Summer Issue '83

Vol. XXXVIII No. 3

PROVIDENCE COLLEGE, PROVIDENCE, R.I.
JUNE 22, 1983.

P.C. Welcomes Class of '87

Lamorlctio Changes
Friar Sports Staff
Insists "Nothing Negative"

by Richard Testa

Five changes in the PC athletic department were announced in early June, amid much confu-
sion. The head coach of women's basketball, Bob Amato, was relieved of his duties. As a main gallery. There are cu-
rently 40 students enrolled in the art program.

Fr. Hunt, a native of Richmond, Virginia, was graduated from the Catholic University of America in Washington, D.C., where he earned his doctorate in architecture in 1928. Ordained a Dominican priest in 1935, he joined the PC faculty the following year as a professor of art and mathematics.

Through Fr. Hunt's continuous efforts, the department of art and history was founded in 1970. He served as first chairman of the department, a position he held un-
werent 30 years of age in 1974.

Mr. Dodd served three terms as Democratic Congressman from Norwich, CT, before launching his successful bid for the U.S. Senate at-Large, and served on the Rules Committee, the Budget Committee, the Appropriations Committee, the Select Committee on Assassination.

Mr. Dodd was elected to the House at a mere 30 years of age in 1974. Mr. Dodd served three terms as Democratic Congressman from Norwich, CT, before launching his successful bid for the U.S. Senate at-Large, and served on the Rules Committee, the Budget Committee, the Appropriations Committee, the Select Committee on Assassination.

Degree Glut May Sour College Job Market Through 1990

Palo Alto, CA (CPS)—The job outlook for college grads "appears bleak" for the next three decades, according to a new Stanford University study of the long-range college job market. Moreover, "an increasing number (of college grads) will be forced to accept jobs incomen­ surable with their level of training," says Russell Rumberger, author of the report.

"Based on projections of low employment growth for the eighties," he explains, "and the in­ creasing number of people who will hold college degrees, I see a large number of college graduates who will be over­ educated and not able to get upper-level jobs."

Already, Rumberger says, one out of every four young workers in the labor force has a college degree. And by 1990, he estimates, one out of three will be college graduates.

Most of the number of jobs which require a college education is holding steady, while the number of available jobs is expanding. The already a glut of college grads in many fields, Rumberger points out, and even higher­ demand andExplorer for parents to save for their children's college education and initially hails with the American Council Education (ACE).

"And the program cuts off at families whose income is over $50,000 to $60,000 a year," he adds.

"That not only cuts off the people who would most likely be able to save, but it eliminates many older students who are going back to school. The range of people it would benefit is very narrow."

Thus, most higher education of­ ficers are waiting for a hybrid ESA—one would allow people to save, but it eliminates many who would most likely be able to save, and it eliminates many older students who are going back to school. The range of people it would benefit is very narrow."

"There's simply no real en­ thusiastic support for it among bank­ers," reports Eric Wentworth, vice president of the Council for the Advancement and Support of Education.

"Most people feel it offers little incentive, and that if it passed it would add to the money."

Faculty placements in three will be college grads. Rumberger, and for those lucky enough to find jobs in their fields a college degree could absorb, and it's going to get worse."

Many grads—who aren't choosey about their majors—will be forced into service and clerical jobs for which they are over­ qualified, he predicts.

"It isn't necessarily true that those people will earn less money, but they will have lower­level jobs."

College grads currently earn an average of 65 percent more than high school graduates, Rumberger says, and for those lucky enough to find jobs in their fields a college degree could absorb, and it's going to get worse."

"Not discouraging people from getting a college degree," he adds. "For students who do go on to college, they still have a better chance of getting a better, higher­level job. It's just that there's also a good chance they won't."

"Consequently, 'it'll be more im­ portant than ever to pick a major this fall, because what a college degree by itself just won't mean much more."

Still, predicting the job market years in advance is a risky business. "I'm a long­range planner, a college Placement Council."

"It's not a bad job, but we don't do any long­range forecasts because we've seen how many variables there are in the economy," explains. "A college degree by itself just won't mean much more."

The number of people with degrees may well create a glut of college grads, she says, but un­ predictable turns in the economy could also create very strong demands for certain majors.

"I can't even get employers to project what their hiring will be like this fall, let alone what things will be like in several years," she adds.

Class of '83 when is it going to be all over with.

Carl "Yaz" Yastrzemski accepts honorary doctorate for Physical Education from Archbishop James Aloysius Hickey.

Student Unemployment

30-Year High in '82

Washington, D.C. (CPS)—Unemployment for college­aged people last year was in the worst in 30 years, a new U.S. Department of Labor report says.

Some 924,000 college students aged 16 to 24 who wanted work couldn't find any in 1982, the Bureau of Labor Statistics says. The 11.7 percent unemployment rate was up from 1981's 10. percent.

The unemployment rate for all people in the 16 to 24 age bracket rose from 14.8 percent in 1981 to 18 percent in 1982, the bureau says.

In a written summary accompa­ nying the report, the bureau states, "There's already a glut of college grads. It isn't necessarily true that those people will earn less money, but they will have lower­level jobs."
Annual Alumni Awards Dinner

Six Members Honored

Providence College held its 27th annual National Alumni Awards Dinner on Saturday, June 11, in the college's Raymond Hall Dining Room.

The dinner, highlighted of class reunion weekends, was open to all alumni and friends of the college. During the evening, six members of the PC community were honored for their achievements and outstanding service to the college.

John G. Coffey, a member of the Rhode Island House and Senate, was awarded the Distinguished Alumni Service Award. Richard Deasy, Class of 1951, and Robert Deasy, Class of 1953, were honored with the Faculty Staff Award for their collective 46-year service to the college as members of the history department faculty. Richard, a resident of Riverside, RI, is an associate professor and director of the social studies program. Robert, a resident of Rumford, RI, is an associate professor and director of the humanities program. Dr. Adolph Moritz, Class of 1943, and his wife, Mary, were jointly recognized by the Alumni Association with the Distinguished Alumni Service Award, the first time a husband and wife have been so honored. A nationally recognized surgeon, Dr. Moritz was the founder of the Southern Florida Alumni Club and continues to serve as a Layman Fund Chairman for that region.

Robert Sellers, Class of 1958, was the recipient of the Citizenship Award in recognition of his contributions to the college community. During the evening, six reunion weekend at PC, was open to all alumni and friends of the college, was highlighted by the dedication ceremony of the Hunt-Cavanagh Building (former¬ly the Art Building).

Fr. Peterson commends John F. Cavanagh, Jr. at the dedication ceremony of the Hunt-Cavanagh Building (former¬ly the Art Building).

NYU Questions Copywrite Laws

New York, NY (CPS) — In what could be a precedent for other colleges and universities trying to keep students and faculty members from photocopying textbooks instead of buying them, New York University has settled out of court with nine major textbook publishers in a copyright infringement case.

In return for providing the publishers to drop a lawsuit filed last December, NYU agreed to adopt specific policies pertaining to the photocopying of copyrighted works, says an NYU spokesperson.

NYU's guidelines allow limited reproduction of book chapters, articles, short stories and poems for instructors to use in class, says Carol Kaiser of the Association of American Publishers (AAP), the publishers' group that sued NYU.

Instructors can make copies of brief articles for students, she adds, if it's done only one time for one course, and if there's not enough time for the instructor to get prior permission from the publisher.

The AAP had claimed NYU, ten of its faculty members and a campus copying center were reproducing "virtual anthologies" from copyrighted works. Students would use the materials in lieu of buying textbooks.

NYU agreed to settle out of court because "the university and individual defendants are troubled that there may have infringed on the copyrights of one or more publishers," the spokesperson says. But the Unique Copy Center, also named in the lawsuit, "will re¬main defendants," copying chain and a spokesman for the National Association of Quick Printers (NAQP) says.

The NAQP is contributing money to the Unique Copy Center's defense, he says, as part of group members' efforts "to garner our forces to reassure the professors and students around the country of their rights under the copyright law," Odell says.

But the AAP's Bilker hopes "other schools around the country will use the NYU agreement as a model."
Dear Readers:

The recent economic recession plaguing the U.S. has produced a severe increase in the unemployment rate. Though the recession is slowly recovering, the jobs are still scarce. The individuals affected are not only the steel, factory and auto workers, but also the college graduates. Once a college education guaranteed a job. It was the success story that all dreams were made of. Today, 1983's grads are facing the worst job prospects since the early forties.

In 1982, 4.5% of the seniors graduating from universities and colleges across the country, including Providence College grads, many of them are currently unemployed. Is the answer the type of major or individual studies, or is it being at the right place at the right time? There are no simple answers. The fact is that the job market is tight today. For a period of time chemical engineers may be in demand or it may be computer science majors. Yet, these individuals must still compete for the jobs available. Employers are not offering the number of jobs they used to a few years ago. It has been estimated that a 50% drop in job offers, as well as a 20% to 30% drop in recruiting interviews occurred this year. It is clearly evident that there exist more graduates than jobs available.

Thus, it is crucial that students take advantage of the opportunities available to them in college. The degree no longer guarantees that simple transition from school to office executive. A student must explore and extend themselves beyond the classroom. A college education, actual experience in their chosen field, and a thorough researched preparation for their interview will give the average graduate that extra edge he/she will need in the competitive job market.

I would like to urge PC students, whether they be freshmen or seniors, to prepare themselves for the job market they will soon enter into. Search out your talents and pursue your chosen career. Yet, be sure that you have tapped all the resources available to you. It is the individual who possesses the additional knowledge and talent that will get the job.

Prospects for 1984 graduates look to be better than recent ones yet, the fact remains that jobs are scarce. By the time the class of 1987 graduates, the economic situation is expected to have improved considerably, but the future cannot be predicted so easily and positively.

College is a time for learning and growing. It prepares us for our future. Thus, we as individuals must make the best of these benefits and utilize them to our advantage. The motivation and determination we exhibit may well be the key to our success.

Sincerely,

Vera R. Chwostyk
Editor-in-chief

Dear Editor:

My partner, Helen Waterford and I gave a lecture on "Hilbert and Cohn's "The Cowl." I was impressed by the quality of Ms. Waterford's lecture. I think she did an excellent job in describing the history and purpose of the Cowl. Our's is a controversial subject, and it does take some courage to lieve us. Here, I would like to single out Ms. Monica Glennon, who seemed to be instrumental in booking us.

Finally, we were impressed with the students of Providence College, and especially with their questions after the lecture.

Sincerely,

Alonso Heck

"YOU SENIORS BEG SO WELL..."

College Police Service

Welcome to Class of 1987

by Jane McAlpine

"Behold I will set thy stones in order and will lay thy foundations with sapphires."

Isaiah 54:11

Freshman of the class of 1987.

Welcome to Providence College.

And here we pause to reflect on one of the first passages you’ve read happen to be a religious one. Yet my reason for choosing this scripture is of deeper significance than the obvious. There is something of the PC directive.

As a high school senior, you’ve experienced the joy and pain of tearing up those familiar, settled, mending, and once again you're beginning a new phase of life. You will find many emotional adjustments will meet you within the coming year, as well as throughout your life. But there is something about freshman year in college that is unique. It is the first step onto the threshold to your future; it is a test of will, endurance and adaptability. What you do in college will show just what kind of “stuff” you’ve made of, and slowly but surely, you’ll come to realize where you’re going to begin to come in to your own and where you will receive at PC will last your lifetime, as will many of the friends you’ll make.

What is PC? PC is the only Dominican institution of higher learning in the continent of North America. PC is on the rise in standing as well, having recently earned a rating of highly competitive in Barron's Guide. Incidentally, one of the state's politicians and lawyers boast a PC degree, as well as one-fourth of its doctors—an impressive show, indeed.

The average college student struggling in the 80's feels pressured by society. He/she goes on to college "to get a good job." However, purpose being PC isn't only to get ahead in life. It means much more. It's a four-year commitment during which you'll learn much about yourself, people, academics and life than you can imagine. PC is your chance to gain enrichment, culture, vocation, marketable, and a quality of education that will set you apart from other colleges.

The transition from high school to college isn’t usually an easy one. It takes time, patience, endurance and motivation. Homelessness isn’t a stranger to any of us who’ve been through it before.

As a freshman, there are several important rules of thumb that you should keep in mind. First of all, give PC a chance. You’ll only get out of PC what you choose to put into it. Also, give PC a chance too late that we do have control over what we do there, and push it. Be selective when you're choosing your friends, and you'll be glad you were later. The key is to be true to yourself at all times.

Many freshmen come here half-expecting everything, including their first year's direction, to fall neatly into place once they reach PC. Don't kid yourself. You will have four years to figure through such decision making; and chances are, your needs will have changed from those in high school. Go gracefully with the flow of these changes and give yourself time to make adjustments.

A common dilemma freshmen face is the Catch-Between-Two-Worlds Syndrome. It is not a comfortable feeling, when neither home nor PC seems to be a place in which you fully belong. The trick here is to treat others and PC to separate entities. Trying to mesh together will only prove confusing. And even though sometimes you might not be so sure, your true friends will stick. For some, college is a place where values are formed or changed; for others, it is merely a polishing of pre-existing potential, just waiting to be developed. It is a chance to grow and make the most of what you are, academically, socially, spiritually.

Take advantage of your years at PC. They truly will be the best of your life. It's a great school, and before long, you will find it is one of which you may be proud. In the face of all adversity, keep onplug- ing. It has been said, "He who has never tried has nothing to show for his efforts; but he who can bend like the trees in the wind and subject himself to change, will reap the greater rewards."

Thus, the moral of our story—PC will remind them rough-edged stones into order—a synthesis of academic, social, spiritual, cultural and personal growth. It opens your mind and opens you to a wider perspective. PC offers comprehensive understanding, the higher ideals and sense of self (the "sapphire") that PC has to offer, one might just walk away very rich, and ready to face the challenges of tomorrow.

Sincerely,

Vera R. Chwostyk

The Source of Under Achievement: An Economist's View: The True Cost of College

by Joseph L. Lennon, O.P.

(Reprinted from the May 1, 1983 edition of The Providence Journal)

What are the factors influencing underachievement?

The report by the National Commission on Underachievement in Education is both frightening and encouraging: frightening because it laments a decline in the performance of high school graduates as compared to standards from grade school through college in conjunction with a tightening of teacher preparation requirements.

The remedies make sense and are long overdue. Wastage of talent should be a paramount concern of all citizens. The report wonders that "over half the population of gifted students do not match their tested ability with comparable capacity to its optimum not only because it betrays inefficiency in the educational system but because it harms the community at large."

How much underachievement is there? Studies show that 25% of high school graduates do not match their performance with their tested ability with comparable capacity to its optimum not only because it betrays inefficiency in the educational system but because it harms the community at large.

Educators consider underachievement of high school graduates not only because it betrays inefficiency in the educational system but because it harms the community at large.

Researchers have noted that some boys are more likely to be underachievers than girls. This holds true from the early grades through high school, but not in higher education. While girls speak out more on average, boys are more likely to be underachievers than girls. This is because boys can be more critical of themselves rather than in a cooperative work group. This is particularly true in the early grades of elementary school, where the teacher tends to treat the individual pupils as though they were the teachers' equals. The effect of underachievement in school is to create a "class of underachievers" who are less likely to achieve up to their full potential.

Kevin describes his many methods on meeting women.

Kevin demonstrates the soft, subtle, drip approach.

Sensitive & Inspiring

Eighteen-year-old Christopher Reilly had everything going for him—promising athletic talent, an outgoing Catholic family—until one rainy night when a Callas plowed into his own tiny automobile and nearly killed him.

Totaled, a novel based on a true story, tracks the slow recovery of a young man seemingly doomed to inner darkness, incapable of moving a muscle or responding to any outside stimuli. Despite doctors' pessimistic prognoses, his older brother, Frank, persists with a few steps at Christmas. The 1982-1983 school year was no exception. From a redesigned JRW to Commencement '83, it was an exciting year. Commencement activities, which lasted from May 18 to May 23, culminated in Monday's Commencement exercises in the Providence Civic Center. For all, it was a momentous end to an exhausting, yet exhilarating, year.

The festivities began with the semi-formal Tuesday night at the Beechwood Mansion in Newport. The elegant atmosphere provided a sharp contrast to the great dancing music provided by the Radio-Star. Out beyond the mansion's terrace stood a huge circus tent, enveloping hundreds of PC partiers. Despite the soggy spring ground, spirits were high. All agreed that the Beechwood was a unique setting for the semiformal, but one that lent itself well to the occasion.

The journey to recovery is painfully frustrating for the entire family. Mrs. Reilly grapples with her lack of faith in God; Laurie immerses herself in rehabilitating her husband. The journey to recovery is pain-filled and trying for the entire family.

The New Club in Town

Friar Hockey Fanatics

If you, or someone you should be part of PC's newest club—The Friar Hockey Fanatics. If Yes, then you should be part of Friar Hockey Fanatics. The club's goal is to produce active and responsive student participation in all home and away games. Listed below are the various committees that the club is comprised of:

- Publicity: This committee will be responsible for getting tickets and organizing buses for away games. It will also be responsible for making signs and other paraphernalia to put up at the games. They will be discussing many ideas for cheers and songs to encourage Friar fanatics to start the "fanaticism" going. A booth will be set up at the club fair on Commencement with all additional information and an opportunity for those who are interested to sign up with the club.

Editor's Notes

"Space Jazz" Computer Music

The computer musical instrument reproduces any natural sound. A single note of a musical instrument can also be recorded and the corresponding system will reproduce the other major sounds. The system comprises a computer, a microphone, piano keyboard, video display, and a light pen. The computer records and stores musical sounds on storage disc and can be used especially for the study of the sound pattern of the music.

The All-Star Show, which will be hosted by Frank D'Ottone and Charlie Hall, will feature the comedy of Jeff Baker, Randy Blak II, Ed DelGrande, Greg Johnson, and Emile Drayton. Each comedian will perform for a maximum of 20 minutes.

"We're looking forward to a big night," commented Kent. "If this night proves successful, we're hoping to be able to host an All-Star Show once a month."

Periwinkles regular Comedy Night, which begins every Thursday at 9 p.m., is designed to provide an endearing and entertaining venue for their talents. 

★ EDUCATION, Continued from page 6

be were similar to all others. Achieving students are preferred by parents to excel; much is excepted of them, especially by the mother (e.g., General MacArthur and Franklin Roosevelt).

Achievers, moreover, are more disturbed over other thoughts about them in relation to their intellectual capacity than

unachievers. Indeed, many of them wonder whether or not they are doing as much as other children. However, the public American cares about underachieving youth, because the future of our democratic way of life depends upon wise exploitation of the talent of all our citizens.
Discover the East Side

(by Lorrie Savoca)

It is common for PC students to begin each weekend with the same questions, "What can we do tonight besides go to a party or a mixer?"

Fortunately, it is just as likely that they will wake up next morning with a hangover somewhere between the hours of 10 a.m. and 2 p.m. and again find themselves with nothing different to do. Well, the answer to the "what to do" blues may be only five minutes away. Yes, for both day and night activities, the East Side has much more to offer than just Store 24 and The Brown Book Store.

The East Side is located close to the center of Providence, past Kennedy Plaza, and up Waterman St. It includes such landmarks as historic Benefit Street, Thayer Street, Brown University, and Rhode Island School of Design, plus a host of restaurants, museums, and boutiques. Although the East Side is just across town, its quaint and relaxed atmosphere is filled with its cultural and historic beauty immediately sending any visitor into a "mile of history". This street, offers exhibits of R.I. Island History, 110 Benevolent Street, offers exhibits of R.I. history. The Governor Stephen Hopkins House, 15 Hopkins St., Continued to page 10

Warwick Showcase Cinemas 1-8 to Open

Rhode Island's largest indoor movie complex, Showcase Cinemas 1-8 Warwick, opened on May 20. This new luxury theater is located at the intersection of Division Street and Route 2 in Warwick, off Route 95 (Exit 8A or 9) and is operated by Redstone Management of Boston. Showcase Cinemas, like all of the circuit's indoor houses, present first run motion pictures in the finest atmosphere available. One of the complex's eight auditoriums will be equipped with 70mm projection facilities and a CP200 Stereophonic Dolby sound system.

P.O. BOX 2991 PROVIDENCE COLLEGE PROVIDENCE, R.I. 02918 (401) 865-2214

---

The Providence Athenaeum, founded in 1753, is one of America's first library corporations. In 1808, it was designated the first permanent American paintings. Arizona students and for its contemporary artists. Especially known for its French masterpieces by Manet, Matisse, Picasso (for you second year art students) and for its collection of American paintings. Admision is only $1, except on Saturdays when admission is free. It is open on Tuesday, Wednesday, Friday and Saturday from 9-1, and Sunday from 2-5.

So, escape to Benefit Street for all its cultural beauty and as a nice respite from your studies. Brown University not only adds to the cultural beauty of the East Side just as Benefit Street does, but this school also adds a little fun with its first parties, concerts, and the like. Brown's ivy-covered brick buildings were erected in 1764, and the students at Brown are interesting people to meet.

Famous Thayer Street is the heart of Brown student life. Its "college town" atmosphere includes cheerful students, hard working peddlers, and curious visitors. Thayer Street and its side streets provide several quaint restaurants and shops that cater to the student life. Among these restaurants are The Big Apple Deli, located next to College Hill Tavern. This deli serves mainly sandwiches, all under $3, and it is a convenient place to grab a quick bite. The Kastel House serves anything from bagels to fish and chips. Most dishes are under $5 and they are open every Tuesday and Wednesday, an alternative to the Silver Truck.

Spans Food and Spirits is recommended for a fine food and dinner, featuring a salad bar, fish, steak, and Italian food. After dinner hours, it opens as a bar. The old fashioned decor provides a nice atmosphere for a quiet relaxing evening. "Spans" may be difficult to find, but it is worth the search. On Friday nights it offers all the party atmosphere you can have for a very reasonable price. It can be found just below The Wokery and next to Berks.

For a special night on the town, La Serre exhibits "casual, yet intimate," surroundings, and a menu that includes anything from omelettes to poulet angelique. It is located on Angell St. (off of Thayer St.) and it can't be missed by its charming "greenhouse-like" atmosphere.

Penguins is an adorable little health food restaurant which can be spotted by its outdoor deck which is filled with tables and big blue umbrellas—perfect for a nice autumn day. Penguins specializes in frozen yogurt, salads, pastries, and unusual sandwiches. The prices are reasonable.

Andrea's just moved its location to the corner of Meeting and St. Mary's. Its bright, modern decor and extended Greek menu are reason enough to try this restaurant, not for its food, then for a drink at the upper level bar. Incredibly Edibles, Bear Necessities, and Blue Angel bring a bit of Quincy Market to Providence. Jelly beans line the walls of incredible Edibles, stuffed bears with names like "William Shakespeare" sit on the shelves of Bear Necessities, and original cards decorate the panels of Blue Angel. Spend some time browsing in these shops for a bit of fun.

Clothing stores are also among the wealth of shops that Thayer Street has to offer. The prices and styles are set with the student in mind. Shops like Spectrum, Mark II, Palmer's and Berke's are all recommended shops that you get the urge to splurge.

Observe side streets usually prove to have some of the most intriguing points of interest and the side streets of the East Side are no exception. The Museum of Rhode Island History, 110 Benefit Street, offers exhibits of R.I. history. The Governor Stephen Hopkins House, 15 Hopkins St., Continued to page 10

Statement of Ownership, Management and Circulation

"What can we do tonight besides go to a party or a mixer?"

Tonight besides go to a party or a mixer?"
more complex. There were conflict­ing reports: one said that Amato wanted to remain in Atti, AD, the other saying Amato and Lamiroti were worried about Amato's tenure at a Rhode Island high school. It is clear that Lamiroti wants a person with a business background to fill the position because of the growing athletic department budget.

"When Mr. Amato was hired (promoted) by Mr. (Dave) Gavitt (former PC athletic director) two years ago, Mr. Gavitt told him that to keep his tenure (he should) take a leave of absence from East Providence High School," said Lamiroti. "The reason for the (change) was the specific needs of that office and the growing fashion that we're in. A business manager is needed to handle the monies that are coming in and to do certain things; we need a straight business person, a person with a business background.

"When I came on board, I had no knowledge of certain areas. Then, Schneider Arena was to come under the athletic department — and I find out that it is necessary for a business manager to be involved totally to the fullest, as if they were the financial business background."

"I spoke to Mr. Amato about that, and to go along with some of the things that he had been told by Mr. Gavitt, I felt that in that position with a business person. And we didn't want to see him lose his tenure in teaching. This was done to go and make sure he can stay in teaching, which, in fact, he could.

"There were some misunderstandings, but nothing negative. We cannot just have an athletic director drive around in a full-time track coach at this point in time. So we must fill that position with something of a need factor for the athletic department. That job description for the assist-

Lamiroti wants a person with a business background to fill the position because of the growing athletic department budget.

"That job description (for the assistant athletic director in essence that and, to go along with some of the things; we need a straight business person, a person with a business background."

"Mr. Gavitt, we will potentially have a position because of the growing athletic department budget."

Continued from page 1

"The thing that I have done is to fill that position with a business person. And we didn't want to see him lose his tenure in teaching. This was done to go and make sure he can stay in teaching, which, in fact, he could.

"There were some misunderstandings, but nothing negative. We cannot just have an athletic director drive around in a full-time track coach at this point in time. So we must fill that position with something of a need factor for the athletic department. That job description (for the assistant athletic directorship) is with a business aspect."

The athletic department is making the women's basketball job a full-time position with the recommendation of Mrs. Butt. The coach will, however, have to coach another sport or assume administrative duties, also. Because of the new job makeup, Joe Mullaney, Jr. may not wish to remain at PC due to the new 'full-time' status.

"You have to understand," said Lamiroti, "and we are now able to have a full-time women's basketball coach who will do nothing else. We're just not ready for that. Maybe two years from now we will be, maybe one year from now we will be — I'm not saying that we won't get to this."

"Mullaney's teams have compiled a 66-27 record. With regard to his own decision, Lamiroti said that he had not yet decided but would do so shortly (perhaps by the time you are reading this.)"

"I've talked to Fr. Peterson," Lamiroti said, "and we're very close to some of the questions I have and in the very, very near future we'll come up with some kind of solution."

"The thing that I have done is that I gave my commitment, for Providence College and the students, that I will do both jobs totally in the fullest, as if they were single jobs, and that would not impede any of the decisions. And that's exactly what I've been doing right to this point, because I don't think my personal future or my personal decision either way should impede the progress of Providence College, and I feel pretty good about that."

"Fr. Peterson certainly has strong convictions and he's right in it. The situation that I have is that there are some questions that have come about since last September, when I initially took the job; that, rather than create anything, are being answered right now; and answered in a very positive way. There is nothing negative that is going on."

When asked if his staff changes seem to give the impression that he's leaning toward the AD position, Lamiroti answered, "I think you'd have to know me better to understand that."

"I will say that no matter what happens, I would have recommended and I would have done and will do what I have been doing anyway, because I did believe that what was done was for the best of the department and Providence College. And that, to me, is part of my job."

The Racquetball Report

by Paul Sweeney

Since its inception in the fall of 1982, Friar Club racquetball has established a winning tradition enjoyed by many major collegiate racquetball programs.

Among its accomplishments, the team boasts an undefeated 5-0 league record, a third place showing in the Northeast Regional Intercollegiate Racquetball Tournament, which Providence hosted, a strong showing in the National Championships and a New England Racquetball Championship.

The club is comprised of the 12 best racquetball players at PC, competes in a league with mostly New England area colleges and universities. In the 1982-83 school year, PC hosted the Northeastern Intercollegiate Racquetball Tournament and traveled to Memphis, Tennessee in order to compete in the nationals.

In the upcoming season, Providence will compete mainly against teams from the Eastern Collegiate Racquetball Conference, most of whose teams come from the New England area.

Some tentative dates for the upcoming season... Wednesday, September 7 at 7 p.m. - organizational meeting at a room in Slavin Center to be announced. This is open to all students. September 12-15 from 3-5 p.m. - tryouts in Peterson Recreation Center.

Athletes Honored at Banquet

by Richard Tests

Kathy Finn ’84 and Randy Velichko ’84 of the PC women’s tennis team, who were honored at last year’s Athletes Honored at Banquet on May 9.

Finn, the highest scoring women’s basketball player in the college’s history, and Velichko, a first team All New England hockey player, were named the 1982-1983 athletes of the year. It was the second straight year Finn received the highest award. Other awards went to women’s track and cross-country captain Jean Fiore, two-sport cap-

t and Judy Van Schelt, men’s ice hockey captain Bruce Raboin, and men’s tennis captain Dan Delledonne.

Finn led the Friars to their best season in years, finishing third in the conference last year with 209 points. She also won four individual events, including the 1,500 meters.

Velichko led the PC hockey team to its winningest season (13-10) and to the NCAA Final Four, where they finished second. He was named ECAC Player of the Year and named first team, with 34 points for 52 games. Two days after the NCAA Tournament, Velichko signed a pro-

t with the NHL’s Min-

nesota North Stars and played in the Stanley Cup playoffs.

The Sine Quo Non Awards, presented to the outstanding men and women who "distinguished themselves on and off the playing field," were given to PC hockey and softball.

From the Sports Desk:

As students at Providence College, we have the opportunity to watch and participate in various sports activities. As fans, we have the chance to see talented athletes display their skills in major sporting events. This past year, the PC community had the opportunity to root the Friars on to several exciting and successful victories. What a thrill it was to see the men’s hockey team skating around the ice after beating Minnesota-Duluth to become one of the “Final Four” in the NCAA playoffs. The Lady Friar basketball team’s aggressive play during the season led them to one of the best records in PC women’s basketball history and a first place finish in the Big East regular season play. In 1981, Providence College’s Peterson Recreation Sports Center opened. The Center is the home of racquetball, tennis, and basketball courts, nautilius and universal equipment, an indoor track and a swimming pool. These facilities are utilized by students, faculty and friends. The Recreation Center also hosts intramural games scheduled by the IAB. Newcomers will soon join the throng of students, and these are an important part of PC for both students and faculty. Intramurals are not only a way to shape up and have fun, but also a chance to meet new people. In club action, the rugby, football and baseball club players represent the Friars in collegiate competition. Other clubs, such as the ultimate Frisbee team, provide less competition among neighboring schools. When you are tired of studying or want to work off all those mural and silver truck munchies, drop by the Peterson Recreation Center. Whether it’s on the field or in the stands, PC sports has a lot to offer, so get involved!

Announcement

The deadline for all men’s and women’s intramural flag football teams to register is September 9th. Roster sheets may be picked up at the Intramural Office, located at the Peterson Recreation Center.

Winter’s Big Three Recruits

By Richard Testa

When the Big Three PC sports teams begin in November (men’s hockey), December (men’s basketball), and January (women’s basketball), in order of importance, they will bring to the University yet another batch of bright new faces to study and, hopefully, a few new athletic memories. To say it all, however, all we’ll know about the winter recruits are their names. The men’s hockey picture was still cloudy as of this writing, but the following is the latest info to date.

Six-foot-four Ernest Lewis, a native of Germantown, Pennsylvania, will be looked for his forward production. And little Billy Donovan, the 5-10 playmaker from Rockville Centre, New York, rounds out the five new faces.

Canadian births closely enough, you probably noticed that a whole new team was formed, two forwards, two guards, and a center. The hockey picture is all out of which because of next year’s Olympics in Sarajevo, Yugoslavia, and as we’ve been told money. A few of the names that follow were offered one of the two, a native was asked to choose between the two.

Brian Lawton was the first American number one pick ever in the NHL draft (to the Minnesota North Stars.) So Lawton must choose from the NHL and money, the Olympics and glory, or PC and a “normal” life.

Anyways, seven others chose Schneider Arena as their home if they decide against the Olympics or don’t try to qualify. They are: Tom Barrasso and Mike Flanagan of Acton, Mass; Dan Wurst and Lander Nelson from Minnesota and three transfers from Notre Dame, which dropped their program: Steve Bianchi, John DeVoe, and John Dease.

There will be more to say on the hockey situation when classes resume. Whatever happens between now and then, no one can deny the coaches weren’t out on the recruiting trail.

No Cure Available

Friar Fever...Catch It!

By Christine Merlo

If there’s one thing anyone could say about Providence College sports fans, it’s that we have a lot of pride. That’s right; Friar Fever is alive in Friarland. Many colleges dislike entering into the “Friar Zone”, fearful of the damage the spirited PC fans can do on the concentration of their play.

As any sports fan can see, the PC community has a lot to be proud of in our athletic teams. We are fortunate enough to have some of the best athletes to college competition among our student body.

Many of our varsity teams have been nationally ranked among the top schools in our country. Our nationally ranked barriers have competed against some of the very best. The team, captained by co-captains Danny Sabel and Steve Bines, ended their season with an impressive second place finish in the NCAA finals for the second year in a row. In hockey, both the men’s and women’s teams were nationally ranked. In men’s action, the black and gold finished their long season as the third best team in the country. The exciting season brought PC fans to the Boston Garden to see the thrilling ECAC playoffs and later to Wisconsin for the NCAA finals. Providence College Senior Randy Velichuk was voted ECAC player of the year.

The women’s hockey team also had an excellent season as they competed against many of the top teams in college hockey. The Lady Friar’s ended their season with an outstanding second place standing in the East.

In basketball, both men and women’s teams competed for the number one position in the Big East. In January, NBC-TV visited the Providence Civic Center as Patrick Ewing and the Hoyas from Georgetown battled against our own Otis Thorpe, Ron Jackson and company.

The women’s team, led by captains Terry Phayre and Jayne Benisowski, hosted last year’s Big East Tournament in which the Lady Friar’s took a satisfying second place. Junior’s Kathy Finn and Laurie St. Jean were voted Big East All-Stars.

Other teams such as tennis, basketball, volleyball, and lacrosse provided many exciting moments.

At Providence College, pride and school spirit grow rapidly among the community. If you have never had the pleasure of watching the Friar’s action, don’t worry, you will have another chance this season. Mark your calendars, you will catch the Friar Fever!

Intramurals Need You!

By Christine Merlo

President John Gould and Vice President Jim Sears have many plans for this year’s intramural athletics. The long awaited flag football season kicks off the first event of the new year and will begin soon after our return in the fall. For Freshmen and transfer students, intramural games allow students the opportunity to participate in competitive sports. The process of joining an intramural team is simple. Interested teams of 10-20 students (according to the sport) must obtain and pass a roster sheet, elect a captain and collect a $15.00 security deposit (the money is refunded if you forfeit any games) and pass in the necessary information to the Intramural Athletic Board before a given deadline. The IAB then sets up different leagues and game schedules according to the number of teams participating in the event. Most games are played during the late afternoon or evening, which helps to avoid any conflicts with classes.

The IAB provides students with many different sporting alternatives. Highlighted sports from last year were men’s three on three basketball, men’s and women’s ice hockey, co-ed volleyball, and co-ed wiffleball.

Participation in intramural athletics is not limited to upper class students. Many first year student teams have done extremely well in competition. In the past two years, they have made the final four teams in the three on three basketball competition. Last year, the predominantly first year team from the second floor of Meagher Hall won the women’s softball tournament; the best two out of three games competition. As a reward for their hard work, all winners of intramural tournaments are given championship tee-shirts.

The IAB works hard at promoting involvement in sports at Providence College. For only a small fee, students can enjoy exercise, camaraderie, and great sports competition.
