Studies requirement.

Students are welcome to attend and participate. The first meeting will be held on January 23, at 2:30 p.m., in Aquinas Lounge.

Writing an Effective Resume

Next Wednesday, Jan. 23

Slavin 203

2:30 p.m.

Attend this workshop if you need to revise or start writing your resume. This will cover the general guidelines and tips for writing your own effective resume!

Sponsored by the Counseling and Career Planning Center.
**Gatehouses to open soon**

By Maury Conway

Most of the PC community has noticed the new gatehouses that were recently constructed at the Village and Hanley Ave. entrance to upper campus. Mr. Cunningham, of the Physical Plant explained that the idea for the gatehouses was first proposed by the Safety and Security Committee, which is chaired by Father McMahan. The committee believes that the gatehouses will tighten campus security and aid in the reduction of vandalism.

Once the gatehouses become functional, student and staff automobiles will be required to have a sticker to pass through. All other cars will be issued a visitor’s pass. Because all the details of the program are not yet complete, the committee will meet in the coming week. It is predicted that the gatehouses will be functional around the 21st of January and will be an asset to the security of the campus.

**Women execs speak**

(Continued from Page 2)

As Lincourt sees it, women have gained entrance into what were formerly elite, male-dominated administrative offices on equal footing with matched salaries. But there is a stipulation which is deeply entrenched in the minds of all those concerned, including the women.

"Women are forced to comply with the same old social rules that existed ten years ago," said Lincourt. "A woman has to work twice as hard as a man who has the same job, and perform better to prove herself half as good." Lincourt believes that this double standard plagues every businesswoman, even the most competent.

Lincourt, along with Maureen Keats, director of Public Relations & Funds Development at Roger Williams Hospital, and Mary Beth White, Marketing Administrator for New England Telephone Company and first year Providence College alumni, spoke at the "Special Issues of Women in the Work Force" seminar.

Keats agreed with Lincourt and said that the sex岐 double standard evolved primarily through newspapers and billboards. She believes that the media has distorted the image of today’s woman.

According to Keats, the glamorous "model mother" pictured in "Vogue" or "Town and Country" magazines doesn’t do it all by herself. "The successful business woman who owns her own real estate business is portrayed as gorgeous, healthy, wealthy, and wise. Nor only does she manage her own business, but a home, too. More than likely, she has a "handsome husband," a "dream home," and three beautiful and well-cared for children.

"How does she manage to take care of all this and herself as well? The media never tells us this, but I will bet she got money to hire help.

"Behind the scenes at the office is the career woman’s loyal and sometimes even other employees. You never see the maid in the background who cleans the "immaculate home" and cares for the "adorable children." Nor do you catch a glimpse of the professional cook who prepares exotic dishes for guests, who makes home-baked goodies for the children, and who prepares full course meals for her husband’s “mainly appetite.”

"No, you never see it, nor hear tell of it."

"Nothing grates me more than to hear a man complain, "Let’s face it: I’m not a woman, I didn’t have it easy."

She noted that many men do believe "that all one has to do in today’s society is he be a woman or a black to get a job," but that they are only kidding themselves. Keats acknowledged that women and blacks do have a subtle edge over men in obtaining a job; but when it comes to maintaining it, nothing has really changed.

She believes that old social rules still apply. "You ask what happened when she entered the working force, women still had to perform better than men to be thought half as good.

In her administrative work experience, Keats interviews both men and women. "The women I’ve worked with," commented Keats, "tend to over-prepare themselves. Generally, they were smarter and more prepared than the men."
Eliminate Text Book Headaches

Books are the tools of students. They are necessary to teach, guide and aid a student in successfully completing a course. Here at Providence College, books are a fact of life.

The average college student spends $150 per year on texts. This figure, along with tuition, is rising. In this period of economic pressure, we must observe critically the policies of the PC Bookstore in order to control the spiraling price of books.

The PC Bookstore is a small business firm. The goal of a small business firm is to maximize profits. Through the sale of a simple elementary rule, it is evident that the Bookstore seeks only in business to serve the student in his academic quest for knowledge, but also to make a buck.

Students have become dismayed over the minimal refunds they receive for their used texts. The Editorial Board of the Cowl advocates a review of the Bookstore's trading policies, especially those concerning used books. For example, a book of extensive use at PC in Langer's Western Civilization, a book familiar to all students of DWC. In September, 1979, this book retailed for $81.95. Because of this, most bookstores pay only 60%-80% of the list price, and even less than this for large quantities. The student who decided to sell the used book at Langer's in May, 1979 received only $3 for it. This semester, September, 1979, used Langer's list was only $5.50. This means, of course, that the Bookstore is making approximately $45.40 per used book, for merely storing it during the summer months. When this policy is used for all other texts, it is obvious that the Bookstore makes considerable profit. This is not only unreasonable, but also unfair to the student who cherished the book.

In addition, the Bookstore, when buying back a used book, has a preset price list in which they award students a standard price for a text, regardless of its condition. The person who highlighted, ripped pages, and doodled on Langer's list, received the same $3 as the student who cherished the work. This occurrence is common throughout the Bookstore.

Most of the faculty is well aware of the high price of books and some departments have taken measures to alleviate the costs students must bear. According to one political science professor, his department has reduced its average list of books per course from seven to four over the past few years. A reduction in the number of texts used in a course should not occur at the expense of attaining the best education possible. However, faculty should become aware that many texts have cheaper paperback versions and should inquire to their publishers. The faculty should also consider using the library reserve system when only using a few chapters from a required text.

At Boston College, most professors put not only supplemental readings, but also the required texts on reserve. This affords the student the option of buying or not buying the texts. Here at PC, the library does not even supply all the texts that professors use. This type of system should be implemented at PC, for in many cases, this approach would be helpful to the student.

Students realize that the cost of a college education is dramatically increased over the past ten years. Any attempt to contain the costs of the high price of education will be greatly appreciated by the student body. As a consumer, the PC student desires to save money where possible. We at the Editorial Board of the Bookstore's policies as well as an effort by faculty and library administration to help the student handle the increasing costs of textbooks.

Reconsider Interview Policy

During this time of year many college seniors hit the job trail in search of employment. They go to interview. This procedure takes place in many ways, but one way is through the use of the on-campus interviewing center. Such as the lottery system used at the College of the Holy Cross. This system is far more reasonable and fair to those students who sincerely wish to be chosen for an interview. Under the present system many students take interviews solely for experience, and not need. Providing experience is the responsibility of the Placement Center and not of a job interview. The Placement Center should provide this experience first hand to the student by group interviews with actual recruiters and/or films or video recording of actual interviews. The solution proposed by the Cowl is based on this system presently in use at Holy Cross. In this system, students who wish to use the service must fill out an interview schedule are given a total of four points with which to bid on interviews. When the semester begins, a schedule of the visiting companies is posted and two weeks prior to the interview, a list of the company's proposed positions is posted and its See POLICY, Page 5

In light of the letter distributed to students last week, from Thomas R. Peterson, O.P., the PC community may look with optimism toward the 1980-81 housing situation. The Task Force on Campus Facilities and Father Peterson have been considering the problem of the limitation of on-campus housing since early last year. At this point they have assured the student body that "no present freshman, sophomore, or junior resident student in good standing at the college will be required to move off-campus for the 1980-81 academic year." The present outlook is in sharp contrast with that of last year when the possbility of implementing a housing lottery, and similar plans were seriously considered. Father Peterson has indicated that the problem has diminished primarily to the greater number of students opting for off-campus residence. Although the problem has lessened, "the task force will continue to work on the elements of this question," Father Peterson reported.

As far as spaces for incoming freshmen are concerned, the class sizes will be limited by the facilities available. The Editorial Board of the Cowl is in complete agreement with this policy, and that it will be strictly adhered to. The Admissions Office has projected an enrollment of 150 students for the Class of 1984. Assuming that this figure is maintained, a problem is not anticipated in accommodating those students interested in on-campus residency.

Food Committee backs $2,575
Cambridge aid drive

By S.J.J. "Veg" McGuire

Providence College students, feeling the pinch of the semester inevitably had to end with a bit of disillusionment and despair brought on by bills to be paid, final exams to be taken, and friends to be left, a light at the end of that dark tunnel did exist. It is a most refreshing thought to realize that there is indeed a real spirit of profound generosity and a close unity among the students of the Providence College community. This is one of the most meaningful experiences that any of us can participate in. So we invite you all, and particularly our friends from other schools, to join us in this worthwhile cause which PC Theatre Arts has made and is making to the Providence programs of self-sufficiency. It is only through the efforts of students and faculty members that nations least fortunate than ours can come to stand on their own two feet. How did we do it? By maintaining our faith in the caring, empathy, and patience that we do indeed possess. Patience, you say...Patience is an important role. Many of us waited a council kept the PC Theatre Arts and Edji's, Caito's, and Subworld to get to our doors. (No doubt exists in my mind that Providence students, loved the idea) Some stood in line for over 30 minutes surrounded our life-saving silver truck, just about to eat the ties that Providence Home 50 Raymonds waited patiently in line. The biggest spaghetti supper that we ever paid was nothing more than a wait a little longer—until breakfast the following morning. So to all the Providence students, feel proud! We would like to take this opportunity to thank the Student Congress and the BOG for their moral support and financial help. I would like to thank Father Heath for his support, and Mr. Murphy and his staff for their co-operation and hard work for this project. A special thanks also goes to the students of the Theatre Arts, which is only a professional, nonprofit Arts organization, which works in Cambridge, now distributing the first results of funds and starting

minimum requirements, if any, i.e., 2575.40 (not including the BOG
donation). We will be going toward the purchase of rice seed and fish nets the same type student and for

Providence College is community. The performing arts benefit not only those involved in making a play "live" but also those who participate as audience members.

Trapped in a "Catch-22" situation, the theater program is considered to involve a minority of Providence students and there
fore is thought to be unworthy of the expenditures necessary to build a theater. Most of the other hand, without this proper theater, Providence includes those prospective students in the performing arts to other schools with

As a recent graduate of PC, I am grateful in many ways to the educational opportunities that afforded me. Often however, it was the campus theater arts program that gave me a great sense of personal fulfillment. It is this type of satisfaction which I would not like to see lost at PC, to gain an emphasis on athletic excellence.

A well rounded curriculum is a cornerstone of a well-rounded education. Without exposure to all aspects of theater, some students who are otherwise technically proficient, GPA is not always the indication of ability. Therefore, the Cowl feels that the Student Senate should adopt this system in order to make the present situation more fair to those students who are actively seeking certain positions and not just experience. This system is by far more realistic since it gives students a better chance of getting chosen—now they won't be at a loss for participants when the season begins. Since none of us have any

Loyal fans, "thanks"

Dear Editor:

I want to thank the small group of students that stayed to watch the Lady Friars beat Cheyney State. The Providence College community has tremendous faith in this program, and our largest thanks goes to the student body of Providence College. We've only helped a starving people in a time of desperate need, but also restored my faith in their goodness, sincerity, patience, and ability to give.

Dear Editor:

How was your Christmas? What
did you get?

...has anyone else noticed that this campus sounds like a Cracker Jack confection every time Edji's, Caito's, and Subworld to get to our doors. On the second floor, a large crowd surrounded our life-saving silver truck, just about to eat the ties that Providence Home 50 Raymonds waited patiently in line. The biggest spaghetti supper that we ever paid was nothing more than a wait a little longer—until breakfast the following morning. So to all the Providence students, feel proud! Although last

Move over R2-D2! Here comes the 'Intelligent Computer'

By Lori Evangelos

What is it? A bird? A plane? A fog? No, it's the 'intelligent computer.'

What does it look like? Scratch illustrations of a R2-D2 or even D-2 replica, the popularized robots of the movie sensation "Star Wars," Kermit the Frog, or other computer science courses at Providence College: an intelligent computer not in human form, but in box form—that of a machine.

What does the intelligent computer have that no other computer can do? Even though the computer won't look like a human being, it will think like one. According to Silvestro "anything a human can do, the computer can do. It can perform more and do better than any human.

According to Silvestro, the intelligent computer can have an understanding of concepts so it can formulate ideas of its own. In other words, its intelligence enables it to "have a mind of its own."

Silvestro was reluctant to predict when the computer would come to life. He explained that it has taken years just to develop a computer that can coordinate a simple sentence. Years before, computer scientists were struggling to create a machine that could recognize the simple parts of a sentence, subject, object, and verb.

The professor spoke of a time when modern technology will enable computers to control other computers, and human supervision will be a thing of the past. However, Silvestro believes the intelligent computer as a self-sufficient machine could prove dangerous if it weren't closely observed.

According to Silvestro, the machine could prove as benign if used properly. Silvestro would like to see such an invention used in tedious, monotonous work and in working conditions where an employee's health is endangered due to the nature of the job.

Another possibility would be a medical computer to aid doctors in diagnosing cases. The machine would diagnose illnesses quickly and efficiently, but the doctors would need to train the patient. This aspect is important to Silvestro because he believes that the "human element has to be there." He doesn't envision robots conducting services, replacing mankind, but working alongside mankind.

There are no limitations, according to Silvestro, as to what such a computer can do. "The technology must be controlled by a leader who won't put it to misuse. We have the technology, but the problem is the human factor.

Mr. Silvestro's other concern is that "there is no question in question, "Come, come, Podsekalnikov is out of work,

Trinity news

"The Suicide," by Nikolai Erdman, translated by George C. Scouller, has never been presented in Russia. Though the play was rehearsed by Stanislavsky and Meyerhold, it was banned before it could open in its own country. "The play was written with the last late '20s when Lenin was already dead, Stalin was embarrassing and stimulating aspirations of the Revolution, emotions had lost their hierarchies and hysteria could and did break out over such a subject."

The central theme of "The Suicide" is the universal struggle between good and evil. Other major themes woven into the play are the lack of communication among human beings and the value of life itself. Richard Elder, writing for the New York Times, called the Royal Shakespeare production of "The Suicide" one of the most interesting events of its season and expressed surprise and concern that "it is hardly known outside" the Soviet Union.

The play is a moving and disturbing work, as a series provides something for everyone: slapstick, farcical comedy, social satire, and a commentary on the human scene that goes far beyond the limits of satire and comedy. Semyon Semyonovich Podsekalnikov is out of work, dependent on his wife and mother-in-law for his living. He has given up his life for the Revolution, he says, and received nothing back: not even the right to work. Through a series of hilarious and extreme circumstances, he finds himself at the center of love and admiration; suddenly he finds he can't leave it and gives him a rare vision.

Jona Jarussa, a gifted director who, four years ago, was able to leave the Soviet Union after having been banned as a "non-person," will direct the Trinity Square Repertory Company in "The Suicide." Jarussa will be in Rhode Island under the sponsorship of the Rhode Island College and the Rhode Island Committee for the Humanities. During his stay here, he will conduct seminars at the college, conduct student projects at the college and in the Trinity Rep Conservatory.

"The Suicide" will be presented in the upstairs theatre of the Trinity Square Repertory Company at 201 Washington Street, Providence, R.I., from January 18 to February 17, 1980.

For further information and ticket reservations, visit the box office at the theatre, or call (401) 351-4242.

Keep it civil and on-topic. No spam, profanity, racism, infighting, willfulness, or咱们中国老祖宗传下来的礼貌原则, please.

BOG Lecture Committee Presents

BILL LEE

(star pitcher for the Montreal Expos)

1980 Summer Employment Directory (SED) is an annual paperback. Each listing includes job description, pay rates, working conditions, and a name and address to write to. Lapin said that the SED only lists employers who are actively seeking people to work for them, and that they "don't waste time and stamps writing to people just to find out whether or not they have summer jobs available," she said.

Several jobs in the 1980 SED could be lead-ins to a chosen career field, Lapin said. Others See JOBS, Page 7

And then, to the dormi­
tory in question. "Come, come, McDermott, you don't see Raymond and Guzman Holmes complaining about a little damage, do you? Part of the game, to so speak. Back up now, there's a good building."

Dore Hall turned to Fennel whispering, "If we could speak on any other night of the year, it'd be an easy bet that McDermott would spend it complaining." Fennel just smiled stylishly, always the introsvert.

"Now, now, let's get on with the minutes of the meeting," said Hampshire Hall was always business-like on this most special of nights.

"Since the outline is not always raved about by the students, I've come up with an alternative," said Raymond Hall. "Keeping with how popular instant soups and the like are, this new concoction fits the PC food style tradi­ tions. It's called cup-a-soup. What do you all think?"

Harkins' Hall rolled its windows down and said, "Near the ski hut just I," said Schenider. A Arena perked up and said, "If you wanted trees, they were a mile or two! The library smiled, translated and said, "Schenider, you've been very very good to me."

The 1980 Summer Employment Directory of the United States (SED) is an annual paperback. Each listing includes job description, pay rates, working conditions, and a name and address to write to. Lapin said that the SED only lists employers who are actively seeking people to work for them, and that they "don't waste time and stamps writing to people just to find out whether or not they have summer jobs available," she said.

Several jobs in the 1980 SED could be lead-ins to a chosen career field, Lapin said. Others See JOBS, Page 7

Tickets available in the BOG ticket office.
Jobs

(Continued from Page 6)
are geared to the student who wants to mix fun and adventure with summer work.

"Some of the jobs listed in the 1980 SED even offer college credit." Lapin pointed out. "For example, jobs at summer camps for mentally and physically handicapped children." For other jobs listed in the directory, Lapin suggested that students ask about practical credit at their respective schools. "If you're in special education, for example, some of these jobs let you test your chosen field and see how well you like it before you graduate. They also give you some practical work experience to put on your resume when you apply for your first job after graduation."

"Other summer jobs listed in the 1980 SED—at national parks or scenic resort areas—give you the opportunity to spend the summer at a place where you'd never go on your own if you had to pay for it," Lapin said. "A summer job at a resort is a great way to go someplace interesting for the summer and get paid for being there."

"Lots of jobs listed in the 1980 SED are fairly unusual," Lapin added. "For example, there are river trips in Colorado, jobs at ski resorts in the West, and a position at a wildlife preserve in New Hampshire. These are fairly unusual jobs that may be right up your street." Lapin said that the 1980 SED is like "your local newspaper" in one other significant way. "The really good jobs go fast," she said. "If you and your friends are interested in a position, you'd better take action and get it."

The 1980 SED will be in bookstores by late November. And since there are a limited number of positions in the book, you should start thinking about next semester's job search as early as the middle of the semester. This year for the first time, the Summer Employment Directory includes listings for the major commercial resorts like Disneyland, Disney World, several of the Six Flags resorts, Cedar Point in Ohio and Bush Gardens in Florida. Lapin said that such resorts employ thousands of college students each year, as well as older high school students.

The 1980 SED includes national temporary help organizations that refer your records from your summer job back to their offices at your year-round home and continue to provide temporary or part-time jobs for you all year round according to Lapin. The 1980 Summer Employment Directory (paperback; $6.95) can be purchased in most bookstores. It is also available from the publisher, Writer's Digest Books, 9931 Alliance Road, Cincinnati, Ohio 45242. Mail orders should include $1.25 for postage and handling.

Gary Smart, a senior business major and resident of Smith Street, has come up with a quick and easy recipe for peach cobbler. One of the American-Club members, Gary is also active on the Cowl's photography staff.

Quick Peach Cobbler

1 cup sugar
1 cup flour
1/4 cup milk
1 stick margarine
1 tablespoon cinnamon
2 large cans of peaches

Preheat oven to 400 degrees. In an oblong pan, melt margarine. Combine all ingredients, except peaches, in mixing bowl, and mix until smooth. Pour ingredients into pan. Spread peaches evenly throughout pan. Ladle about 1/2 can of peach juice over peaches. Bake until golden brown (about 20-25 minutes).

Bermuda trip

(Continued from Page 2)

Bermuda. The best locations are on the South Shore of Bermuda, where most college work activities take place. Ten minutes away is the capital of Hamilton, which is the objective of a film if it affects my program, but they do affect my own self-esteem which is to be, above all, consistent," replied Major in answer to a question.

"The ratings today are telling critics that they like predictable plots. People are more comfortable watching programs when they can predict and anticipate the outcome," he added, "As I grow older, I begin to understand why." for criticism are simply his own experiences or feelings toward something.

However, the writer admitted that sometimes it is difficult to make money if the producers can't find a market for their product. "For example, 'The Newby's,' according to Major, was abandoned after a few years. But it is interesting to today's youth which are in the central area of Hamilton or the South Shore.

The past has posed some problems to the area's travel agencies in obtaining air space for their clients. Although larger trips such as the one the Dillon Club is running have confirmed air space, other trips may not.

With this advice, we can all begin to plan our spring vacation NOW! Any student having additional questions about Bermuda may contact the Dillon Club, 120 Venti-297-2332.

Major movie critic

By Lori Evangelis

The year is 2000, and the American movie theater is dead. Jack J. Major, a movie critic and department managing editor of the Providence Sunday Journal, told Providence College students at a press conference Thursday, November 15, that cable television via video diskettes will come of age in the year 2000. And then, TV cassettes will replace movie theaters.

"Through cassette TV, the movie theaters will go directly to the public. Eventually, people will be charged for watching TV at home as they are today in movie theaters."

What's cookin'?

"When people start tasting their own movies it will cause an incredible amount of trouble for the movie industry; home box offices will prove to be a foe to be reckoned with."

"However, the fact that people differ will bring the eventual fall of the movie theaters by the year 2000. Some people like to go out to movies, not all of them like to stay home."

"The primary purpose of TV is to make money. If the producers can't find a market for their product, they will go out of business. For example, 'The Newby's,' according to Major, was abandoned after a few years. But it is interesting to today's youth which are in the central area of Hamilton or the South Shore."

Major in answer to a question. "A good show," said Major, "makes me question a belief I have. For example, I hated the movie 'Deerhunter.' I thought several parts of the movie didn't make any sense. But my co-workers and I discussed it. The film made us explore beliefs we had about the Vietnam War. Beliefs that I myself had never questioned, but more or less assumed."

"People cannot resist their own explanation of a film if it affects them. This is why we have reviews: to bounce opinion off of someone else. However, the admitted this could pose a problem, because the objective of a review, which is to summarize, could get lost in the race to vent opinions and sound them out. A problem which is more likely to happen to newspapers than to television, according to Major, because of the time limitations imposed on reporters."

"As a movie critic, I would like to see reviews improve and become more indepth or explanatory. In the future, Major would like to see reporters and critics entertain and inform viewers about the new problems which occur behind the scenes, about the performers, or about the self-taught skills of his trade. According to Major, at age eleven he was out pounding the streets. He was the sole reporter, editor, printer, publisher, and distributor of his own newspaper. Raised in Akron, Ohio, Major attended Kent State University. For example, 'The Newby's,' according to Major, was abandoned after a few years. But it is interesting to today's youth which are in the central area of Hamilton or the South Shore."

Major told students that he was a "journalistic in the making" early in life and ambition slowly led to the self-taught skills of his trade. According to Major, at age eleven he was out pounding the streets. He was the sole reporter, editor, printer, publisher, and distributor of his own newspaper. Raised in Akron, Ohio, Major attended Kent State University. For example, 'The Newby's,' according to Major, was abandoned after a few years. But it is interesting to today's youth which are in the central area of Hamilton or the South Shore."

"I very much fear that people would love to complain that the show was unrealistic, but had no high drama. However, it was realistic to me because my life really never became minus the low drama, only TV did."
A CONGRESS FOR THOMAS—A RING FOR THE POPE

By Kathy Hansen

An International Congress was held at the University of St. Thomas Aquinas in Rome, November 15-17, to discuss the contemporary relevance of the encyclical "Aeterni Patris" issued by Leo XIII in August of 1879 which affirmed the importance of a Christian philosophy for a scientific theology, the understanding of faith and the practice of religion. The encyclical emphasized the preeminence of the philosophy of St. Thomas Aquinas in Catholic study and teaching. A panel of distinguished international scholars exposed and discussed the historical and doctrinal context of the encyclical and the contemporary character and originality of Thomistic philosophy and theology.

Thirty-three years after enrolling as a student at the Angelicum, John Paul II returned to his university to preside at the closing of the congress and to deliver the final talk before a standing room only audience of some two thousand people. The Holy Father exhorted his audience to develop and deepen the teaching of St. Thomas to continue the work of Vatican II in the renewal of the Church. He stressed St. Thomas' openness to reality in its totality and his penetrating thought centered on both Christ and man. He proposed Aquinas as an "incomparable model for the Christian researcher" and cited his faithfulness to revelation and the magisterium as well as his respect for the visible world.

On his arrival, the Pope had been joyfully welcomed at the University Church by the Dominican Community, led by the Master General of the Order, Father de Couesnongle, and the President of the University, Father Salguero. After a short prayer, the Holy Father proceeded to the Aula Magna (the Great Hall) for his talk. He was obviously pleased by the tumultuous welcome he received from the vast audience assembled there. At the close of his talk he proceeded to several smaller halls to greet students and dignitaries and finally to a special meeting with the Dominican Community of the University. At this intimate gathering the Holy Father was presented with specially bound copies of his written works and with the first gold casting of the new University ring engraved inside with "John Paul II" and the date of his doctorate "1948." His Holiness accepted these tokens of esteem and affection with his customary graciousness and afterwards shared some memories of his own doctoral defense in theology which took place in the very same halls. As he had often done as a bishop and a cardinal, the Pope joined the community in their dining hall after the final ceremonies to partake of the evening meal. Among those who joined in the festive celebration at the table were Dominican Cardinals Ciappi and Phillipe and Dominican Archbishop Hamer.

The ring, which was presented to the Holy Father, was designed by Father James A. Driscoll, O.P. of the Religious Studies Department of Providence College. Father Driscoll represented the Dominican Province of St. Joseph at the International Congress and made the presentation of the ring to the Pope as the National Director of the American Angelicum Alumni Association.
While we were gone
Friars roll into first place in ECAC East

It has been a very successful first half of the season for the PC hockey team. The Friars took a road trip to Troy, NY in December to play RPI. RPI, always a tough team at home, gave Friar fans cause for concern. A four goal third period explosion erased a 3-2 Friar deficit and PC skated away with a 6-3 victory.

A couple of days later the Friars visited the home of the Northeastern Huskies. The PC pucksters got off to an early 4-1 first period lead and coasted to a 6-3 lead in the third period. Northeastern scored two quick goals nine seconds apart and pulled to within one with 1:03 remaining in the game. Denis Martin scored the final goal into the open net to complete the hat trick and clinch a 7-5 victory for the Friars.

Finally, the Friars returned to the confines of their home rink to play Colgate. Colgate jumped off to an early lead but the Friars kept skating and the results were positive. Before the game was over, the Friars had tallied eight times, five of the goals were on the power play. Jeff Whisler scored the first hat trick of his college career in the 8-3 Friar romp.

Friars run in first indoor meet
By Kevin Burke & Brendan Keefe

On Saturday, January 12, the Providence College Friars participated in their first indoor meet of the season, the New England College Invitational. The meet featured twenty teams in collegiate or invitational meets.

In the college 3000 meter race, junior Dave Ball took the only first place finish for the Friars, winning in 8:37. In the college 3000 meter race, sophomore Brendan Quinn took a close second place with a time of 8:32, a second one second behind Tom Ratcliffe's 8:19. Ratcliffe, a student at Johnson and Wales College, is the brother of Sue Ratcliffe, the number one runner at Johnson and Wales. He had returned to his native place, Mick O'Shea '77. Mick, recently employed in the United States, has been in Ireland after graduation, has been featured a Friar alumnus in first place finish for the Friars, winning in 8:02, a scan one second behind Tom Ratcliffe's 8:19. Ratcliffe, a student at Johnson and Wales College, is the brother of Sue Ratcliffe, the number one runner at Johnson and Wales.

Ratcliffe's 8:19. Ratcliffe, a student at Johnson and Wales College, is the brother of Sue Ratcliffe, the number one runner at Johnson and Wales.

The invitational 3000 meter race featured a Friar alumnus in first place, Mick O'Shea '77. Mick, who had returned to his native Ireland after graduation, has been recently employed in the United States. His winning time was 8:30.5. Senior Peter Crooke who had returned to his native Ireland after graduation, has been recently employed in the United States.

The 3-1 victory over Colby put the game out of reach for Colby. The 3-1 victory over Colby. The 3-1 victory over Colby. The 3-1 victory over Colby.

The 2nd Annual Providence College Outdoor Open House will be held again this spring. Those interested in helping out, drop your name, box, and phone number in P.O. Box 2981. Watch for more information in upcoming Cowl's. Basketball at its best, coming this spring.

Friars, Brandy attain honors

Although the football season has been over now for almost two months, the honors keep coming for the Friars. The New England College Invitational 5000 meter race with a time of 14:18, only thirteen seconds behind winner Jimmy Hopkins of New Jersey. Ray is not a full time member of the team this year due to his personal training for the Olympic qualifying marathon in Ireland this May. He expressed a belief that he could finish in the top three, which would qualify him to compete with the Irish team in the Moscow games. Ray will compete in a couple of meets this year, mainly for the speed workouts.

The freshman duo of Paul Moloney and Jimmy Fallon who stabilized the team this past fall when Brendan Quinn came down with appendicitis, made a nice showing in the open 3000 meter race. Moloney finished fourth (8:37) while Fallon finished sixth (8:41). Junior Brian Dillon took ninth with a time of 8:54.

The Friars should be encouraged by the apparent recovery of Brendan Quinn and the continued solid performance of the team as a whole. Major races in the near future include the Big East this weekend and open against an undefeated UNH squad Friday at 8:00.0. Senior Peter Crooke

Landers, Brandy attain honors

Although the football season has been over now for almost two months, the honors keep coming for the Friars. The National Collegiate Football Association released their final polls and national All-American team. The Friars placed fourth in the country overall, and placed four players on the All-American team.

Senior Bob Landers of Ridgefield, CT was chosen Player of the Year by the NCFA. Landers, a running back, was fourth nationally in rushing with a 106.7 yards per game average. He scored 70 points. He also was voted Most Valuable Player of the New England College Invitational Football Conference earlier this year.

Senior co-captain Mark Brady of Norwood MA was chosen as first team All-American defensive tackle. Brady had also been chosen as first team All-New England Conference tackle earlier this year.

Senior Bob Landers of Ridgefield, CT was chosen Player of the Year by the NCFA. Landers, a running back, was fourth nationally in rushing with a 106.7 yards per game average. He scored 70 points. He also was voted Most Valuable Player of the New England College Invitational Football Conference earlier this year.

Lost: Small, Silver Pin of Cowl as they are drawn.

These people should receive $25 checks soon, if they have not already done so. The remaining winners will be announced in the Cowl as they are drawn.

BOG Concert Committee Presents:

ANDY PRATT

'64 Hall

$2.50

W/PCID

This Saturday, January 19

Two Shows:

7:00 pm & 10:00 pm

Friends:

The family of the late Augustine D'Agostino wishes to thank the Dominican Fathers, faculty, students and especially employees of the Rathskellar for their spiritual bouquet, flowers and thoughtful remembrances tendered to us during our recent bereavement.

Sincerely,

Angelo D'Agostino
Lady Friars beat nationally ranked Cheyney State, 50-46

By James Smith

A tremendous team effort by the Lady Friars enabled them to stun nationally ranked Cheyney State on the way to winning the First Annual PC Women's Invitational Basketball Tournament. Providence managed to reach the final of the tourney by defeating Monmouth College, 59-46, while Cheyney State held off Dartmouth, 57-47, in the opening round of play.

Cheyney State came into Sunday's game ranked number nine in the nation and sporting a perfect 9-0 record. But the PC squad refused to be in awe of their powerful opponents.

Both teams came out playing a deliberate style of basketball, looking for the best shot. PC's defense looked tough as the much larger Cheyney State team was forced to attempt long range shots with little success. Scoring was slow in the first five minutes, mostly because of fine defensive play on both sides.

Cheyney State tried to change the tempo of the game as they came out running and gunning in the second half. But three straight baskets by Dwyer and driving layups by Sheedy kept the Lady Friars within striking distance. PC's steady guard Lynn Sheedy was named tournament MVP.

In the game which they never lead, Providence showed good concentration and comeback ability. Four of the starters ended in double figure, led by Jerry Scott with 15, followed by Williams with 13, Tucker's 11, and Fields 10. Holy Cross was carried by Gary Wits with 14, while Perry and Floyd each added 13.

This gave the Crusaders the ball with three minutes to go and again allowed them to utilize ball control in wasting away the clock. With 13, Tucker's 11, and Fields' called time out to set up a play. A swarming zone defense by Providence scrambled their plans, but freshman Ernie Floyd surprised everyone with a clean swish from 18 feet at the buzzer to grab a 59-57 win.

In the game which they never lead, Providence showed good concentration and comeback ability. Four of the starters ended in double figure, led by Jerry Scott with 15, followed by Williams with 13, Tucker's 11, and Fields 10. Holy Cross was carried by Gary Wits with 14, while Perry and Floyd each added 13.

Lynn Sheedy, Kathy Dwyer, and Mary Ann McCoy were named to the All-Tournament team. Dwyer led all Lady Friars scorers against Cheyney State with 18.

Following the contest the tournament All-Star Team was announced with Mary Ann McCoy grabbing one of the spots. McCoy was joined by Valerie and Deborah Walker of Cheyney State, Barbara Paterno of Monmouth and Dartmouth's Carla Kozlara. PC's steady guard Lynn Sheedy was named tournament MVP.

Earlier in the day, Dartmouth defeated Montmouth in the consolation game, 54-50.
Crusaders top Friars at buzzer, 59-57

By Ed Ruhl

In a week ending with a big matchup against rival Holy Cross, the Providence College Friars hoped to warm up against New Hampshire and Brown Universities in preparation for Saturday's NEC regionally televised college game of the Week.

Providence traveled to Maine Saturday, January 12, to face Colby College. The Friars did just that. A balanced scoring attack led to a big PC second quarter half, allowing coach Gary Walters to give his second team some playing time. Guard Jerry Scott lead the Friars with 18 points, while eight other teammates also contributed.

Defense was once again a key factor for the Friars. Guard Jerry Scott lead the Friars with 18 points, while eight other teammates also contributed.

The Friars controlled the ball for the last minute of the half before 

"Defensive lapses" plague Friars in tilts with Brown, Northeastern

By Ron Pisioone

Just when it seems things are clicking and sliding well, a monkey wrench gets thrown into the machine. That is what happened last Thursday night as the Friars faced off against the Bruins of Brown. Two weeks ago in the final game of the Old Colony Holiday Invitational Tournament, the score was 3-1. The game was decided in overtime.

The pattern of the game had been set. Twice the Huskies erased Friar leads. However, they came up with a comeback fall short for Providence.

On Sunday, the Friars took on the lowly Huskies of Northeastern. The game that resulted was hardly a defensive struggle. Providence never trailed in the game but had their hands full holding off the Huskies, 6-4.

The Friars tallied first in this contest battle. John Hogberg took a pass at the blue line from Steve Anderson and whipped a shot past the B.U. netminder Mark Daviner with two seconds to remaining on a Friar power play.

The Friars kept the momentum for Saturday's game. Guards Jimi Perry and John Hogberg with 12 points, Holy Cross left the Lady Friars just short of the win. The Friars finished off the hat trick at 8:25 of the second period with the Friars up 6-4.

Buck MacMillan takes a shot against Northeastern.

The second period began with Providence pressing in the Brown end but Brown goalie Mark Holden, who played a superb game between the posts, held up to the task. At the 4:52 mark, Brian Riley broke the deadlock and capitalized on one of the many rebounds which were bouncing around in front of Friar netminder Greg Nolin. Much to the fans dismay, the Bruins continued to dominate the scoring. Less than three minutes later, Brian Riley took a pass at the blue line and whipped a hard shot past the Friars goalie. Providence goalie Larry Parks. The ball found the Friar net, 2-0.

Providence began the PC tally the Lady Friars were hit with a very controversial penalty for delay of game and the game was far from over. Providence killed the penalty but the Friars never hit the right gear. The game was over.

The Lady Friars hockey team traveled to Maine Saturday, January 12, to face Colby College. The Lady Friars outshot Colby and came away with the victory, 3-1.

New linemates Kathy Luther, Patie Jankun and Diane Geraghty combined for the first PC score. Luther tipped in a Pattie Jankun and Diane Geraghty combined for the first PC shot on goal with hard working forwards Evangalista and Horgan setting up the play.

On Sunday, the Friars took on the lowly Huskies of Northeastern. The game that resulted was hardly a defensive struggle. Providence never trailed in the game but had their hands full holding off the Huskies, 6-4.

The Friars tallied first in this contest battle. John Hogberg took a pass at the blue line from Steve Anderson and whipped a shot past the B.U. netminder Mark Daviner with two seconds to remaining on a Friar power play.

The P.C. faithful barely had enough time to settle in their seats before the Huskies knotted the score. Thirty-six seconds after Hogberg's goal Lady Parks punched a rebound passed Scot Flske to break the ice for NU.

The Huskies swarmed goals at the start of the third period but it didn't stop Steve O'Neill who finished off the hat trick at 8:25 of the third period. The Huskies refused to roll over and play dead however. A Northeastern goal with 1:27 left to play gave the Friars only a slim goal lead, 7-6. John Sullivan's empty net tally settled the issue.

This win put the Friars behind Clarkson, Boston College and Vermont in the ECAC race for the best record. RPI, who PC faces Thursday, is in fifth place behind Providence.

Sunday's game Flske had the second best goals against average in the ECAC with a 3.25 mark, but lack of defensive support was one of the keys to Fiske's problems against Northeastern.

Steve O'Neill opened up a two goal lead, the second coming on a breakdown. Sullivan's pinpoint pass to O'Neill at the NU blueline sent him in alone. "I know what I'm going to do every time," said O'Neill of breakdowns. What he did was split it beneath the pads of a helpless Daviner.

Gerry Toppozinni for the Friars off two Wayne Turner tallies for the Huskies to close the second period with the Friars up 6-5. The Huskies swarmed goals at the start of the third period but it didn't stop Steve O'Neill who finished off the hat trick at 8:25 of the third period. The Huskies refused to roll over and play dead however. A Northeastern goal with 1:27 left to play gave the Friars only a slim goal lead, 7-6. John Sullivan's empty net tally settled the issue.

This win put the Friars behind Clarkson, Boston College and Vermont in the ECAC race for the best record. RPI, who PC faces Thursday, is in fifth place behind Providence.
