1984: Is It Really Here? **Gary Wills Comments** At President's Forum

by Jude Brearton

Historian and journalist Gary Wills delivered an extremely thought providing and almost admonitive lecture, Nov. 3, on Culture and Values.

Wills, a professor at Northwestern University in Chiego, Illinois, began inauspiciously by directing the attention of the many listeners to a box of "Ban" deodorant. Using the deodorant deodorant using model, he laid the foundation for his lecture. By as a convincing model, he laid the foundation for his lecture. By establishing the fact that 'the 'Ban' product of our own culture and a reflection of our beliefs, Wills raised some disturbing questions.

He first pointed out that the large size of the 'Ban' container would discourage most shoplifters, indicating a "universal statement of distrust."

This sense of suspicion was an integral part of George Orwell's negative utopian world of 1984.

negative utopian world of 1984. Wills had now planted a seed of apprehensive questions in his audience.
Wills then moved to the question of our "acceptance of lies". Again he refered back to the "Ban" container, noting that for its size, it contained only 3 ounces of material.

language and how this degrada-tion makes people accept the lies or accusations." In 1984 this was obvious in the repeated doctrines such as "War is Peace; Peace is War." In our world, "because we are part of that deceit," Wills argued, "this degradation is subtler only because we are so accustomed to it."

He clearly illustrated this, poin He clearly illustrated this, pointing to yarious advertisements and television commercials and their 'ingenuity for finding new areas of fear''. The Key Is Responsibility

One of the many purposes of going to college is learning responsibility. No other time could responsibility be more important than senior year. Senior year is the time when major career decisions have to be made.

Unfortunately, confusion is a common malady that strikes seniors. Parents and friends of the family can easily add to this con-fusion by asking, "what are you going to do with your education?" A good answer can be difficult unless the senior has some sense of career direction. Only when the senior is willing

Only when the senior is willing to take responsibility for his career planning can the Career Counseling Center be of any assistance. A senior must clearly define his strengths and weaknesses, and the desired direction of actions.

A Chance For Real Progress

by Dave Preston

This past Monday, the Student Congress handed Friars Club president John Kennedy a golden opportunity. At the suggestion of a resolution passed by the Congress, Kennedy and his executive board have a chance to make some real progress here at PC. The resolution proposes that the Friars "evaluate and assess the character of their service mean to the congress of the congress of the congress of the congress and the congress arounded a confrontation that would have been unproductive. In passing the resolution, the

In passing the resolution, the Congress exhibited some ad-mirable traits. First, Congress proved critics wrong by showing proved critics wrong by showing that they are not deaf to student sentiment. There is widespread discontent on campus with the current Friars Club situation, some of it even in the Club itself. The Congress showed that they are in tune with the campus climate. climate.

Second, Congress showed its mettle by not ducking a tough issue. Some members sought to keep the Congress out of this one by citing the age old excuse "It's

not our job." Technically, this is correct. As the resolution states, "The Friars Club (is) not answerable to the Student Congress." But with a vote of 32 in the affirmative and none in the negative (6 abstained) the Congress met the issue head on and strived for an amicable settlement. All is not perfectly rosy,

gress met the issue head on and strived for an amicable settlement.

All is not perfectly progressively respectively respectably vague. Although it does indicate the will of a majority of the students, as voiced by those who represent them, there is nothing in the resolution that says the Friars Club has to pay even the slightest bit of attention to it.

Nothing, that is, except implied "good faith". By introducing a mild resolution, the Congress avoided a confrontation in which the Friars Club would inevitably have come off as the "heavy", the Bad Guys. The Friars should appreciate this gesture on the part of the Congress. Congress action should into this matter. The Friars Club should in the same.

Unfortunately, there is another potential drawback to the resolution. In the accompanying com-

elitist and their privileges are viewed as inappropriate, especially for a volunteer club. The search should now be for solutions. One solution to the selection dilemma has already been proposed on these pages. In the October 27th issue of The Cowl, it was suggested that Fr. administration, and Friars Caumembers.

The fact that the Friars should be represented on the committee is more important than most realize. When all is decided and new members are picked, it is ultimately Friars Club members who have to work together. It is only common sense that the Friars have a reasonable say in who they work with.

This provides the sound the plenty of time for serious thought, but the issue would not be allowed to linger. Upon reading the resolution elsewhere on this page, some skepties might be tempted to tiwe it as a whitewash; as a way for Congress to cover their own tracks. If just might work out that ways but if things do go in that direction, the fault will not lie with Congress. Although their idially a little with the sound gave voice to student concerns.

Raymond Cafeteria must be fully closed by 7 p.m. and this procedure takes more than fifteen or twenty minutes. It is therefore necessary for the outside cleanup to begin before 6:30. As for the "loud background accompaniment of shaking tables and banging chairs," — why is this so? It has become common practice of both students and faculty to move two or more small tables together to accomodate a large number of people. There are quite a number to accomodate a large number of people. There are quite a number of long tables at which large groups may sit. If these long tables are all being used it is fine to move a few small tables together, If, and only if, you trend to put them back where inhead on the model of them there will not be a moving tables at the end of meals.

The opinions expessed herein are the opinions of the editorial board and do not necessarily represent the opinions of the administration or the student body of Providence College. This fall, the students at PC have voiced their concerns about such diverse issues as parietals, off-campus police relations, and discord within the Friars Club. These problems are indeed important and effect the college community as a whole. There is, however, an important problem that involves a smaller portion of the students at PC. The issue at hand is the inadequacy of the meal program for on-campus residents. It ional food goes, it is, for the most part, much better than average. The problem lies within the meal plan. Resident students need and esize a greater variety of meals and food. Although Raymond Caffetria does offer two choices nights (peanut butter and saids dar) a wider choice should be offered.

The loveical solution to this profered. The logical solution to this pro-blem would involve revamping the meal plan here at P.C. Utilization

of the meal card does not enable the student to select from difIerent meal options. The meal plan then, must be changed to accomadate the students desires for a greater variety of food. One college meal program which successfully does this is the meal plan at Boston College. Instead of meal cards, Boston College gives books of meal tickets, each book with individual tickets valued at one dollar, fiftycents and ten eents. Like the Providence College meal card the meal tickets at B.C. are distributed at intervals. Instead of It is not the quality of the food that is the question. A couple of weeks ago I lost my wallet at PC. I didn't know whether it had been lost or stolen and naturally I was very upset.
The wallet contained identification, personal papers and a
substantial amount of cash.

Last Tuesday evening, as usual, I went to Alumni Cafe for dinner before my Logic class. Mr. Paul

Wytruaf, the manager of the cafeteria, hailed me and told me he had my wallet. It was returned to me intact. I wish to thank him and feel that he is a good representative of all the people and spirit of Providence College.

Legal Aspects Of The Scoop

by Ted Hodkinson
With veryopen and their brother
writing an article on the social
malady, scooping, in the The
Cowl, I figured why not try my
hand at it?

To begin with, this article will
have a different slant than those
previously appearing in The Cowl,
It seems that a great many people
at Providence College believe that
scooping is "morall" if done
under the right circumstances. In
position offered by these students,
I will attempt to present different
conditions under which a scoop,
and its near cousin - the "slam",
are indeed moral.

and its near cousin - the "slam", are indeed moral.

To try to capture this illusory beast and define it in appropriate terms, I would maintain that a scoop is "Meeting a member of the opposite sex in an environment where the consumption of simulants, and the consumption of the period of time (anywhere between 10 minutes and three hours) and then leave the point where the scoop was initiated.

The participants then have the

'The participants then have the option of getting something to eat or proceeding right to the actual

The actual scoop involves little The actual scoop involves little conversation. Issues such as Grenada, El Salvador or Lebanon are rarely discussed in the process of a scoop, although this may be different for Paul LaRue, Joe Corradino, or the Skull.

To define this "scoop"! would maintain that it is "the touching and of any body part for an extended period of time." This act of couching can be repeated many times over the course of a scoop.

YOU FEEL ANY OBLIGATION

Scoops can last anywhere from 10 minutes to days. It all depends on the influencing factors such as 1.) amount of alcohol consumed by participants, 2.) relative attractiveness of the participants, 3.) affinity for bodily contact, 4.) ability to "get sleazy" and stay sleazy for an extended period of time, and the all important criteria 5.) the relative attractiveness of the body parts of the participants. Also important in a scoop is

body parts of the participants.

Also important in a scoop is how little you respected your scoop partner before the dreadful scoop partner before the dreadful country of the scoop partner before the dreadful the scoop partner before the dreadful to leaft them. You may tell yourself "it was his 'her fault. He /sfe '6Boy George, by the way is interchangeable in this scooping concept) - was looking especially fine last night - or especially sleary and so I could not help but be scoop by him /her."

Now on to the defense of the scoop. This part of my editorial could be titled "When Is It Moral could be titled "When Is It Moral your services with the notion that it is alright in moderation, then read

is alright in moderation, then read

on.

According to a particular junior girl who will go unnamed, it is correct to scoop "moderately," I take moderately, take moderately to mean "once or twice a week." Now scooping is O.K. If it is done in moderation, and with someone that you semi-respect or don't in fact hate. However, if you scoop the same person more than once in the same week it could be bordering on a semi-relationship. If that person is the same and the same and the same person more than once in the same without the same and reputation, then it is not O.K. to scoop him /her it is not O.K. to scoop him /her more than once in the same week. If, however, his status gets

upgraded to "bad reputation" then it may be O.K. It all depends on how long its been since he/she was last scooped and by whom.

was last scooped and by whom. If you discuss intellectual topics such as "will the sun come up tomorrow" or "how many licks does it take to get to the center of a Tootsie Pop," then you may be destined to write for The Cowl. (Although you do not necessarily have to be a scooper to write for The Cowl, it does help if you have a reputation as "being easy" if a reputation as "being easy" if you want an Editorial position. Dave Preston and Patrick Har-ington are perfect examples of

this.)
Usually the most intellectual questions during a scoop become limited to ones such as "Have you seen Dynasty this week?" or "Wasn't that re-run of Flipper great?"

seen Dynasty this week?" or "Wasn't that re-run of Flipper great?" what hat re-run of Flipper great? while on to the "slam", it is almost never O.K. It is only O.K. to get slammed if you 1.) have wanted to scoop this guy, girl for more than one calendar year or, 2.) you have been scooped by this guy/girl in the last several months. If you scoop this person on a regular basis, say 2-4 times a week, and you have begun asking your scooping partner and the your scooping partner and you have begun to major?" then you are allowed 2 slams a month, but not both on weekends because people might talk. If you scoop his person on a regular basis and have begun to ask such deep philosophical questions as "do you think it will rain tomorrow?"

Hey! What's all this fuss about Lebanon? Of course we should be there. We have the ultimate justification. It's in The Book!
Oh sure, there's plenty of books. They have a book, but it's outdated. Good said so. And let's be serious- God knows what he's taking about He really takes care taking about The Phoenicians? The Rottations? The Phoenicians? The Rottations? Rotations?

Rotations?

So when those grubby students with their grubby camels and grubby robes start throwing grenades chanting their grubby prayers to their God, you can be sure they're wrong. Cause their book says they gotta revenge for the crusades with those hand grandes, and got their God from our God and even though we got used to got their God from our God and even though we do with no name it doesn't matter 'cause he said he was just kidding all that time and those guys aren't really chosen after all. chosen after all.

And those other guys up north that are evil incarnate and want to take over the world and make us take over the world and make us read their book that some guy with a long beard, who our God really doesn't like, wrote because he's a friend of the devil, try to come down into Lebanon using the grubby guys with that other book, that's not what God wants. It's an abomination - He said odd wants. So we must striketh them down, but do it gently as to preserve the buildings so we can make them in-to temples for the worship of our God. 'Cause he likes that kinda thing. That's why we're in

thing. That's why we're in Lebanon.

Meanwhile, in Seattle, Archbishop Raymond Hunthausen attempts to intimidate his parishoners into withholding half their federal income taxes in protest against militray reporting. But their tederal income taxes in pro-test against military spending. But he must not read his book because the long-haired radical from Galilee said "Give Caesar what is Caesar's" and I'm pretty sure Caesar used that stuff for other than peaceful acts of Christian Kindness.

Our God's been pretty active of late - through his humble servant -Jesse "Humble Servant" Helms -Jesse "Humble Servant" Helms, he's been revealing the despirable devotion that Martin Luther King had to the red book. God doesn't like Communist plots in His Country so let 's get mean and nasty for Him. No holidays! And sepecially after they shot down our God's humble servant having Larry "Joe McCarthy' McDonald over the land of yet another book that they don't use anymore because they like credit card books better now. That's anymore because they like credit card books better now. That's near the homeland of the World Government of the Age of Enlightment's honorable son Maharishi Mahesh Yogi who has announced his readiness 't'o solve the problem of any government regardless of its magnitude''. and he should know because he was the Beatles' guru.

Modern poetry so nhy alternative

PETER VIERECK ENLIGHTENS LISTENERS during a recent lecture at Aquinas Hall.

The second most notable feature of Viereck's work is his af-firmation in the natural, "physical expression of poetry."

The unstressed-stressed system of iambs, Viereck emphasizes, "is also the inhale-exhale of the lung, the open-shut of nerve synapses,

This rhythmic adaptation was audibly detected in all of Viereck's

one of Viereck's most cherished topics was Williams Butler Yeats' 1939 work, Purgatory. Viereck loves to site the masterful use of iambic tetrameter with sporadic spondees in this play. Viereck himself tends to speak, as well as read his poetry, in such a frequently spondaic fashion.

This manner and the entirity of natural rhythm theory were finely magnified in Viereck's reading of "The Poet." Several lines and phrases of this work memorably sang his passion regarding the natural qualities of a poet. "...his nerves are laughter", "...iambics of his soul", and "...he shutters

into song" Such was the enjoyable presentation of musicality and craft in which Peter Viereck delighted the Providence College community by "shuttering into song" before a near-capacity audience.

Or more specifically, Human Sexuality and YOU!

The topic of human sexuality is often veiled by the society of the '80's in a cloud of misconceptions, embarrassment, and at times even ignorance. It is a subject which most individuals avoid, except perhaps with their closest personal friends, and even then there are many taboos about exactly what one should discuss. Yet sexuality lies at the very essence of each individual's being and it is therefore important not only that we understand ourselves as sexual human persons, but we should ac-cept and appreciate this fact as
